In This Version

This document provides a description of changes and last-minute information made to HP Select Federation for Release 7.00.

This release of Select Federation includes the following new features:

- Support for a Federation Router
- Multiple Event Plugins support
- Integration with the following connectors: Oracle COREid, SPML and Windows Kerberos
- Support for ID-WSF 2.0 and CardSpace 1.0
- OCSP support
- New Installer using InstallAnywhere
- Support for HP-UX Itanium 11.31
- Various bug fixes

Documentation Updates

The first page of this release notes document contains the following identifying information:

- Version number, which indicates the software version.
- Publish date, which changes each time the document is updated.

To check for recent updates or to verify that you are using the most recent edition, visit the following web site:

http://ovweb.external.hp.com/lpe/doc_serv/

NOTE: To view files in PDF format (*.pdf), Adobe Acrobat Reader must be installed on your system. To download Adobe Acrobat Reader, go to the following web site:

<http://www.adobe.com/>

Installation Notes

Installation requirements, as well as instructions for installing Select Federation, are documented in the *HP Select Federation Installation Guide* provided in Adobe Acrobat (.pdf) format. The document file is included on the product's CD media as:

/docs/install.pdf

After installation the Installation Guide can be found at:

`$SF_HOME/docs/install.pdf` (UNIX) or `$SF_HOME\docs\install.pdf` (Windows)

Software and Hardware Requirements

The OpenLDAP v2.2.23 directory server is now supported by Select Federation. For a complete list of all hardware and software that is supported by Select Federation, see the “System Requirements” chapter in the *HP Select Federation Installation Guide*.

Installation Problems

[QXCR1000376278: Untrusted Directory Server Certificate](#)

While installing Select Federation, if you want to connect to your Directory Server using LDAP over SSL, and the Directory Server certificate is not from a trusted CA, then the Installer cannot connect to the Directory Server. A warning dialog will ask you to import the CA into the Select Federation trust store after installation.

Workaround

- Ignore the error during installation, and follow the instructions to add a new CA to Select Federation after installation. For more information, see the “Troubleshooting Select Federation” problem, “The Select Federation installer reported an issue with the directory server SSL certificate. How do I fix this?” in the Troubleshooting chapter of the *HP Select Federation Configuration and Administration Guide*.
- If you configured Select Federation to use Active Directory (AD), you need to manually specify a value for the `ldapUserBaseDN` attribute in the Select Federation configuration file

(`tfscfg.properties`). You can set the value of this attribute to be the `rootDSE` of your AD installation (for example, `DC=domain, DC=dom`). However, if your AD installation is fairly complex, it is recommended that you specify the exact value of the base DN against which your users will be authenticated. For additional information, see the “Performance and Reliability Considerations” section in the *HP Select Federation Installation Guide*.

Known Problems, Limitations, and Workarounds

QXCR1000450238 : User asked to consent more than once for attributes in PM enabled Router install

In a Federation Router deployment with Privacy Manager enabled at the Federation Router, users may be prompted for attribute consent more than once if they set “Remember my decision” to “No” on the consent page.

Documentation Errata

The HP Software Product Manuals web site, http://ovweb.external.hp.com/lpe/doc_serv/ is changing. Your HP Passport login may be required to enter this site. See “Support” for HP Passport registration information.

Integration with Other HP Software Solutions

Select Federation 7.0.0 can be integrated with the following components of the HP Software suite of identity management products:

- HP Select Access 6.1 SP3 and 6.2 Patch 1
- HP Select Audit 1.02
- HP Select Identity 4.12

Support

You can visit the HP Software support web site at:

<http://www.hp.com/go/hpsoftwaresupport>

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online software support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support site to:

- Search for knowledge documents of interest

- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require an active support contract. To find more information about support access levels, go to the following URL:

http://h20230.www2.hp.com/new_access_levels.jsp

To register for an HP Passport ID, go to the following URL:

<http://h20229.www2.hp.com/passport-registration.html>
