

ADDITIONAL LICENSE AUTHORIZATIONS

For HP Software Security Center software products

PRODUCT USE AUTHORIZATIONS

This document provides Additional License Authorizations for the following software products in the Software Security Center of HP's IT Performance Suite software:

Products	Products (continued)
HP Fortify Governance	HP Fortify Application Security Fundamentals Computer Based Training
HP Fortify Program Trace Analyzer	HP Fortify Application Security Fundamentals for Managers Computer Based Training
HP Fortify Real-Time Analyzer	HP Fortify Information Privacy Awareness Computer Based Training
HP Fortify SecurityScope	HP Fortify Information Security Awareness Computer Based Training
HP Fortify Static Code Analyzer	HP Fortify IT Security Fundamentals Computer Based Training
	HP Fortify Real-Time Analyzer Analyst Guide Computer Based Training
	HP Fortify Real-Time Analyzer Concepts Computer Based Training
	HP Fortify Real-Time Analyzer Operator Guide for .NET Computer Based Training
	HP Fortify Real-Time Analyzer Operator Guide for Java Computer Based Training
	HP Fortify Real-Time Analyzer Solution Designer Guide Computer Based Training
	HP Fortify Secure Coding in Java Computer Based Training
	HP Fortify Secure Coding in .NET Computer Based Training
	HP Fortify Secure Coding in C/C++ Computer Based Training
	HP Fortify Secure Coding in PHP Computer Based Training
	HP Fortify Software Security Center Computer Based Training
	HP Fortify Static Code Analyzer Audit Workbench Computer Based Training
	HP Fortify Static Code Analyzer from the Command Line Computer Based Training
	HP Fortify Static Code Analyzer with Eclipse Computer Based Training
	HP Fortify Static Code Analyzer with Visual Studio Computer Based Training

Definitions

Capitalized terms not otherwise defined in this Additional License Authorizations document are defined in the governing agreement.

Term	Definition
<i>Authorized Machine</i>	means a named physical machine licensed to run the software.
<i>Base</i>	means an offering of HP Fortify Governance with a minimum of 10 Projects.
<i>Build to Order Plan or B2O</i>	means a pricing plan under which Power Users and/or Regular Users use the software on Authorized Machines for Projects.

★ 5 9 0 0 - 2 4 0 5 ★

Term	Definition
<i>CBT Seat</i>	means a license for an individual to use a specific CBT course. Further, a CBT Seat cannot be reassigned after an individual uses the CBT module.
<i>Concurrent Running Instance or CRI</i>	means a physical or Virtual Machine that is running HP Fortify SecurityScope.
<i>Device or Dev</i>	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
<i>Documentation</i>	means any explanatory written or on-line material including, but not limited to, user guides, reference manuals and HTML files.
<i>E-LTU and E-Media</i>	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<i>Enterprise or Ent</i>	means a license which allows Unlimited CBT Seats within the legal entity.
<i>Flexible Deployment Plan or Flex</i>	means the licensing arrangement under which you know how many developers contributed code to the applications, and the software may be used to analyze/scan code written only by the Named Contributing Developers.
<i>Instance</i>	means each implementation of the application installed on a Server.
<i>Internal Use</i>	means access and Use of the software for purposes of supporting your internal operations or functions.
<i>Lines of Code or LOC</i>	means the total number of lines of your software source code that are authorized to be scanned by an Unlimited number of software developers on an Unlimited number of Authorized Machines using the software.
<i>Lines of Code Plan or LOC</i>	means the licensing arrangement that specifies the authorized Lines of Code
<i>LTU</i>	means License To Use.
<i>Named Contributing Developer or NCD</i>	means a named software developer authorized to contribute code to the projects to be scanned by the licensed product.
<i>Named User or Nmd User</i>	means a specific individual authorized by you to access the software regardless of whether they are actively using the software.
<i>Project or Prj</i>	means a unique code base analyzed by HP Fortify Static Code Analyzer or managed by HP Fortify Governance.
<i>Power User</i>	means a Named User authorized to use HP Fortify Software Security Center, HP Fortify Static Code Analyzer, IDE plug-in and Audit Workbench to run scans on and view results for all projects.
<i>Professional Services Engagement(s)</i>	means a contract between Security Consultant and a third party for the Security Consultant to perform a Web Application Vulnerability Assessment of a defined web site or a Static Code Analysis on behalf of the third party.
<i>Regular User</i>	means a Named User authorized to use HP Fortify Software Security Center and IDE plug-in to run scans on and view results for only projects that they have worked on.
<i>Security Consultants</i>	means you who enters into Professional Services Engagement contracts with 3rd parties as part of their defined business offerings and as a material part of their day to day business.
<i>Scan</i>	means the act of, through automated or manual means, examining computer software for security vulnerabilities.
<i>Scanning Machine</i>	means the number of named physical machines that are running the software.
<i>Server</i>	means any designated computer system in which an Instance or Instances of the software is installed
<i>Static Code Analysis</i>	means analyzing software source code, bytecode, or object code to find security vulnerabilities.
<i>Use</i>	means to install, store, load, execute and display one copy of the software.
<i>User</i>	means a user whose use is restricted to the type of software that is being licensed.
<i>Term License to Use or Term LTU</i>	means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M), One Year (1Y) etc. Term LTU's are not perpetual licenses.
<i>Unlimited or Unl</i>	means without restriction in terms of number of systems, devices or media, depending on the context.
<i>Virtual Machine(s) or VM(s)</i>	means a computer that does not physically exist but is simulated by another computer.
<i>Web Application Vulnerability Assessment</i>	means the act of, through automated or manual means, examining web based or web delivered computer software for security vulnerabilities.

Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this additional license authorization (as listed on the first page under Product use authorizations) and not covered in this section do not have software specific license terms.

HP Fortify Computer Based Training software

The Computer Based Training software is licensed by training module in the following ways:

- CBT Seat license:
 - The CBT Seat License is a perpetual or Term license for an individual to use a specific CBT module, e.g., a user with 2 modules is 2 Seats; 2 users with 3 modules each is 6 Seats.
 - A CBT Seat license cannot be reassigned after an individual uses the CBT module
- Enterprise license: no internal usage limits for you.

If you choose to host the modules on their own Learning Management System (LMS), they will be obligated to provide the sales representative a periodic usage report upon request.

HP Fortify Governance

HP Fortify Governance Base: Includes a license for ten (10) Projects. The HP Fortify Governance User license is required for each User authorized to customize process templates for use with HP Fortify Software Security Center.

HP Fortify Real-Time Analyzer

HP Fortify Real-Time Analyzer (RTA) requires one RTA Server license for each physical Server running one or more protected applications in a production environment. One RTA User license is required for each User authorized to configure and administer RTA on the licensed RTA Servers.

HP Fortify Static Code Analyzer

HP Fortify Static Code Analyzer (SCA) Scans a code base, produces results, and stores those results in a Fortify Project Report (FPR) file. A Project is a unique code base, upon which you choose to perform a Scan using HP Fortify SCA and generate an FPR file. Every unique code base that is Scanned is considered to be a Project. . A separate license for each Project is required. Project licenses cannot be reused or reassigned. The definition of a Project is independent of how the operator chooses to initiate a HP Fortify SCA Scan: from Fortify SCA Audit Workbench, IDE Plug-In or part of a build process.

HP Fortify Static Code Analyzer Build to Order Starter Edition: Includes a license for one (1) Software Security Center, one (1) Scanning Machine, one (1) Power User, and thirty (30) Projects.

HP Fortify Static Code Analyzer Build to Order Starter Edition without Software Security Center: Includes a license for one (1) Scanning Machine, one (1) Power User, and thirty (30) Projects.

HP Fortify Static Code Analyzer Flexible Deployment Plan: Includes unlimited usage for the term of the license of HP Fortify Software Security Center, HP Fortify Static Code Analyzer, Audit Workbench and IDE plug-ins to scan code written by Named Contributing Developer licenses. This licensing arrangement is based solely on the number of Named Contributing Developers that are authorized to contribute code to the projects to be scanned by HP Fortify Static Code Analyzer. It is not based on the number of people using the software. A Named Contributing Developer license is required for the maximum number of software developers that contributes to the code base of a Project at any given time; therefore, a Named Contributing Developer license reflects a maximum capacity of developers contributing code to the Projects and is not assigned to a specific named developer. Developers may transfer in and out of the Project without impacting the licenses as long as the maximum number of contributing developers does not exceed the number of Named Contributing Developer licenses. Code contributed by developers not included in the licensed number of Named Contributing Developers is not authorized to be scanned by the software.

HP Fortify Static Code Analyzer Lines of Code Plan: Includes Unlimited usage of HP Fortify Software Security Center, HP Fortify Static Code Analyzer, Audit Workbench and IDE plug-ins to Scan code licensed under the plan. The number of Lines of Code authorized under this plan is based on the aggregate number of lines of software source code before compilation in all Projects to be Scanned. The Lines of Code should be counted by an industry standard method for counting Lines of Code.

HP Fortify Software Security Center Server: Every individual authorized by you to use the HP Fortify Software Security Center Server for any purpose must be a licensed User through one of the following license plans: Build to Order, Flexible Deployment or Lines of Code. In the Build to Order plan, either a Regular User or a Power User license is required for any individual that uses the Server for any purpose, including but not limited to viewing results and reports, managing Projects, Scanning Projects, managing Users, or accessing the collaboration module. In the Flexible Deployment or Lines of Code plans, any individual authorized by you is able to use the HP Fortify Software Security Center server, but only for licensed Projects. HP Fortify Governance Projects and HP Fortify Governance Users authorized to customize process templates are licensed separately and are not included by default in any of these license plans.

Additional license terms

The software described in this Additional License Authorization ("ALA") is governed by the agreement set forth on the quote for the order referencing this software. The terms of this ALA shall govern delivery of the software and specifically take precedence over any different terms in such agreement to the extent of a conflict.

Term	
A.	Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties.
B.	You shall install and use the software as authorized in the applicable agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the Supporting Material, specifications or an applicable agreement.
C.	Unless stated otherwise, you are authorized to Use one Device at a time for your Internal Use
D.	Any licensing terms designated as being of Fortify that may be embedded in the software are inapplicable in their entirety.
