

HP SiteScope

For the Windows, Solaris, and Linux operating systems

Software Version: 11.23

Monitor Metrics and Measurements

Note: This document was deprecated, and information from it was moved to the SiteScope Monitor Reference Guide in the SiteScope Help. The SiteScope Monitor Reference Guide now includes the list of metrics that can be configured per monitor, as well as versions of applications or operating systems that are supported.

Document Release Date: December 2013
