

# Additional License Authorizations

For HP Automation Center software products

## Products and suites covered

Products	E-LTU or E-Media available *	Non-Production use category **
HP BSA Essentials	Yes	Class 1
HP Continuous Delivery Automation	Yes	Class 3
HP Database & Middleware Automation	Yes	Class 1
HP Matrix Operating Environment for Continuous Delivery Automation	Yes	Class 3
HP Server Automation	Yes	Class 1
HP Service Automation Reporter	Yes	Class 1
HP Service Automation Visualizer	Yes	Class 1

Suites	E-LTU or E-Media available *	Non-Production use category **
HP Cloud Service Automation for Matrix Suite	Yes	Class 1
HP Cloud Service Automation Enterprise Suite	Yes	Class 1
HP CloudSystem Enterprise Starter Suite	Yes	Class 1

\* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

\*\* Non-production use rights, if any, can be found at [www.hp.com/go/SWlicensing](http://www.hp.com/go/SWlicensing).

## Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
<i>Application Deployment Manager / Application Release Management</i>	means the tasks and processes associated with moving an application from development, through testing to production.
<i>Application Server</i>	means software that can be deployed standalone or clustered and has the sole purpose of acting as a container that hosts and executes one or more applications. Application Servers are typically J2EE application servers or .Net application servers.
<i>Application Type</i>	means software solution designed to help users perform specific tasks. Examples of Application Types include portals, financial management systems, retail POS software, human and customer relationship management software etc. The Application Type can consist of one more individual programs including Databases, Application Servers and the infrastructure on which the platform and application run. Every Application Type can have multiple versions which don't add to the Application Type count.

<b>Term</b>	<b>Definition</b>
<i>Compliance Management</i>	means the process of proactively establishing and applying compliance policies including patch levels and configuration standards.
<i>Concurrent User or CC User</i>	means the software is licensed by the amount of users that simultaneously use the software at any one point in time. The software can be installed on any number of computers, provided that the actual usage of the software does not exceed the number of licenses purchased
<i>Connector or Conn</i>	means an integration element to a certain software, format or function through use of the HP software product.
<i>Core</i>	means the server side component of software. Is typically complemented by an Agent component.
<i>Database</i>	means a container which stores application data including table structure, stored procedures, and other functionality that runs on a Database Instance.
<i>Database Instance</i>	means a software application that has the sole purpose of acting as a container that hosts and executes one or more Databases.
<i>Device or Dev</i>	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device or printer that resides within the range defined for interrogation and asset tracking.
<i>E-LTU and E-Media</i>	means products which are electronically delivered only, and as such any references to FOB Destination or delivery methods that are stated on Your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<i>Foundation or Foundation Server</i>	means the server side component of software that is required in order to get an operational Implementation as specified in the software specific license terms below.
<i>Implementation</i>	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
<i>Instance</i>	means each Implementation of the application installed on a Server.
<i>Internal Use</i>	means access and Use of the software for purposes of supporting your internal operations or functions.
<i>LTU</i>	means License To Use.
<i>Managed Entity or Mgd Enti</i>	means an addressable entity such as an operating system, middleware Instance, Database or application as specified in the software specific license terms below .
<i>Network Node</i>	means a managed Device (module) that has its own configuration. Note: Network Devices and Nodes are not always the same thing e.g a switch (one Network Device) may have three nodes: one switching card, one routing card and one backup routing card.
<i>Operating System Instance or OS Inst or OSI</i>	means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle ®/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
<i>Patching and Provisioning</i>	means the act of applying patches to servers and the process of provisioning software such as operating systems, middleware etc. to physical or Virtual Machines.
<i>Points</i>	means the numerical tracking system representing the total number of metrics you are authorized to execute.
<i>Reported Server Element</i>	means an element under management by Service Automation that is imported into Service Automation Reporter or BSA Essentials.
<i>Reported Non-Server Element</i>	means an element that is either under a Network Automation node or an Application Storage Automation Managed Storage element that is imported into Service Automation Reporter or BSA Essentials.
<i>SA Agent</i>	means an Agent that is designed to interoperate with the Server Automation Core.

<b>Term</b>	<b>Definition</b>
<i>Satellite</i>	means gateway software that interoperates with a standard Core or a Non-Production Core.
<i>Server</i>	means any designated computer system in which an Instance or Instances of the software is installed.
<i>Solution Pack or SolPk</i>	means software that is imported into HP Database & Middleware Automation that provides specific pre-packaged automation capabilities.
<i>Suite</i>	means two or more software products combined into a single license offering. The specific software products included in a Suite are specified in the Software Specific License Terms below. Software products included in a Suite are governed by the individual authorizations and use restrictions associated with each software product.
<i>Universal Agent</i>	means an Agent running on a single Operating System Instance.
<i>Use</i>	means to install, store, load, execute and display one copy of the software.
<i>Virtual Machine(s) or VM(s)</i>	means a computer that does not physically exist but is simulated by another computer.

## Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

### HP BSA Essentials

HP BSA Essentials Connector to BMC Atrium CMDB is licensed per HP BSA Essentials or HP Service Automation Reporter deployment and may only be used to connect to BMC Atrium Configuration Management Databases.

### HP Continuous Delivery Automation

Each Instance of HP Continuous Delivery Automation is licensed by Application Type. Any provisioning of HP Continuous Delivery Automation also requires an OS Instance licenses for each Application Type license. HP Continuous Delivery Automation requires additional licenses within Development and Test environments.

### HP Database & Middleware Automation

HP Database & Middleware Automation is licensed by OS Instance or per Solution Pack and Managed Entity.

HP Database & Middleware Automation licensed per OS Instance:

- For the Database Solution Pack a Managed Entity is defined as an Operating System Instance.
- For the Application Server Solution Pack a Managed Entity is defined as an Operating System Instance.

HP Database & Middleware Automation licensed per Solution Pack and per Managed Entity:

- For the Database Provisioning Solution Pack and the Application Server Provisioning Solution Pack a Managed Entity is defined as an Operating System Instance.
- For the Advanced Database Provisioning Solution Pack and the Advanced Database Patching Solution Pack, a Managed Entity is defined as a Database Instance.
- For the Database Compliance Solution Pack, a Managed Entity is defined as a Database Instance.
- For the Database Release Management Solution Pack, a Managed Entity is defined as a Database.
- For the Application Server Release Management Solution Pack, a Managed Entity is defined as an Application Server.

## **HP Matrix Operating Environment for Continuous Delivery Automation**

HP Matrix Operating Environment for Continuous Delivery Automation is licensed by a pack of 100 Operating System Instances.

## **HP Server Automation**

HP Server Automation includes a license of HP BSA Essentials. The HP BSA Essentials license can only be used in conjunction with HP Server Automation. HP Server Automation Enterprise Plus, Enterprise Edition and Starter Editions require an Oracle database; the license to run Oracle is not included with HP Server Automation. Customers are expected to purchase their license directly from Oracle or to Use an existing license.

**HP Server Automation Enterprise Plus** is licensed by Operating System Instance. Multi-Master, Satellite and Service Automation Visualizer (SAV) functionality are included in HP Server Automation Enterprise Plus and are licensed by OS Instance and are limited to Use with the same HP Server Automation Enterprise Plus OS Instance license that it was originally licensed with. In addition, Multi-Master, Satellite and Service Automation Visualizer functionality that is included in HP Server Automation Enterprise Plus is also licensed to Use with previously purchased licenses of the stand-alone versions of HP Server Automation Multi-Master or HP Server Automation Satellite or HP Server Automation Visualizer. The HP Server Automation Enterprise Plus version included in the HP Cloud Server Automation Enterprise Suite listed below, does not include the Multi-Master and Service Automation Visualizer functionality as described in this paragraph.

**HP Server Automation Standard** is licensed by Operating System Instance and can be used in environments with up to 3,000 Operating System Instances for the purpose of Provisioning, Patching, Software Management and Compliance. HP Server Automation Standard does not include Multi-Master, Satellite and Service Automation Visualizer (SAV) functionality.

**HP Server Automation Enterprise Edition** is only licensed per OS Instance to customers who purchased HP Server Automation Enterprise Edition prior to September 1, 2011.

**HP Server Automation Starter Edition for Compliance Management** is only licensed to customers who purchased HP Server Automation Starter Edition for Compliance Management prior to September 1, 2011. HP Server Automation Starter Edition for Compliance Management is an entry level HP Server Automation package which can be used in environments with up to 1000 Operating System Instances for the purpose of Compliance Management. Users are not entitled to perform Provisioning functions. Customers are entitled to Use other basic features such as global shell, baseline, and security features.

**HP Server Automation Starter Edition for Patching and Provisioning** is licensed by Operating System Instance and is an entry level HP Server Automation package which can be used in environments with up to 1000 Operating System Instances for the purpose of Patching and Provisioning including operating systems and applications. Customers are entitled to Use other basic features such as global shell, baseline, and security features. HP Server Automation Starter Edition for Patching and Provisioning is only licensed to customers who purchased HP Server Automation Starter Edition for Patching and Provisioning prior to June 1, 2013.

## **HP Application Deployment Manager**

**(previously called HP Server Automation Starter Edition for Application Deployment Manager and HP Server Automation Starter Edition for Application Release Manager)**

HP Application Deployment Manager is only licensed to customers who purchased HP Application Deployment Manager prior to September 1, 2011. HP Application Deployment Manager is a HP Server Automation edition with limited HP Operations Orchestration bundling which can be used for the purpose of Application Deployment Management. Administrative Users are entitled to Use the lowest tier of HP Operations Orchestration, which is limited to 150 Devices, 1 Concurrent User and 1 Workflow Author User licenses.

## Additional license terms

### Term

- A. Unless stated otherwise, you are authorized to Use one Device at a time for your Internal Use.
