

HP Database and Middleware Automation Solution Packs

for Linux, Solaris, Windows, AIX, and HP-UX operating systems

Software Version: 10.00

Support Matrix

Manufacturing Part Number: none

Document Release Date: December 2012

Software Release Date: December 2012

Legal Notices

Warranty

The only warranties for HP products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein.

The information contained herein is subject to change without notice.

Restricted Rights Legend

Confidential computer software. Valid license from HP required for possession, use or copying. Consistent with FAR 12.211 and 12.212, Commercial Computer Software, Computer Software Documentation, and Technical Data for Commercial Items are licensed to the U.S. Government under vendor's standard commercial license.

Trademark Notices

Adobe™ is a trademark of Adobe Systems Incorporated.

HP-UX Release 10.20 and later and HP-UX Release 11.00 and later (in both 32 and 64-bit configurations) on all HP 9000 computers are Open Group UNIX 95 branded products.

Windows® and Microsoft® are U.S. registered trademarks of Microsoft Corporation.

Oracle® is a registered trademark of Oracle and/or its affiliates.

UNIX® is a registered trademark of The Open Group.

Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

<http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign-in. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Support

Visit the HP Software Support web site at:

www.hp.com/go/hpsoftwaresupport

This Web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

To find more information about access levels, go to:

http://h20230.www2.hp.com/new_access_levels.jsp

HP Database and Middleware Automation Solution Packs 10.00 Support Matrix

The HP DMA 10.00 Platform Infrastructure is supported on both physical and virtual servers.

	Windows 2008 R2	Red Hat Enterprise Linux 5, 6 SUSE Linux Enterprise Server 11 Oracle Linux 5	Solaris 10, 11 (SPARC)	AIX 6.1	HP-UX 11iv3 (11.31)

WebSphere 8	Yes	Yes	Yes	Yes	
WebSphere 7	Yes	Yes	Yes	Yes	Yes

HP Database and Middleware Automation (HP DMA) 10.00 Solution Packs require HP Server Automation 9.0x or 9.1x with all available HP DMA hot fixes.

As of the date of the HP DMA 10.00 release, Oracle had not published ASMLib binaries for RedHat Enterprise Linux 6. ASM related workflows are not supported on RedHat Enterprise Linux 6.

* Support for provisioning and discovery only. Microsoft SQL Server 2012 did not have a service packs released; hence, not all functionality of DMA could be verified.
