

HP Data Protector A.06.1x Network attached storage (NAS) support matrix

Version: 4.1

Date: March 2012

Data Protector has comprehensive support for NAS devices. Two main categories of NAS devices supported by Data Protector are HP and non-HP. On the HP NAS devices, Data Protector uses its native agents, which makes it the most efficient backup and recovery application with these devices, while on non-HP devices; Data Protector supports the industry standard NDMP protocol.

Various Data Protector components are supported on HP NAS devices which are Windows based. Data Protector uses its native Windows agents for backup and recovery using these devices. These agents can be remotely or locally installed on these devices. The documentation for various Data Protector Windows agents applies to the supported Data Protector components on NAS devices.

The following table presents details of the supported HP NAS devices:

Support HP Network Attached Storage (NAS) devices					
NAS Type ¹	Data Protector Component				
	Cell Manager	Installation Server	Disk Agent	Media Agent	Cluster
NAS 500s	supported	supported	supported	supported	supported
NAS 1200s	supported	supported	supported	supported	n/a
NAS 1500s	supported	supported	supported	supported	supported

---------------------------------------	---------------	---------------	-----------	-----------	-----------

- ¹ For supported devices, please see the HP Data Protector A.06.1x Device Support Matrix. Only those devices that are supported by the respective NAS device and are also listed in HP Data Protector A.06.1x Device Support Matrix are supported.
- ² Includes support for all sub-models, for example, Ext. SATA Model, Ext. SCSI Model, SAN Storage Model and so on
- ³ Please be aware that the X9000/X9300/X9320/X9720 is not a Windows product. Logically they all are Linux products. Cell Manager and Installation Server components are NOT supported.
- ⁴ Support for X9000 Fusion File System is supported with the following patches:
PHSS_41802/ PHSS_41803/ DPLNX_00141/DPSOL_00435

Data Protector also supports major non-HP NAS applications based on the industry standard NDMP protocol. There is a special NDMP Media Agent in Data Protector, that addresses the special backup and recovery needs of these NDMP based NAS applications. However, please note that Data Protector AES Encryption and key management features are not available for NDMP Media Agent.

The supported operating system "Windows Server 2003" includes support for all editions of Windows Server 2003 and Windows Server 2003 R2 including Windows Unified Data Storage Server where applicable.

¹ For supported devices, please see the device support matrices of the respective NAS vendors. Only those devices which are supported by the respective NAS vendors and are also listed as supported in the HP Data Protector A.06.1x Device Support Matrix are supported.

² Due to the supportability issues, Data Protector only supports the following ONTAP versions:
For ONTAP 7.0.1.R1 Stream - 7.0.1R1P7D7 and for ONTAP 7.0.1.1 Stream - 7.0.1.1D4.

³ The following exceptions are not covered by the certification for ONTAP 7.2.2 and 7.2.3: DDS, Recursive DAR support and 3 way backup and restore.

⁴ Supported with Data Protector 6.11 only.

⁶ This feature is supported with following patches:

DPWIN_00506/PHSS_41962/PHSS_41963/DPSOL_00446/DPLNX_00152

DPWIN_00502/PHSS_41954/PHSS_41955/DPSOL_00442/DPLNX_00148

⁷ These Devices should be configured as NetApp.

⁸ NDMP Media Copy feature is supported with Windows x64 Cell Manager using the Site Specific Patches: SSPNT611_043 and SSPLNX611_031.

⁹ NDMP Media Copy feature is supported with Windows x64 Cell Manager using the Site Specific Patch: SSPNT611_051.
