Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

<http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Support

Visit the HP Software Support Online web site at:

<http://www.hp.com/go/hpsoftwaresupport>

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

To find more information about access levels, go to:

http://h20230.www2.hp.com/new_access_levels.jsp

VP of Applications Content Acceleration Pack

The VP of Applications is responsible for developing, growing, and maintaining an organization's portfolio of business software, integration technologies, and application disciplines to drive effective business outcome. The VP of Applications/Application Owner's role has become more strategic to the business, because every line of business relies on applications.

The purpose of the VP of Applications Content Acceleration Pack (CAP) is to provide a set of items (Dashboard pages, Scorecards, Contexts, KPIs, and more) that automatically gathers information from across your enterprise to build key performance indicators (KPIs) related to VP of Applications-related issues. The CAP provides broad and deep insight that should enable you to:

- Reduce the cost of application development.
- Justify the investments.
- Provide explanations for project's delays.
- Provide explanations for application failures in production.
- Analyzing why applications are not meeting business requirements.
- Find the vendors with the best performance.
- Balance available resources with business demands.
- Be faced with the inability to quickly respond to the needs of the business.
- Be faced with the inability to deliver secure applications

If the applications are not aligned with the business, there is no innovation, users go to competitors, and business revenues decline.

The use case for this Content Acceleration Pack is to provide a 360 Degree Application View.
