Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent software updates: <https://softwaresupport.hpe.com/patches>.

To verify that you are using the most recent edition of a document, go to: <https://softwaresupport.hpe.com/manuals>.

This site requires that you register for an HPE Passport and sign in. To register for an HPE Passport ID, go to: <https://hpp12.passport.hpe.com/hppcf/login.do>.

Or click the **Register** link at the top of the HPE Software Support page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HPE sales representative for details.

Support

Visit the HPE Software Support Online web site at: <https://softwaresupport.hp.com>

This web site provides contact information and details about the products, services, and support that HPE Software offers.

HPE Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HPE support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HPE Passport user and sign in. Many also require a support contract.

To register for an HPE Passport ID, go to:

<https://hpp12.passport.hp.com/hppcf/createuser.do>

To find more information about access levels, go to:

<https://softwaresupport.hp.com/web/softwaresupport/access-levels>

HPE Software Solutions Now accesses the HPESW Solution and Integration Portal Web site. This site enables you to explore HPE Product Solutions to meet your business needs, includes a full list of Integrations between HPE Products, as well as a listing of ITIL Processes. The URL for this Web site is <https://softwaresupport.hp.com>.

About this PDF Version of Online Help

This document is a PDF version of the online help. This PDF file is provided so you can easily print multiple topics from the help information or read the online help in PDF format. Because this content was originally created to be viewed as online help in a web browser, some topics may not be formatted properly. Some interactive topics may not be present in this PDF version. Those topics can be successfully printed from within the online help.

Storage Optimizer Release Notes

Software version: 5.2

Publication date: March 2016

This document is an overview of the changes made to Storage Optimizer. It contains important information that is not included in books or Help. You can find information about the following in this document:

- [New Features in this Release](#)
- [Fixed Defects in this Release](#)
- [Limitations in this Release](#)

New Features

The following new features are available with the 5.2 release:

- Support for HTTPS connections to the ControlPoint / Storage Optimizer application.
- Support for IDOL 11.
- Exchange and SharePoint connectors have been upgraded to version 10.11
- Added Delete action as a phase for content archived using the File System Agent
- Added a new security role
- Introduced minor GUI changes for enhanced usability

Fixed Defects in this Release

- Consolidated log directories for the File System Agent.
- Updated the filesystem connector to enforce security.
- Any cases of repository delete actions that were not being completed are now being completed.
- Incorrect insertion of spaces is now prevented during connector configuration updates.
- Security access error for categories linked to a deleted repository is corrected.
- Fieldtext training not saved correctly during category training is corrected.
- Filtering associated with the identification of Trivial documents in a potential set is corrected.
- Updated the tool tip associated with the Boolean training rule to suggestion lowering the category threshold for better results.

Limitations in this Release

- When configuring IIS to support SSL, only the Storage Optimizer and DataAnalysisService applications registered in IIS will make use of SSL. The remaining applications CPWS, Category and CallbackHandler will continue to communicate through HTTP. These applications will be updated to support SSL in a future Storage Optimizer release.

Send Documentation Feedback

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

Feedback on Release Notes (Storage Optimizer 5.2)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to autonomytpfeedback@hpe.com.

We appreciate your feedback!
