

Additional License Authorizations

For HP IT Performance Suite Foundation software products

The software described in this Additional License Authorization (“ALA”) is governed by the agreement set forth on the quote for the order referencing this software. The terms of this ALA shall govern delivery of the software and specifically take precedence over any different terms in such agreement to the extent of a conflict.

Product use authorizations

This document provides Additional License Authorizations for the following software products in the IT Performance Suite Foundation product family of HP’s IT Performance Suite software:

Products

HP Discovery and Dependency Mapping

HP Discovery and Dependency Mapping Inventory

HP Enterprise Discovery

HP Universal CMDB

HP Universal CMDB Configuration Manager

HP Universal Discovery

HP Universal Discovery Inventory

HP Universal Discovery for Oracle License Management

Definitions

Capitalized terms not otherwise defined in this Additional License Authorizations document are defined in the governing agreement.

Term	Definition
<i>Agent</i>	means that portion of the software that manages and is required for each physical server, virtual server or container.
<i>Bundle or Bdl</i>	means an offering which includes a Term LTU, Term Support and SaaS.
<i>Composite Configuration Item or CCI</i>	means a leading Configuration Item which is (or will be) under the control of Configuration Management and under which other component or resource CIs are grouped/folded together for the sole purpose of managing their configuration as a single unit. For example, CPUs are part of a host, so the composite CI of a host encompasses the CPUs within its managed configuration. CCIs include, but are not limited to, business services, applications, servers, Virtual Machines, and network devices.
<i>Configuration Item or CI</i>	means a physical, logical or conceptual entity that is part of the environment, has configurable attributes, and is important to the business.
<i>Connector or Conn</i>	means an integration element to a certain software, format or function through use of the HP software product.
<i>CPU</i>	means a system that contains a single central processing unit with a single integrated circuit package with a single discrete processing core.
<i>Device or Dev</i>	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
<i>EC Adapter</i>	means an integration adapter for HP Enterprise Collaboration that allows HP Enterprise Collaboration users to attach application objects to an HP Enterprise Collaboration conversation.
<i>E-LTU and E-Media</i>	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<i>Implementation</i>	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
<i>Instance</i>	means each Implementation of the application installed on a Server.
<i>Internal Use</i>	means access and Use of the software for purposes of supporting your internal operations or functions.
<i>LTU</i>	means License To Use.
<i>Managed Data Repository</i>	means a repository of data that can be a third party product or custom built and provides data about managed resources (for example, computer systems, application software, and buildings), process artifacts (for example, incident records and request for change forms), and the relationships between them.
<i>Managed Server</i>	means a computer system or computer system partition for which a bootable program is installed. Personal computers, primarily serving the use of a single individual are not considered to be a Managed Server.
<i>Operating System Instance or OS Instance or OSI</i>	means each Implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones, within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.

Term	Definition
<i>Server</i>	means any designated computer system in which an Instance or Instances of the software is installed.
<i>Term License to Use or Term LTU</i>	means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month(1M) , One Year(1Y) etc. Term LTU's are not perpetual licenses.
<i>Term Support</i>	means a fixed period support offering that is only valid during the time period of the associated Term LTU.
<i>Transactions per Month or Tx/m</i>	means a request the user initiates in the Automation Risk Visualizer module to assess the risk of executing a HP Operations Orchestration automation flow.
<i>Unlimited or Unl</i>	means without restrictions in terms of number of systems, devices or media, depending on the context.
<i>Use</i>	means to install, store, load, execute and display one copy of the software.
<i>Virtual Machine(s) or VM(s)</i>	means a computer that does not physically exist but is simulated by another computer.

Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this additional license authorization (as listed on the first page under Product use authorizations) and not covered in this section do not have software specific license terms.

HP Discovery and Dependency Mapping Advanced Edition

HP Discovery and Dependency Mapping Advanced Edition is licensed per OS Instance. You are entitled to integrate third party (non-HP) data sources to extend discovery. Server data integrations require one license for each Managed Server to extend discovery. You are entitled to 1 HP Discovery and Dependency Mapping Inventory license for every 1 HP Discovery and Dependency Mapping Advanced Edition OS Instance.

HP Discovery and Dependency Mapping Standard Edition

HP Discovery and Dependency Mapping Standard Edition is licensed per OS Instance. You are entitled to integrate third party (non-HP) data sources to extend discovery. Server data integrations require one license for each Managed Server to extend discovery. You are entitled to 1 HP Discovery and Dependency Mapping Inventory license for every 1 HP Discovery and Dependency Mapping Standard Edition OS Instance.

HP Enterprise Discovery and HP Discovery and Dependency Mapping Inventory

The software shall be restricted to monitoring the number of Devices for the licenses purchased.

The Enterprise Discovery and DDM Inventory Linux Scanner and Agent link to a version of the Linux libc library which is licensed under the Lesser Gnu Public License (LGPL). As required by the LGPL, HP provides you with the right to re-link the scanner and agent object code with a different version of the libc library. As a specific exception to the general restriction on "reverse engineering" of HP's products as described in the agreement, the supplied object files ("scanner.a" and "agent.a") may be reverse engineered using object code inspection and modified to the extent necessary to make the process of linking against a different version of the libc library possible. Versions of the Enterprise Discovery and DDM Inventory scanners and Agents that have been linked with an alternate version of libc may behave differently than the version provided by HP and will not be covered by HP's standard support and maintenance terms.

HP Universal CMDB Configuration Manager Advanced Configuration Analysis

HP Universal CMDB Configuration Manager Advanced Configuration Analysis is licensed per Composite Configuration Item. You are authorized to manage up to 10,000 CCIs per LTU.

HP Universal CMDB Configuration Manager Advanced Configuration Manager

HP Universal CMDB Configuration Manager Advanced Configuration Manager is licensed per OS Instance. A minimum purchase of 100 OS Instances is required. When you purchase Advanced Configuration Manager (available for HP Universal CMDB 10.00), you are entitled to the following advanced functionality: environment segmentation analysis, similarity policies, topology policies, and pre-defined out-of-the-box policies. To leverage this functionality, licensee should license Advanced Configuration Manager for the number of OS Instances in HP Universal CMDB.

HP Universal CMDB Configuration Manager Automation Risk Visualizer

HP Universal CMDB Configuration Manager Automation Risk Visualizer (available for purchase by customers who purchased licenses for Automation Risk Visualizer in HP Universal CMDB Configuration Manager 9.x) includes the ability to perform 500 Transactions at no charge. Additional LTUs can be purchased which each enable 500 Transactions per Month.

HP Universal CMDB Integration Software

When you purchase HP Universal CMDB Third Party Integration Managed Data Repository (MDR) licenses (available for HP Universal CMDB 10.00 and higher), you are entitled to integrate with up to 2, up to 7 or up to 200 third party data repositories depending on the license purchased. You are entitled to integrate with these third party data repositories via data population, push, or federation mechanisms.

When you purchase HP Universal CMDB Integration Managed Server licenses (available for HP Universal CMDB 9.x), you are entitled to integrate an Unlimited number of third party (non HP) data sources limited to each Managed Server license.

HP Universal Discovery

HP Universal Discovery is licensed by OS Instance.

HP Universal Discovery Inventory

HP Universal Discovery is licensed per block of 100 OS Instances.

HP Universal Discovery for Oracle License Management

HP Universal Discovery for Oracle[®] License Management is licensed by Implementation. You are entitled to install HP Universal Discovery for Oracle License Management on a single Instance of HP Universal Discovery.

Additional license terms

Term

- A. Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties.
 - B. You shall install and use the software as authorized in the applicable agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the Supporting Material, specifications or an applicable agreement.
 - C. To the extent this restriction is not prohibited under applicable law, you shall not disclose to any third party the results of (i) any performance benchmarks you run on software products themselves, or any portion thereof, or (ii) specific detailed comparisons you make between software products, or any portion thereof, and any of your or third-party product, in each case under (i) and (ii) without the prior written consent of HP.
 - D. Unless stated otherwise, You are authorized to Use one Device at a time for Licensee's Internal Use.
