

# Additional License Authorizations

For HP Cloud Automation and Management Center software products

The software described in this Additional License Authorization (“ALA”) is governed by the agreement set forth on the quote for the order referencing this software. The terms of this ALA shall govern delivery of the software and specifically take precedence over any different terms in such agreement to the extent of a conflict.

## Product use authorizations

This document provides Additional License Authorizations for the following software products in the Cloud Automation and Management Center of HP’s IT Performance Suite software:

Products	Suites
HP Cloud Service Automation	HP Cloud Service Automation for Matrix Suite
HP Cloud Service Automation Dynamic Workload Management	HP Cloud Service Automation Enterprise Suite
HP Continuous Delivery Automation	
HP Database & Middleware Automation	

## Definitions

Capitalized terms not otherwise defined in this Additional License Authorizations document are defined in the governing agreement.

<b>Term</b>	<b>Definition</b>
<i>Application Server</i>	means software that can be deployed standalone or clustered and has the sole purpose of acting as a container that hosts and executes one or more applications. Application Servers are typically J2EE application servers or .Net application servers.
<i>Application Type</i>	means software solution designed to help users perform specific tasks. Examples of Application Types include portals, financial management systems, retail POS software, human and customer relationship management software etc. The Application Type can consist of one more individual programs including Databases, Application Servers and the infrastructure on which the platform and application run. Every Application Type can have multiple versions which don't add to the Application Type count.
<i>Database</i>	means a container which stores application data including table structure, stored procedures, and other functionality that runs on a Database Instance.
<i>Database Instance</i>	means a software application that has the sole purpose of acting as a container that hosts and executes one or more Databases.
<i>Device or Dev</i>	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.
<i>E-LTU and E-Media</i>	means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on Your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<i>Foundation or Foundation Server</i>	means the server side component of software that is required in order to get an operational Implementation as specified in the software specific license terms below.
<i>Implementation</i>	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
<i>Instance</i>	means each Implementation of the application installed on a Server.
<i>Internal Use</i>	means access and Use of the software for purposes of supporting your internal operations or functions.
<i>LTU</i>	means License To Use.
<i>Managed Entity or Mgd Enti</i>	means an addressable entity such as an operating system, middleware Instance, Database or application as specified in the software specific license terms below .
<i>Operating System Instance or OS Inst or OSI</i>	means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle ®/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
<i>Points</i>	means the numerical tracking system representing the total number of metrics you are authorized to execute.
<i>Server</i>	means any designated computer system in which an Instance or Instances of the software is installed.
<i>Solution Pack or SolPk</i>	means software that is imported into HP Database & Middleware Automation that provides specific pre-packaged automation capabilities.
<i>Suite</i>	means two or more software products combined into a single license offering. The specific software products included in a Suite are specified in the Software Specific License Terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product.

Term	Definition
Use	means to install, store, load, execute and display one copy of the software.
Virtual Machine(s) or VM(s)	means a computer that does not physically exist but is simulated by another computer.

## Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this additional license authorization (as listed on the first page under Product use authorizations) and not covered in this section do not have software specific license terms.

### HP Continuous Delivery Automation

Each Instance of HP Continuous Delivery Automation requires 1 HP Continuous Delivery Automation per Foundation Server Instance license and the desired number of HP Continuous Delivery Automation per Application Type license. HP Continuous Delivery Automation requires licenses within Development and Test environments as well.

### HP Cloud Service Automation

HP Cloud Service Automation is licensed by Foundation Server for either a pack of 10 Operating System Instances or for an unlimited number of OS Instances.

### HP Cloud Service Automation Dynamic Workload Management (previously called Adaptive Computing Moab for HP Cloud Service Automation)

HP Cloud Service Automation Dynamic Workload Management can only be used and integrated with HP Cloud Service Automation Foundation Server and cannot be used as a stand-alone product. The HP Cloud Service Automation Dynamic Workload Management Media includes multiple product modules including Moab Workload Manager, Moab Accounting Manager and Moab Viewpoint Portal. The license for this product entitles Use of and access to the Workload Manager and Accounting Manager modules. Use of the Moab Viewpoint Portal is restricted to the system administrator functionality only, which includes the ability to create policies and set system configurations. Customer is not allowed to Use Viewpoint Portal “end-user” user interfaces (menus and reports) including the ability to create and submit service requests. You shall install and use the HP Cloud Server Automation Dynamic Workload Management software only as a complete product and may not use portions of such software on a standalone basis separate from the complete software.

### HP Cloud Service Automation for Matrix Suite

HP Cloud Service Automation for Matrix Suite (HP CSA for Matrix Suite) builds on top of HP Insight Dynamics to automate the provisioning and monitoring of software running on HP BladeSystem Matrix hardware. CSA for Matrix Suite requires a separate HP Insight Dynamics license in order to operate with HP BladeSystem Matrix hardware. Includes one LTU for HP Cloud Service Automation for Matrix Suite Integration module, which provides the ability to integrate the CSA for Matrix Suite with HP Insight Dynamics.

## HP Database & Middleware Automation

HP Database & Middleware Automation is licensed by OS Instance or per Solution Pack and Managed Entity.

HP Database & Middleware Automation licensed per OS Instance:

- For the Database Solution Pack a Managed Entity is defined as an Operating System Instance.
- For the Application Server Solution Pack a Managed Entity is defined as an Operating System Instance.

HP Database & Middleware Automation licensed per Solution Pack and per Managed Entity:

- For the Database Provisioning Solution Pack and the Application Server Provisioning Solution Pack a Managed Entity is defined as an Operating System Instance.
- For the Advanced Database Provisioning Solution Pack and the Advanced Database Patching Solution Pack, a Managed Entity is defined as a Database Instance.
- For the Database Compliance Solution Pack, a Managed Entity is defined as a Database Instance.
- For the Database Release Management Solution Pack, a Managed Entity is defined as a Database.
- For the Application Server Release Management Solution Pack, a Managed Entity is defined as an Application Server.

## HP Cloud Automation and Management Center Suite offerings

Suite	Offering includes
HP Cloud Service Automation for Matrix Suite	<ul style="list-style-type: none"><li>▪ 50 HP Server Automation Starter Edition for Patching and Provisioning OS Instance</li><li>▪ 400 HP SiteScope Points</li><li>▪ HP CSA for Matrix Suite Integration</li></ul>
HP Cloud Service Automation Enterprise Suite 10 OS Instance Pack	<ul style="list-style-type: none"><li>▪ 1 HP Cloud Service Automation Foundation Server 10 OS Instance Pack</li><li>▪ 10 HP Server Automation Enterprise Plus OS Instance (excluding Multi-Master and Service Automation Visualizer functionality)</li><li>▪ 10 HP Operations Orchestration Enterprise Orchestrated Node</li></ul>

The HP SiteScope software product is covered in the Additional License Authorizations document for HP Application Performance Management (previously called Business Availability Center) software products. The HP Operations Orchestration software product and the HP Server Automation software product are covered in the Additional License Authorizations document for HP Data Center Automation Center software products.

## Additional license terms

### Term

- A. Unless stated otherwise, you are authorized to Use one Device at a time for your Internal Use.
