

# Additional License Authorizations

For HP Orchestration Center software products

## Products and suites covered

Products	E-LTU or E-Media available *	Non-Production use category **
HP Cloud Service Automation	Yes	Class 1
HP Cloud Service Automation Dynamic Workload Management	Yes	Class 3
HP Operations Orchestration	Yes	Class 1
HP Operations Orchestration SAP Process Automation	Yes	Class 1

  

Suites	E-LTU or E-Media available *	Non-Production use category **
HP Cloud Service Automation Enterprise Suite	Yes	Class 1
HP CloudSystem Enterprise Starter Suite	Yes	Class 1

\* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

\*\* Non-production use rights, if any, can be found at [www.hp.com/go/SWlicensing](http://www.hp.com/go/SWlicensing).

## Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
<i>Administrative User</i>	means a specific individual authorized to execute the workflow.
<i>Agent</i>	means that portion of the software that manages and is required for each physical server, virtual server or container.
<i>Client</i>	means any application or systems which provide functionality separate from that of the Software while providing for the facility to connect to and interact with the Software.
<i>Core</i>	means the server side component of software. Is typically complemented by an Agent component.
<i>Device or Dev</i>	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.
<i>E-LTU and E-Media</i>	means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on Your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<i>Foundation or Foundation Server</i>	means the server side component of software that is required in order to get an operational Implementation as specified in the software specific license terms below.
<i>Implementation</i>	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
<i>Instance</i>	means each Implementation of the application installed on a Server.

<b>Term</b>	<b>Definition</b>
<i>Internal Use</i>	means access and Use of the software for purposes of supporting your internal operations or functions.
<i>LTU</i>	means License To Use.
<i>Named User or Nmd User</i>	means a specific individual authorized by you to access the software regardless of whether they are actively using the software.
<i>Network Node</i>	means a managed Device (module) that has its own configuration. Note: Network Devices and Nodes are not always the same thing e.g a switch (one Network Device) may have three nodes: one switching card, one routing card and one backup routing card.
<i>Operating System Instance or OS Inst or OSI</i>	means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle®/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
<i>Orchestrated Node or O-Node</i>	means a node that is managed by an Operations Orchestration workflow that it touches or provides value to as further defined in the Software Specific Terms below.
<i>Points</i>	means the numerical tracking system representing the total number of metrics you are authorized to execute.
<i>Server</i>	means any designated computer system in which an Instance or Instances of the software is installed.
<i>Shift User</i>	means a user that has the right to use the product on each of three(3) shifts, It is the equivalent of one(1) shift worker regardless of shift and supports three(3) specific individuals working non-overlapping shifts.
<i>Unlimited or Unl</i>	means without restrictions in terms of number of systems, devices or media, depending on the context.
<i>Use</i>	means to install, store, load, execute and display one copy of the software.
<i>Virtual Machine(s) or VM(s)</i>	means a computer that does not physically exist but is simulated by another computer.
<i>Workflow Author Named User</i>	means a specific administrator who is authorized to create and edit process automation workflows.

## Software specific license terms

For software products with software specific license terms, these terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

### HP Cloud Service Automation

HP Cloud Service Automation is licensed by Foundation Server for either a pack of 10 Operating System Instances or for an unlimited number of OS Instances. HP Cloud Service Automation Foundation Server 10 OS Instance Pack includes an HP Universal CMDB (UCMDB) Foundation license which provides the right to use the UCMDB Server, the Data Flow Probe infrastructure, the UCMDB Admin UI, the UCMDB Browser, and the base HP UCMDB Configuration Manager capability only in conjunction with HP Cloud Service Automation.

### HP Cloud Service Automation Dynamic Workload Management (previously called Adaptive Computing Moab for HP Cloud Service Automation)

HP Cloud Service Automation Dynamic Workload Management can only be used and integrated with HP Cloud Service Automation Foundation Server and cannot be used as a stand-alone product. The HP Cloud Service Automation Dynamic Workload Management Media includes multiple product modules including Moab Workload Manager, Moab Accounting Manager and Moab Viewpoint Portal. The license for this product entitles Use of and access to the Workload Manager and Accounting Manager modules. Use of the Moab Viewpoint Portal is restricted to the system

administrator functionality only, which includes the ability to create policies and set system configurations. Customer is not allowed to Use Viewpoint Portal “end-user” user interfaces (menus and reports) including the ability to create and submit service requests. You shall install and use the HP Cloud Server Automation Dynamic Workload Management software only as a complete product and may not use portions of such software on a standalone basis separate from the complete software.

**HP Operations Orchestration**

When HP Operations Orchestration is licensed by Orchestrated Node, the following applies:

- For HP Operations Orchestration Enterprise Orchestrated Node the Orchestrated Node can represent OS Instances on a physical Device or a Virtual Machine, a physical Device hosting multiple VMs where there are multiple OS Instances, and storage arrays
- For HP Operations Orchestration Network Orchestrated Node the Orchestrated Node can represent network Devices such as a switch, router or hub
- For HP Operations Orchestration Low End Orchestrated Node the Orchestrated Node can represent end user Devices such as Clients, laptops/desktops, handhelds, smart Devices, and SOHO Device such as low cost WiFi routers, switches, cable boxes
- For HP Operations Orchestration CloudFlex 10 Orchestrated Node the Orchestrated Node can represent physical Device or an OS Instance on a physical Device that will host up to 10 VMs.

**HP Operation Orchestration Orchestrated Node (O-Node)** license includes the Core Server, central Server, remote access Server, entire standard content library, all 3rd party integration components and Unlimited users and administrators/authors.

**HP Operations Orchestration Platform** is only licensed to customers who purchased HP Operations Orchestration Platform prior to September 1, 2011. HP Operation Orchestration Platform license includes the Core Server, central Server, remote access Server, entire standard content library and all 3rd party integration components. HP Operations Orchestration Platform allows software architecture independent of the number of Core Servers and can be installed on any number of computers, provided that the actual usage of the software does not exceed the number of licenses purchased as per the Device tier package.

**HP Operations Orchestration Platform for Integration Only** is only licensed to customers who purchased HP Operations Orchestration Platform for Integration Only prior to September 1, 2011. HP Operations Orchestration Platform for Integration Only license is restricted to integration of HP Server Automation or HP Network Automation with ticketing or monitoring systems, and may not be used for alert/incident resolution automation or other broader Run Book Automation use cases.

**HP Operations Orchestration SAP Process Automation** is licensed per 5 SAP Central Instances.

**HP Orchestration Center Suite offerings**

Suite	Offering includes
<i>HP Cloud Service Automation Enterprise Suite 10 OS Instance Pack</i>	<ul style="list-style-type: none"> <li>▪ 1 HP Cloud Service Automation Foundation Server 10 OS Instance Pack</li> <li>▪ 10 HP Server Automation Enterprise Plus OS Instance (excluding Multi-Master and Service Automation Visualizer functionality)</li> <li>▪ 10 HP Operations Orchestration Enterprise Orchestrated Node</li> </ul>
<i>HP CloudSystem Enterprise Starter Suite</i>	<ul style="list-style-type: none"> <li>▪ 5 HP Cloud Service Automation Foundation Server 10 OS Instance Pack</li> <li>▪ 50 HP Server Automation Enterprise Plus OS Instance (excluding Multi-Master and Service Automation Visualizer functionality)</li> <li>▪ 50 HP Operations Orchestration Enterprise Orchestrated Node</li> <li>▪ 5 HP Database &amp; Middleware Automation for Database Solution Pack OS Instance</li> </ul>

*The HP SiteScope software product is covered in the Additional License Authorizations document for HP Application Performance Management software products. The HP Server Automation software product is covered in the Additional License Authorizations document for HP Automation Center software products.*

## Additional license terms

### Term

- A. Unless stated otherwise, you are authorized to Use one Device at a time for your Internal Use.
