

Additional License Authorizations

For Persistent Systems Limited Radia Client Automation software products

The software described in this Additional License Authorization (“ALA”) is governed by the agreement set forth on the quote for the order referencing this software. The terms of this ALA shall govern delivery of the software and specifically take precedence over any different terms in such agreement to the extent of a conflict.

Product use authorizations

This document provides Additional License Authorizations for the following Persistent Systems Limited Radia Client Automation software products:

Products	Suites
PSL Radia Client Automation Enterprise	PSL Radia Client Automation Enterprise PC Application Management Suite
PSL Radia Client Automation Standard	

Definitions

Capitalized terms not otherwise defined in this Additional License Authorizations document are defined in the governing agreement.

Term	Definition
<i>Client Device or CD</i>	means a physical computer system running a client class operating system, including but not limited to Windows XP, Windows Vista [®] , Windows 7, Red Hat Enterprise Linux Desktop, and SUSE Enterprise Linux Desktop. It also means a physical device that runs a client-based hypervisor for client side Virtual Machines running a client class operating system. It does not include a client class computer system, such as a desktop or laptop PC, running a server class operating system.
<i>Device or Dev</i>	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
<i>E-LTU and E-Media</i>	means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<i>Instance</i>	means each implementation of the application installed on a Server.
<i>LTU</i>	means License To Use.
<i>Mobile Device or MobDev</i>	means a Device running an operating system designed for mobile devices such as but not limited to mobile phones, tablet computers and smartphones that typically connect to a network by means of Wi-Fi or cellular data.
<i>Server or SVR</i>	means any designated computer system in which an Instance or Instances of the software is installed.
<i>Suite</i>	means two or more software products combined into a single license offering. The specific software products included in a Suite are specified in the Software Specific License Terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product.
<i>Thin Client Device or TCD</i>	means a physical computer system running an embedded operating system which requires accesses over the network to an application server, web server, or hosted virtual desktop server for its application processing. Embedded operating systems include but are not limited to Windows XP Embedded, Windows Embedded Standard, and Linux.
<i>Virtual Client Machine or VCM</i>	means a Virtual Machine running on a physical machine running a client class operating system, such as Windows XP, Windows Vista, Windows 7, or Linux.
<i>Virtual Machine(s) or VM(s)</i>	means a computer that does not physically exist but is simulated by another computer.

Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this additional license authorization (as listed on the first page under Product use authorizations) and not covered in this section do not have software specific license terms.
