Foreword

AssetCenter version 4.1.1 is a maintenance release that corrects an important number of bugs.

For late-breaking information that could not make it to this document or inside the AssetCenter documentation, please refer to the **Readme.txt** file located in the AssetCenter installation folder.

1 | What's in these Release Notes?

CHAPTER

These Release Notes include:

- Notes on related documentation, including a compatibility matrix.
- A partial list of new functionality added in this version.
- A list of bugs corrected between the 4.0.0 version and the 4.1.1 version.
- Contact details for further assistance.

2 | Related documentation and compatibility matrix

CHAPTER

Related documentation

AssetCenter 4.1.1 is provided with the following documentation:

- Installation
- Migration
- Concepts and implementation
- Differences between version 3.x and version 4.x
- Using AssetCenter
- Core Tables
- Catalog
- Portfolio
- Procurement
- Contracts
- Financials
- Cable and Circuit
- Administrating the database

- Advanced use
- Bar-code inventory
- Programmer's Reference
- Physical Data Models

The whole of this documentation is available in the following formats:

- Online help in **chm** format (standard Windows 32bit online help), accessible directly from the application,
- A version in Adobe Acrobat format. To view these files in the best possible conditions, we recommend downloading and installing Acrobat Reader version 5.x, which is freely available for download at the following address:

<http://www.adobe.com/products/acrobat/readstep.html>

There is also:

- An online help on scripts and functions, the contents of which is similar to the **Programmer's Reference**. This on-line help is available in script builder windows only. You can access it by pressing **F1**.
- An online help on the structure of the database. This help is not directly accessible from AssetCenter. To consult this, open the **dbstruct.chm** file located in the **doc\chm** folder of the AssetCenter installation folder.
- Contextual help for fields and links in the database. Go to a field or a link. You can either:
 - Press **Shift+F1**,
 - Right click the field and then select **Help on this field** from the contextual menu

 **Note:**

The AssetCenter 4.1.1 online help is provided as a compiled HTML help file (**.chm**). To use it, Internet Explorer version 4.01 or higher must be installed. Please, consult the FAQ from the Microsoft Web site:

<http://office.microsoft.com/downloads/2000/hhupd.aspx>

Full documentation for AssetCenter 4.1.1 can also be downloaded from the Peregrine Systems support site, at the following address:

<http://support.peregrine.com>.

You will need the current login and password to access this page.

You can also order printed copies of the documentation through your Peregrine Systems sales representative.

Compatibility Matrix

A compatibility matrix, which identifies the hardware and software requirements for using AssetCenter 4.1.1, is also available on the Customer Support Web site at: <http://support.peregrine.com>

You will need the current login and password to access this page.

3 | Overview of new functionality

CHAPTER

AssetCenter 4.1.1 includes important corrections. The following list includes new features added in previous releases.

History - Version 4.1.0

- Significant improvements to database editing functions: support of hierarchic tables, features, monetary fields, etc.
- Dedicated screens for certain portfolio items: computers, telephones, etc.
- Full support of migration from an earlier version of AssetCenter.
- Tool dedicated to migrating the database: Peregrine Script Analyzer.
- Unix support in non-graphic mode.
- Support of the following seven languages for the graphical interface and the documentation: English, French, German, Italian, Japanese, Polish and Spanish.
- Improvements to the chargeback module.

- The Log Viewer - a tool to consult logs - is now provided with AssetCenter.

History - Version 4.0.0

- Catalog management
- Extended management of portfolio items: Telephony, computers, etc.
- Database customization: Add new fields, links, etc.
- Customization of screens: Ability to create your own screens to manage specific information,
- Redesign of procurement cycle
- Functional rights: Ability to restrict access to the database according to your own custom functional groups. You can limit access to a subset of functional areas by user.
- Chargeback functionality,
- In-depth budget management,
- Comprehensive cable management,
- AutoCAD integration,
- Integration with other Peregrine Systems products: InfraTools Remote Control, InfraTools Desktop Discovery, Knowlix, Remedy Service Management, etc.

4 Summary of corrected bugs

CHAPTER

The following table summarizes the bugs corrected in AssetCenter 4.1.1.

This table contains the following columns:

- Bug number. If you know the bug's number (or the number of the new function) that you want to find, you can quickly identify it that way using this table.
- Description. A brief description of the bug or new function.

Version 4.1.1

Bug number	Description
AM64165951	Improvement to the Purchase-request-creation wizard.
AM6417657	The Purchase-request-creation wizard must also expose the list of models without its associated brand.
AM6417829	Improvement of the Purchase-request-creation wizard when used from an order.
AM6417944	Improvement of the Receiving wizard: Certain information - such as the receiving slip number - has been added.
AM64171052	Improvement of the Invoice-creating wizard.
AM64171447	The wizard is no longer contextual, and it opens the newly created request.
AM517141713	You cannot create an invoice from a request.
AM6417225	Problems with the syntax of the wizards' language (PARAMS node).
AM6417432	Changing the request screen to creation mode without being able to cancel.
AM6417532	In the Tracking tab (procurement cycle), the orders/estimates in preparation are not displayed.
AM522121958	The contract uses do not work.
AM64171259	The accounting code is not displayed in the models screen.
AM527152350	The creation of a new record does not empty all the fields but keeps the values of the previously selected record.
AM51310576	The Portfolio link going from the amAsset table does not work correctly when it is referenced in a script (default value, mandatory, etc.).
160435.a	General tab is empty.
160435.b	Application tab is not visible in the Computers screen.
160435.c	Screen customization: The tabs added to the screen do not appear in the other screens that display the modified screen in the detail (such as amComputer).

Bug number	Description
AM531191423	Customization: If a 1-n link is added and a page exposes this link's information, an error message is displayed when the table is opened.
AM515134940	Datakit information is not taken into account in the migration process.
AM66121547	Cannot create the detail forms.
AM66135631	Problem creating expense lines.
AM6613592	Problem buiding certain commands (created with a command-building wizard).
AM411134322	Missing access rights for the extension of a web application.
AM6491025	Problems updating a field.
AM619101231	Cannot create a page without a name (screen creation).
AM415173847	Problems in the migration tool inferface.
AM5381451	You cannot diagnose or repair a 4.0.0 database in AssetCenter Database Administrator 4.1.1.
AM617143127	When you duplicate a screen, the value of the new screen's functional domain is forced (Portfolio).
AM617144122	SDU failure on tables with hierarchical structures.
AM617143340	Cannot add a link whose users type is "Comment" to a page.
AM61714393	Modification of a table name's letter case during its creation.

History - Version 4.1.0

Bug number	Description
AM4316737	The AssetTag field is not properly propagated.
AM21115280	You cannot add an OwnCopy type link to a tab.
AM61513817	Returned assets have an erroneous acquisition status.
AM64163334	A problem occurs when repairing the database (broken links).
AM21492546	Incomplete data rollback (in AssetCenter Database Administrator) when an error arises during the update.
AM319105316	Default values are not propagated between the table of requests and the table of orders.
AM319141114	General protection fault during operations on products having a unit.
AM37182657	Received quantities do not conform to ordered quantities.
AM31174257	The AmCreateReturnFromReceipt() function does not work correctly.
AM312152116	Cannot create monetary fields when editing the database.
AM9139525	A problem occurs when replenishing assets under a lease contract. The rents and the rates are not correctly propagated to the assets under contract.
AM211151036	General protection fault if the Relevance of a system button is set to No .
AM22091349	A problem occurs when creating a new field whose SQL name starts with a number.
AM1123111915	The database-connection screen appears too small in Windows XP.
AM1149443	No log files are saved during the import.

5 | Contact details for further assistance
