

HP Data Protector 8.00 List of Implemented Enhancements and Resolved Issues

List of implemented enhancements and resolved issues

| Global ID | Summary |
|-------------|---|
| QCCR2A36224 | HP-UX 11.23, DP 6.2, CRS using a lot of memory, possible memory leak. |
| QCCR2A36410 | Session Missing from IDB for MS SQL Restore |
| QCCR2A36618 | Invalid block sequence number: XXXX expected 0. |
| QCCR2A36713 | SSEA stops responding trying to SCSI query ST tape device file name |
| QCCR2A42522 | debug.log filling up with [DynBufOptimizeSize] requested message size: XXXXXX larger than maximum: XXXXXX |
| QCCR2A43473 | Object copy of StoreOnce data throws "cannot open device" error |
| QCCR2A32703 | Consistency check in 6.2 slower than 6.11 |
| QCCR2A34841 | Cannot exclude/filter system reserved partition from backup |
| QCCR2A36124 | Unable to restore to network share which originated from Blue Arc Filer |
| QCCR2A37569 | DP 6.2 0 MB incremental NDMP backup are denoted under Internal Database with status "failed" |
| QCCR2A43537 | IPC Cannot Free Shared Memory Segment |
| QCCR2A31610 | Barcode Scan of Library fails |
| QCCR2A33506 | GUI problem in displaying Russian filenames |
| QCCR2A35461 | DP6.20/VBDA-ECC backup problem/could not connect to Inet in order to start VBDA |
| QCCR2A40574 | Documentation related to importing WORM media to a cell |
| QCCR2A40766 | DP v6.21 EMC support of ICDA with IA 64 |
| QCCR2A43489 | Configured device order not respected with load balancing |
| QCCR2A44926 | VM restore and Connection reset by peer |
| QCCR2A28758 | VEPA Bad catalog access for message #21488 in set 154 |
| QCCR2A31020 | Data Protector Installation service terminated unexpectedly |
| QCCR2A35015 | VMware GRE request catch 22 when Linux was selected |
| QCCR2A35226 | Continuous spike of RDS at 100% on Linux |
| QCCR2A36489 | CS/omnisv/Linux ***** omnisv -start, status, stop fails for uiproxyd |
| QCCR2A39883 | RSM should abort RMA on multiple cleanme requests |
| QCCR2A42069 | File was not backed up in any backup session in the restore chain being consolidated. |
| QCCR2A45077 | Library filter makes no effect on the "List of Pools" report |

| Global ID | Summary |
|-------------|--|
| QCCR2A27865 | SCTL_DisableEncryption() fails while trying to disable encryption on an LTO-4 |
| QCCR2A30640 | NDMP BMA ends abnormally in NdmpMark after 100 media |
| QCCR2A32606 | Command line install to Windows host fails from Linux Cell Manager |
| QCCR2A33908 | Too slow resolving on the R1 side in Solaris ZDB |
| QCCR2A35121 | Trans logs backups not included in point in time recovery after copy of trans session |
| QCCR2A37411 | Oracle crosscheck backup does not cleanup environment variable OB2MAINTENANCE |
| QCCR2A40569 | ***EADR*** of a Domain Controller fails - Cannot write: ([112] There is not enough space on the disk.) |
| QCCR2A42166 | MaWriteBuffer: Position of copy and original tape position isn't equal! |
| QCCR2A43662 | StoreOnce cleanup session displays unwanted critical message |
| QCCR2A45380 | Remote installation to Linux client fails |
| QCCR2A36879 | Data Protector ending abnormally when OMNI_HOSTS variable is set |
| QCCR2A39449 | Omnicc ***** Licensing check shows as non compliant |
| QCCR2A41075 | NDMP NETAPP DP 6.21 NDMP Restore issue |
| QCCR2A27909 | Exporting of encrypted tape does not create key in export directory |
| QCCR2A33742 | Dp 6.11, Win2008R2 The disaster recovery wizard was unable to find "object/drive" backed up. |
| QCCR2A35079 | Exchange VSS Object name display GUID rather than Man Readable name. |
| QCCR2A35570 | Missing of data block detected, expecting block XXXXXX ! |
| QCCR2A36525 | Win 2008 - SPS 2010 VDI, one of the content databases is not being shown in the GUI |
| QCCR2A36772 | VEAGENT restore of second disk fails into directory or GRE |
| QCCR2A36773 | GRE fails to query object versions if vm has versions dating back to 6.11 |
| QCCR2A37344 | MSM ending abnormally // -delete_unprotected_media ***** Strange media session |
| QCCR2A41642 | Cannot open device (StoreOnce error: The object store is not ready) |
| QCCR2A43714 | DPSPi6.2 DP_CheckLongBackup_UX is a cause of OpC30-3404 when No currently running session |
| QCCR2A34995 | sometimes devbra shows the same serial number for tape library and drive |
| QCCR2A35345 | Document of GR patch should be written with correct information |
| QCCR2A36377 | VEAgent silent loss of VMDK descriptor files although available in tmp |
| QCCR2A37077 | After file backup, file access time is not restored to original value |
| QCCR2A38141 | With EXTSHM=OM (for tape spanning backup) on AIX. Oracle backups fail: Oracle control file backup failed |
| QCCR2A39813 | IDB - CM Win2003 32bit - RDS frequently ends abnormally after DP upgrade to 6.20 |
| QCCR2A40004 | Media devices getting re-ordered by the BSM |
| QCCR2A40054 | REPORTING*** SMTP doesn't work after upgrade to 7.0.1 |
| QCCR2A40572 | Documentation needed for DP SharePoint integration on granting user permissions |
| QCCR2A32946 | ZDB/IR Support For VMWare Linux Guest on EVA Storage |

| Global ID | Summary |
|-------------|---|
| QCCR2A36372 | DP 6.11 HPUX 11.23 - Internal DP error |
| QCCR2A38536 | Copy from StoreOnce device to diff device type takes more space than original data |
| QCCR2A41321 | GUI ends abnormally when adding a SQL Server backup specification |
| QCCR2A41601 | Format of a NDMP medium fails with "Invalid physical device type => aborting" |
| QCCR2A42125 | SMTP Reporting not working since upgrade to 6.21 and latest patches |
| QCCR2A42954 | After installing latest patch, Media Agent takes a long time to get COMPLETED after unloading media |
| QCCR2A44579 | Could not connect to cluster node |
| QCCR2A29856 | Change Log Provider not used after Cluster Failover |
| QCCR2A30236 | MA / Devbra segfault on two Linux hosts |
| QCCR2A32609 | BR0376E Unknown file 'g:\oracle\sids\sapreorg\cntrltrx.dbf' restored by backup utility |
| QCCR2A35970 | BSM loops if encounters write-protected tape |
| QCCR2A37159 | NDMP Restore operation has failed |
| QCCR2A27854 | Scheduler option to check for and start missed backups during provided timeframe. |
| QCCR2A29914 | Requests DP Restore GUI context is changed so list file the same as DP Restore GUI context. |
| QCCR2A30293 | SANCONF incorrectly handles short names |
| QCCR2A33127 | [90:161] Cannot write filemark. (Details unknown.) |
| QCCR2A33917 | Inet results in a segfault |
| QCCR2A34319 | The Oracle Check Configuration cannot be performed, because there was an error in omniresolve. Permissions might not be sufficient to run omniresolve |
| QCCR2A34892 | Customer wants Progress percentages in the Session Report |
| QCCR2A36876 | DP 6.2 - IS upgraded from 6.0 fails to update CC component on 11.11/11.23_PA clients |
| QCCR2A38752 | xSM / MMD / OMNICC ***** Wrong Licenses on DP 6.21 Cell Server / Linux kernel 3.x |
| QCCR2A43966 | debug.log: "StrFromUserSessionId: "x.y.z": not in correct format" |
| QCCR2A30343 | "omniforsg.ksh -primary -upgrade" failing with host name lookup failure |
| QCCR2A32364 | Win GUI for the available space reporting as a negative number when it's over 2TB |
| QCCR2A36348 | DP 6.20 CS W2008 / MA-NDMP W2003 // NETAPP NDMP Server, // VTL // Error 12:200 No valid Host Name or Host Not Found. |
| QCCR2A39873 | Cannot traverse: ([3] The system cannot find the path specified.) => not backed up. |
| QCCR2A40185 | License not available "On-line Extension for ONE UNIX system" |
| QCCR2A42345 | vepa_util.exe command with option "--unlock-vmotion" not working on Linux |
| QCCR2A29806 | Data Protector states that DB2 backup succeeds yet nothing is backed |
| QCCR2A30915 | import of encrypted media on target cell failing with error retrieving encryption key |
| QCCR2A35946 | DP 6.2 NDMP Restore with unknown error |
| QCCR2A38115 | 6.21 patch will not install on Redhat Cell server where binaries are on nfs mount |

| Global ID | Summary |
|-------------|--|
| | point |
| QCCR2A38137 | Debug log filling with keycatalog messages during backups |
| QCCR2A40046 | VEAGENT restore of selected disk from full backup reads full backup. |
| QCCR2A40055 | Since the upgrade from P 6.11 to DP 6.20, SNMP traps stopped working in OVU. |
| QCCR2A40580 | Sharepoint BAR agent ends abnormally during restore |
| QCCR2A42143 | Support of ClusterDatabase writer for backup / restore with Microsoft Volume Shadow integration module. |
| QCCR2A43102 | Security issues with the CRS ending abnormally |
| QCCR2A43212 | VE agent backup fails with SOAP 1.1 fault: SOAP-ENV:Client[no subcode] |
| QCCR2A26165 | Request for ability to prioritize backup and copy jobs based on importance |
| QCCR2A29341 | A change in the configuration is found hence instant recovery is not possible. |
| QCCR2A33736 | [Critical] From: BMA Bad message format. |
| QCCR2A36378 | Incorrect varbind sent SNMP traps from Linux Cell Manager |
| QCCR2A36624 | Vcenter VM move disabled by "_DP_VEPA_BACKUP_RESTORE_LOCK_" |
| QCCR2A38024 | text file busy messages on AIX push patch updates |
| QCCR2A39176 | Customer requests fix for QCCR2A29856 - CLP not used after cluster failover |
| QCCR2A39743 | omniiso ending abnormally when using OMNI_HOSTS |
| QCCR2A39744 | problems during creation of VSS backup when there is segregation between backup LAN and production LAN on VSS server |
| QCCR2A40068 | SQL Restores are not working |
| QCCR2A41074 | DP 6.21. Cannot open device (JSONizer command failed [internal error]) |
| QCCR2A42883 | NDMP restore of full directory fails with "DAR restore positionTape: seek failed at offset" message |
| QCCR2A43072 | Data Protector v7.0 remote installation for Gentoo fails. |
| QCCR2A28300 | Since 6.11 upgrade & patches, unnecessary license warnings displayed daily |
| QCCR2A31394 | Performance got worse after update to 6.20 |
| QCCR2A32362 | DP 6.20 SSEA ZDB backup failing when SSEA_CREATE_TEMPFILE_FOR_RESOLVE=1 |
| QCCR2A36698 | AIX DA modification for DirectIO environment |
| QCCR2A42052 | "omnir" CLI does not properly handle "-as" parameter |
| QCCR2A42662 | SQL 2008 Backup compression with ZDB |
| QCCR2A29811 | There is not enough free space in the following disk group to perform a backup for this storage volume |
| QCCR2A31152 | Wake On LAN wait configuration |
| QCCR2A31627 | Notification ***** "StartOf Session" is not logged with Oracle backup. |
| QCCR2A32019 | SAP ZDB backups fail: File System Status set to SMB_OS_ERROR |
| QCCR2A34553 | Lost connection to VBDA |
| QCCR2A35937 | VMWare GRE doesn't list backup versions if Datacenter resides in a folder |
| QCCR2A37154 | heavy IO load on CMMDB server since installing patch-suite + hotfixes |
| QCCR2A38785 | 6.2,, EADR of Win2008 Cluster fails w/ "IOCTL_DISK_GET_DRIVE_LAYOUT_EX reported a disk problem" |
| QCCR2A38795 | Debug.log file flooded with messages when SRD backup is performed. |

| Global ID | Summary |
|-------------|--|
| QCCR2A39784 | DP 6.11 NDMP backup DUMP size 7Tb session reports total backed up 2TB |
| QCCR2A40295 | XP array Instant Recovery (IR) license is not recognized by Backup Session Manager |
| QCCR2A42024 | Restore of virtual machine to NAS data store fails with IPC read error. |
| QCCR2A41645 | StoreOnce Software daemon fails to start |
| QCCR2A44778 | 7.0 Installation media are missing multiple files for OES11 |
| QCCR2A44924 | VEPA agent terminates abruptly |
| QCCR2A28363 | session_errors report does not include warning from Oracle rman |
| QCCR2A29390 | devbra does not correctly recognize drive serial number |
| QCCR2A29812 | GetVSArray Unable to init CSA is logged into debug.log |
| QCCR2A29813 | Internal error in ("ma/xma/rma.c /main/hsl_dp61/hsl_hpit2_2/3":2967) |
| QCCR2A30023 | VM Common Settings keep defaulting to a diff desired value |
| QCCR2A31033 | [OEM]PRI=3/omnimlist fails. |
| QCCR2A32693 | omnidb -catalog output is misleading when done with Log File or Log Directory |
| QCCR2A33741 | Windows Native GUI does not show warning messages in Japanese |
| QCCR2A34837 | OpenVMS post exec procedure does not send output to SM and stops responding |
| QCCR2A36877 | Medium export failed, due to failure in export of encryption keys |
| QCCR2A36878 | omnidb ***** DP 6.21 Output of omnidb -filesearch has truncated columns (ObjName for example) |
| QCCR2A36943 | No data for user USER@DOMAIN in Inet's impersonation configuration. |
| QCCR2A37343 | BMA - Unknown internal error |
| QCCR2A38279 | GUI lists media copy for restore |
| QCCR2A40577 | DP online help is misleading for network shared disk backup on Windows 2008/Vista. |
| QCCR2A40629 | Critical Tape Alert message to be changed |
| QCCR2A43155 | VEAgent Restore of Windows 2008 Virtual Machine (VM) fails for Windows 2008 R2 guest OS. |
| QCCR2A36118 | StoreOnce Deduplication-Consolidation requires a second gateway |
| QCCR2A38941 | DB2 restore is happening more than once if parallelism is greater than one |
| QCCR2A40581 | SRD file contains non critical objects |
| QCCR2A40607 | Documentation related to change log provider and cluster failover |
| QCCR2A42452 | NDMP SnapMirror restore mirrors not broken automatically although SMTAPE_BREAK_MIRROR was set |
| QCCR2A29037 | omnirpt ends abnormally with single_session report containing large messages |
| QCCR2A33727 | Got unexpected close from Filesystem restore DA |
| QCCR2A35763 | Exporting a client results in failed backups when user_restriction file is in place |
| QCCR2A39783 | Unable to restore using GRE in a clustered Vcenter environment |
| QCCR2A40047 | [Installation of client from the GUI displays '[Critical] The cell_info file is probably missing or not accessible.' |
| QCCR2A41646 | Deletion of unprotected media fails with message "StoreOnce error: Bad object key" |
| QCCR2A42348 | Oracle ASM ZDB Integration backup fails with "SP2-0306: Invalid option" error |

| Global ID | Summary |
|-------------|--|
| | message |
| QCCR2A36714 | Guide for DataProtector with ACSLS in firewalled Environments is not available |
| QCCR2A37359 | MMA ***** Medium verification returns "cannot find dalD=1 in the table" or "cannot find dalD=0 in the table" |
| QCCR2A31101 | DP skips some versions of the hotfixes while listing the installed patches |
| QCCR2A34375 | DP 6.2 CS Linux // DLC Collect debug files from GUI does not work on Linux CS |
| QCCR2A35692 | Exchange 2010 backups stops responding in GetExchangeTopology() |
| QCCR2A36703 | 6.20 VBDA ends abnormally during CONFIGURATION backup |
| QCCR2A37924 | Query regarding licensing |
| QCCR2A38441 | RSM ***** Session waiting for busy media is not Queuing *** No mount request on a busy tape for restore |
| QCCR2A40764 | Incorrect number of required On-line Extension Licenses |
| QCCR2A42472 | Exchange 2010 Restore session completes but is marked as aborted |
| QCCR2A33740 | Received ABORT request from RSM (ERR: Media Agent aborted.) |
| QCCR2A34840 | Multiple reconnects during cluster failover give BMA timeout - problem in BSM |
| QCCR2A36790 | Exchange VSS Restores using the incorrect session id to restore from |
| QCCR2A37135 | Copy catalog to MCF does not export catalog when LOG_FILES is used |
| QCCR2A37567 | No data is restored on X9000 Granular NDMP restores |
| QCCR2A37926 | SQL restore fails with : The log in this backup set terminates at LSN 3467000001550500001, which is too early |
| QCCR2A38443 | DP 6.21, Solaris 10 client update, [110:101] Client import failed! |
| QCCR2A40768 | License ***** Single Server Edition License not accepted by Linux CM |
| QCCR2A43422 | Non-existent volumes are shown in DP GUI when file systems are browsed |
| QCCR2A43617 | multiple devbra instances and /tmp/ioscan.out file usage |
| QCCR2A35527 | Creating a unique key for encryption with omnikey tool fails |
| QCCR2A35613 | Tuning parameter MaxCrsConnections missing in global file |
| QCCR2A35968 | BMA reports"Encryption could not be enabled on the drive, session will be aborted." |
| QCCR2A36226 | DP 6.11, omnidbutil -readdb failed for one fnames file, [136:32] Bad import file format in file "fnames.i011-247.bk.fin.local.txt" |
| QCCR2A36769 | VEAgent independent disk make the backup to fail. |
| QCCR2A37131 | Cannot forward block. (Details unknown) (DP6.21) |
| QCCR2A37578 | Oracle archive log backup stops responding |
| QCCR2A39026 | GUI ends abnormally on Windows 7 and Windows XP |
| QCCR2A39216 | After updating to latest GR patches, symbols/icons of AIX clients in DP GUI changed |
| QCCR2A42276 | CS/BSM ***** backup preview fails if one of the hosts is not reachable |
| QCCR2A43660 | Some copied objects show zero size |
| QCCR2A29216 | Restore goes over LAN |
| QCCR2A31500 | Device filter does not work for list bigger than 48 lines |
| QCCR2A32975 | DP6.2 localizations issue – Critical |
| QCCR2A36503 | Offline Oracle ZDB does not start target database after replicas are created but |

| Global ID | Summary |
|-------------|---|
| | after the data is backed up |
| QCCR2A37396 | MS SharePoint Granular Recovery Extension Install problem |
| QCCR2A43092 | No data devices detected when configuring TS3200 + ULT3580-HH5 on AIX - supported? |
| QCCR2A43882 | omnicc reports incorrect licenses for vCenter |
| QCCR2A44423 | new SpectraLogic tape library does not appear to be encrypting |
| QCCR2A29805 | File is shorter than it was when it was opened |
| QCCR2A31455 | Require support for backup and restore of extended attributes on Fusion file system for HP x9000 NAS |
| QCCR2A34997 | After scanning a cartridge it is set to Write Protection= Yes |
| QCCR2A39468 | omnib -select fails with HOST object |
| QCCR2A31422 | [90:188] Medium full. Cannot append. (Medium is full.) |
| QCCR2A31796 | Upgrade of client fails with "the cell _ info file is probably missing or not accessible" |
| QCCR2A32024 | MSM/NDMP ***** MCF files fail to be imported in DP 6.11 and 6.2 |
| QCCR2A33907 | Unable to restore data across cells within MOM environment |
| QCCR2A37162 | Cannot get information on file '/var/opt/omni/tmp/rcvcat22157.exp' Error: 2 |
| QCCR2A37583 | PERFORMANCE / Restore : DP 6.2 Slow Restore on Windows 2008 Storage Server |
| QCCR2A38507 | SAP ***** After the restore with saprest.exe files do not have the time stamp from backup start. |
| QCCR2A41076 | VBDA backup - Volume Shadow Copy Service error: Unexpected error VSS_E_WRITER_STATUS_NOT_AVAILABLE |
| QCCR2A29075 | You have chosen an interval which doesn't include all the sessions needed to compose a full restore chain |
| QCCR2A31016 | CLI / omnicreatedl ***** omnicreatedl fails to create a datalist if multiple hosts with too many filesystems selected |
| QCCR2A32949 | DP doesn't have the ability to change replica ID for maildb (NFS file) during restore of Lotus Domino |
| QCCR2A34344 | DP 6.11 encryption is failing when oracle user is owner of the backup |
| QCCR2A35463 | DP 6.2 license TD590AA doesn't work on Data Protector (HP-UX)- B6951AA |
| QCCR2A35972 | After upgrade to 6.20 DP is not able to start the PC with the magic packet |
| QCCR2A40758 | DP v6.21 Virtualization integration performs backup of incorrect resource pool |
| QCCR2A34383 | BMA-NDMP ends abnormally during backup |
| QCCR2A36620 | Error receiving catalog data from the BMA - introduced on 8 sites after installing b621 |
| QCCR2A36626 | NDMP component does not delete nor update .patch_ma |
| QCCR2A36975 | Script execution timed out => aborted by the Session Manager |
| QCCR2A44638 | Instant Recovery Fails due to problem with ASM instance |
| QCCR2A44945 | This backup will not start because the P9000 XP Disk Array Family license is not available. |
| QCCR2A29389 | Cannot open device (IPC Read Error) |
| QCCR2A29392 | VSS warnings "The process cannot access the file because it is being used by another process" |

| Global ID | Summary |
|-------------|--|
| QCCR2A31600 | A session report containing UMA messages does not display correctly in a Japanese environment |
| QCCR2A32366 | 6.11 winomnimigrate.pl fails with errors |
| QCCR2A32368 | GUI does not produce warning pop-up when a non-existent filesystem is manually added to the backup spec |
| QCCR2A35350 | GUI displays "You have attempted to show all available nodes for the database (Oracle) that is not ..." when ECC turned on |
| QCCR2A35945 | SSPNT620_008 introduces a problem when browsing a VEAgent restore directory |
| QCCR2A32625 | Doc: VEPA backup session does not report error which is encountered by VC |
| QCCR2A37100 | No ACSLS Support on Linux x32/x64 |
| QCCR2A40182 | OB2BLKPADDING_xx parameter is not read correctly |
| QCCR2A41323 | License ***** MoM can't feed licenses to client/PP |
| QCCR2A33061 | Truncated SNMP traps are sent by SUSE 11 Linux DP 6.11 Cell Manager |
| QCCR2A33913 | DP 6.2 Enabling Encrypted Control Communication - cannot enable for >35 clients |
| QCCR2A34002 | ITRC_SW: Configurazione Libreria Quantum |
| QCCR2A36880 | Global Variables do not carry over on upgrade |
| QCCR2A37157 | CRS stops responding ***** Non responding cell manager service after use of omnichk -patches utility. |
| QCCR2A40067 | A logical volume was not found within the volume group. |
| QCCR2A40471 | GRE restore is failing with "claims based authentication" mode |
| QCCR2A40756 | Cannot open: ([0] The operation completed successfully.) => not restored. |
| QCCR2A42307 | VE Agent log contains ambiguous messages |
| QCCR2A42568 | Cannot write to device (StoreOnce error: CLIENT_DATA_SESSION_IN_ERROR_STATE) |
| QCCR2A45238 | Size of restored file does not match the size of file at backup time |
| QCCR2A27898 | Backup does not complete |
| QCCR2A29306 | User preferred PVG 'XXX' is not available for replication. |
| QCCR2A30877 | GUI Search Interval does not allow for Daylight Saving time |
| QCCR2A32610 | Failed to attach to the command device |
| QCCR2A33370 | Backup reports SRD information could not be collected |
| QCCR2A37053 | DB2 re-direction restore to another instance not working. |
| QCCR2A37097 | AMDR does not restore user.dat registry files |
| QCCR2A38442 | 6.11 SUSE 11 SP2 Linux remote installation fails with error "Unsupported architecture/OS type" |
| QCCR2A38526 | Sanconf utility does not work anymore if encryption is enabled. |
| QCCR2A38938 | MMA stops responding if reading from write protected media |
| QCCR2A32691 | Event log filled with "Not enough Free Media" |
| QCCR2A33362 | Object copy error "Wrong parameter(s) for message 222,00 in set 157, error: 87" |
| QCCR2A34401 | Session stops responding after canceling mount request. |
| QCCR2A34755 | VBDA ends abnormally during CONFIGURATION backup since upgrade to 6.20 |

| Global ID | Summary |
|-------------|---|
| QCCR2A36304 | DP 6.2 Volume shadow copy "not a valid mountpoint" |
| QCCR2A36707 | DP 6.11, WORM media, Error 90:51 ? Cannot write to device [13] Permission denied, write-protected cartridge. |
| QCCR2A37212 | NDMP/CORE ***** Unable to restore file from previous backup ***** |
| QCCR2A38281 | VBDA ***** After upgrade to 6.21 NFS mountpoints backed up as local mountpoints |
| QCCR2A38371 | SANCONF ***** (24) dp6.11 Sanconf bug |
| QCCR2A39028 | Got unexpected close from Filesystem restore DA on |
| QCCR2A39122 | Consolidation job continue to completion even when "corrupt" media encountered |
| QCCR2A40767 | Backup preview fails with "IPC Cannot Allocate Shared Memory Segment" |
| QCCR2A42050 | Restoration of ZDB SQL 2008 failed by SQLSTATE:[42000] CODE:(3271) |
| QCCR2A42299 | Virtualization Environment agent debugs contain email address |
| QCCR2A42693 | mmd keeps consuming memory indicating a memory leak |
| QCCR2A43124 | Header of "List of Sessions" reports created with wrong time format |
| QCCR2A43356 | During Restore from ZDB VSS Volumes (file system backup), a single file restore is not possible with direct positioning to the data segment |

| QCCR2A42129 | Oracle backup fails with '[61:2052] Bar backup session was started but no client connected in <number> seconds.' |
| QCCR2A31032 | The notifications file is being overwritten after patch update |
| QCCR2A31305 | DP6.20 problem with ACSLS access control |
| QCCR2A33366 | "Look up Schedule" not reporting Schedule Time |
| QCCR2A35462 | BSM ends abnormally after parsing OMNI_HOSTS setting |
| QCCR2A35536 | Omniobjcopy limits number of arguments |
| QCCR2A37165 | SAPREST reports "Aborting connection to RSM. Abort code -6. |
| QCCR2A38460 | GUI ***DP 7.0 used media is not listed in DP GUI Internal Database Session properties |
| QCCR2A39516 | Install of 6.21 patch bundle should not be checking status of mmd when it is using CMMDB on MOM server |
| QCCR2A42913 | ZDB backups fail with "Cannot find command device." |

| Global ID | Summary |
|-------------|---|
| QCCR2A44003 | Random error : (StoreOnce error: Bad object key) |
| QCCR2A44534 | Upgrade of MoM server configured with Service guard cluster fails with "cmviewconf: not found" message |
| QCCR2A30783 | SCIOSTART and SCIOSTOP fail with err. No. 22 (EINVAL) |
| QCCR2A33130 | memory leak in BMA |
| QCCR2A35609 | DP 6.2: Skipped mirroring of object |
| QCCR2A36123 | /Configuration backup fails, Faulting module name: sysnfowxp.dll |
| QCCR2A37152 | License ***** S/W:DP6.2/OS:WinServer2008R2 x64/ license errors. |
| QCCR2A37552 | Cannot write to device ([1100] The physical end of the tape has been reached.) |
| QCCR2A39717 | GUI methods used to launch a consolidation force one to specify a logging level. |
| QCCR2A39771 | HyperV Localization NON English |
| QCCR2A44781 | GRE Sharepoint - Windows SharePoint Services Search service has no full read permissions for all content databases. |
| QCCR2A27910 | omnikeytool -create reports success when actually failed on Solaris. |
| QCCR2A31937 | DP 6.11, SLES10, "Phantom"-Slots in file library, "unknown", blue ? |
| QCCR2A35036 | Backup Statistics MBytes total=6124 twice the size of Backup size = 3113 MB from OB2BAR_DB2BAR |
| QCCR2A36715 | Windows GUI is duplicating exclusions in datalist files |
| QCCR2A36766 | omnimm -delete_unprotected_media -all "There are no unprotected media to delete" even with expired media |
| QCCR2A37065 | When resolv.conf is enabled, omnidb reports "[12:1602] Cannot access the Cell Manager system. (inet is not responding)" |
| QCCR2A40064 | Cannot connect to Media Agent on system xxx, port 65535 |
| QCCR2A42447 | CRS using too much memory. |
| QCCR2A32363 | Fake sessions restarted after cluster failover |
| QCCR2A33391 | ER for ZDB/IR on RedHat with Oracle integration |
| QCCR2A34725 | GRE does not show SharePoint Report Library content for recovery |
| QCCR2A37584 | Problem on shared ESL712 with NDMP configured drives |
| QCCR2A39119 | GUI reports media session as running until reconnection to CRS |
| QCCR2A39820 | Lotus restore of data on more than one tape. Missing of data block detected |
| QCCR2A39928 | vStorage Image restore bkup succesful, but current object versions not listed in rest GUI |
| QCCR2A41078 | Port scanner causes Disk Agent to end unexpectedly. |
| QCCR2A42132 | CLI ***** problem with "omnimm -repository_barcode_scan" after upgrade to 6.20 - format changed |
| QCCR2A42704 | Unknown slots after a failing barcode, even after the barcode scan has been fixed. |
| QCCR2A43999 | SQL restore to another instance on another host requires other host instance to be configured |
| QCCR2A31017 | omnirpt ends abnormally when running list of sessions report with many datalists |
| QCCR2A33733 | Pre/Post Exec Scripts cannot be configured to be executed on a Vcenter |
| QCCR2A34560 | DP 6.2 Scsitab entry to support T10000C Drive and SL3000 Library on solaris platform |

| Global ID | Summary |
|-------------|---|
| QCCR2A36874 | [DP6.21] Report parsing error for Japanese media status (utf-8) |
| QCCR2A38527 | Debug.log fills with "Size does not match: UniqID: DDP690-mhs Old: XXXX, New: XXXX" |
| QCCR2A40757 | KeyStore Database corrupted after upgrading to DP v6.20 |
| QCCR2A44814 | Failing to start stores. Abort Message: Exception [HousekeepingException]: thrown in |
| QCCR2A31428 | Configuration object 'SYSVOL' not restored in Primary mode AD restore |
| QCCR2A34347 | Font size in the output of pre/post exec becomes strange |
| QCCR2A35464 | Need fix for QCCR2A26308. |
| QCCR2A36011 | ese_bar restore: No application name specified. Create a new backup specification. |
| QCCR2A36875 | DP6.11, Failed backup filesystem AIX error 80:1031 |
| QCCR2A38132 | Oracle backups do not release DLLs BrandChgUni.dll, libde.dll and libae.dll after backup |
| QCCR2A38134 | Unable to IR restore from Oracle11gR2 RAC |
| QCCR2A38788 | Media Agent report incorrect value of total size to SM for File Library. |
| QCCR2A39769 | Enabling debugs results in Oracle backup failure. |
| QCCR2A30377 | VBDA ends abnormally in Win32InsertNewNodeIntoTree() |
| QCCR2A30524 | 4603050802 - [81:304] /dev/rds/c5t0d2 Object is a mounted filesystem. |
| QCCR2A31291 | BMA-NET reaches IPC_MAX_CONNECTIONS |
| QCCR2A32608 | GUI: Unable to include a previously excluded object in a HOST UNIX object backup |
| QCCR2A33367 | Oracle backup failing with "Bad file format" and unable to get the configuration file |
| QCCR2A33573 | Media Agent ***** 24x7, 6.2 11.31, Configuring a StorageTek ACS Library Device |
| QCCR2A34061 | Silent data loss suspected probably due to hostname object too long |
| QCCR2A34723 | GRE does not show SharePoint Tasks for recovery |
| QCCR2A35611 | Data Protector 6.21 GUI displays multipath devices incorrectly |
| QCCR2A37947 | Simplify Installation Server depot for implementation of hotfixes. |
| QCCR2A38139 | DR not available for UEFI partitions and creation of ISO image fails. |
| QCCR2A39444 | After installing 621 bundle and latest patches, VBDA ends abnormally. |
| QCCR2A39818 | If restore client is changed from VC to ESX, GUI displays no Media found |
| QCCR2A40583 | Virtual Environment Integration Agent Restores very slow when using SAN mode |
| QCCR2A42417 | StoreOnce media not readable after backup abort - Cannot open device (JSONizer error: Read failure) |
| QCCR2A42526 | Mailbox exceeded the maximum number of corrupted items specified for this move mailbox operation |
| QCCR2A32188 | 24x7, 6.11, 2008 --- Extended List of media report |
| QCCR2A33918 | Some scheduled sessions not starting |
| QCCR2A35458 | "omnirpt command" lookup schedule report fails to display information. |
| QCCR2A35459 | SQL Advanced Properties stop responding when trying to manipulate Logical/Physical file names for instant recover |

| Global ID | Summary |
|-------------|--|
| QCCR2A35610 | omnidb and omnirpt out of sync after upgrade. |
| QCCR2A37151 | After multiple changes to MSSQL barlist, -fg exclusions are removed |
| QCCR2A40056 | SG/ESL G3 Turning ESKM off makes media blank |
| QCCR2A41079 | VBDA - Cannot back up files with a pathname longer than 1024 characters |
| QCCR2A42152 | VE agent backup is marked as successful even when error occurred |
| QCCR2A31642 | ***SAP*** SAP Archive logs restore fails from copy |
| QCCR2A37163 | Hostname Upper Case / Lower Case Issue |
