# HP Unified Functional Testing 11.52 Product Availability Matrix Additional Information

---

**Note:** The information in the Unified Functional Testing Product Availability Matrix is up-to-date at the time of its release. Refer to the [http://www.hp.com/go/uft\\_sysreq](http://www.hp.com/go/uft_sysreq) page for a link to the most updated version of this document.

---

This appendix provides supplemental information about the environments listed below.

- "Windows 8/Windows 2012 Supportability" on page 2
- "Add-in for SAP Solutions" on page 2
- "Siebel Add-in" on page 2
- "Standard Windows Applications" on page 2
- "Terminal Emulator Add-in" on page 2
- "Technology Preview Technology Support" on page 3

## **Windows 8/Windows 2012 Supportability**

UFT is supported for Windows 8/Windows 2102. However, for external plugins that work with UFT, these plugins must be supported on Windows 8/Windows Server 2012 to enable UFT to use them.

## **Oracle Add-in**

The Oracle Forms and Oracle E-Business suite toolkits are supported only when working with Oracle JInitiator or Oracle Forms using the Sun Plug-in.

## **Add-in for SAP Solutions**

- ▶ CRM 2007 is supported only for controls that support test mode enhancements. Requires SAP notes: 1147166, 1066565, and 1002944. Later SAP notes related to test mode enhancements are not supported.
- ▶ The SAP patch levels mentioned in the *HP Unified Functional Testing 11.50 Product Availability Matrix* are the minimum supported levels. Except where otherwise indicated, later patch levels may be supported. If you want to test your SAP application using a later patch, contact HP Software Support to ensure that the Unified Functional Testing Add-in for SAP Solutions is compatible with your patch version.

## **Siebel Add-in**

Siebel 7.7.x and later is supported only when the Siebel Test Automation module is installed and enabled. For information on installing and configuring Siebel Test Automation, refer to the *Testing Siebel eBusiness Applications Guide*, provided with your Siebel installation.

## **Standard Windows Applications**

Unified Functional Testing supports testing on applications based on Win32 and Win64 bit standard applications.

## **Terminal Emulator Add-in**

- ▶ If you are working with Microfocus (formerly NetManage) RUMBA Web-to-Host:
  - ▶ Only mainframe display is supported for the Java client.
  - ▶ Only run sessions are supported for Java client and Pro client.

- ▶ In Rumba Web-To-Host v6.x, the Java client does not support the HLLAPI. Therefore, the Rumba Web-to-Host v6.x Java client is not supported.
- ▶ If you are using a newer version of one of the emulators listed in the *HP Unified Functional Testing 11.50 Product Availability Matrix*, or your emulator version is different from one listed in a minor version number only, select the nearest preconfigured version in the Terminal Emulator Configuration Wizard. It is likely that the Unified Functional Testing Terminal Emulator Add-in will work successfully with your emulator.

The Unified Functional Testing Terminal Emulator Add-in can also be used with most other terminal emulators. You can define the exact configuration settings that you need using the Terminal Emulator Configuration Wizard.

For more information, see the *HP Unified Functional Testing Add-ins Guide*.

### **Technology Preview Technology Support**

Items marked as Technology Preview indicate that they are provided with limited functionality and support. It is recommended to use such environments for internal purposes and evaluations only.
