

HP Data Protector X.34.01 List of Implemented Enhancements and Resolved Issues

List of implemented enhancements and resolved issues

| Global ID | Summary |
|-------------|-------------------------------------------------------------------------------------------------|
| QCCR2A31102 | VMware GRE French loc version: Restore request 0016 contains invalid data or data is missing. |
| QCCR2A31846 | VMWARE ***** DP 6.2 VMware GRE problem vmdk is missing or corrupted |
| QCCR2A33639 | Debug.log fills with SessionMsgSize = 114 |
| QCCR2A33483 | restore session aborts instead of issuing a mount request |
| QCCR2A30905 | File was not backed up in any backup session in the restore chain being consolidated. |
| QCCR2A32860 | Could not find object <object_name> in virtual environment |
| QCCR2A33759 | DbgStack: DbgFcnOut() function does not match function on stack! |
| QCCR2A32809 | After scanning a cartridge it is set to Write Protection= Yes QCCR2A23498 QCCR2A22796 |
| QCCR2A34459 | BSM crashes after parsing OMNI_HOSTS setting |
| QCCR2A30536 | RSM fails with Error getting positions of the object |
| QCCR2A35114 | DP 6.20 - vAgent - Vepa not backing up virtual disks |
| QCCR2A34939 | DP 6.20/ Hyper-VCluster one host cannot be selected |
| QCCR2A35525 | Data Protector 6.21 GUI displays multipath devices incorrectly |
| QCCR2A35533 | Since the update to 6.21, the enter/eject/erase media function does not work |
| QCCR2A35568 | After DP6.21 update, vepa_util cannot handle some imported client passwords anymore |
| QCCR2A35196 | DP 6.2 IBRIX after restore CIFS cannot be restarted on the X9000 |
| QCCR2A35814 | GRE_Cant RecoverFiles for VM having Incr / diff backups |
| QCCR2A35852 | SSPNT620_008 introduces a problem when browsing a VEAgent restore directory |
| QCCR2A32838 | After upgrade to 6.20 DP is not able to start the PC with the magic packet |
| QCCR2A32325 | VSS backups with more than 110 MS-SQL databases intermittently fails |
| QCCR2A35623 | DP 6.21 CS W2008 x64 SP2 // Vsphere 5.0 // 61:3003 IPC Read Error during session with phys. RDM |
| QCCR2A32849 | Exchange 2010: Consistency check for log files takes too long |
| QCCR2A35761 | VEAgent critical error for vss_manifest file backup and backup aborts |

| | |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------|
| QCCR2A35910 | VEAgent restore into directory with overwrite fails |
| QCCR2A35954 | DP Restore VM which has multiple volume created from different datastore is failing |
| QCCR2A35901 | 6.20 BMA crash during reconnection |
| QCCR2A35872 | Creation of ISO image fails with higher device conc. |
| QCCR2A35666 | DP 6.20 reports incorrect size for LTO5 media from GUI and CLI. |
| QCCR2A35723 | RSM ***** DP 6.11, CM Windows 2003 SP2, [Critical] From: RSM@<Machine Name> "" Time: <TimeStamp> [12:5] Internal error in -> QCCR2A32290 |
| QCCR2A35747 | Storeonce Deduplication-Consolidation requires a second gateway |
| QCCR2A36056 | DP 6.21, HPUX, High MMD memory use seen when sessions queue for drives. |
| QCCR2A35526 | HP-UX 11.23, DP 6.2, CRS using a lot of memory, possible memory leak. |

The following issues have been resolved in patch bundle set 7.01:

| Global ID | Summary |
|-------------|------------------------------------------------------------------------------------------------------------------------|
| QCCR2A21480 | 4603050802 - [81:304] /dev/rdisk/c5t0d2 Object is a mounted filesystem. |
| QCCR2A22020 | Customer wants an additional option to be available to the omnib command for changing barchive parameters |
| QCCR2A22217 | ADIC DAS support for Linux x64 |
| QCCR2A26423 | File is shorter than it was when it was opened |
| QCCR2A26612 | DP611 Doc:SMISA:sap-zdb backup giving the warning messages |
| QCCR2A27239 | SCIOSTART and SCIOSTOP fail with errno 22 (EINVAL) |
| QCCR2A27475 | DP 6.2 : VCS 5.1 SP1 on Windows 2008 R2 SP1 x64 Configuration backup is failing |
| QCCR2A28034 | Instant Recovery (IR) is failing with VSS:SSEA SQL 2008R2 using XP Doremon & Kea HWP on Windows Server 2008 SP2, 64bit |
| QCCR2A28186 | Multiple reconnects during cluster failover give BMA timeout - problem in BSM |
| QCCR2A28638 | Backup of dir with excluded dirs on OES2SP2 was full (with excluded dirs!) |
| QCCR2A28664 | VBDA crashes in Win32InsertNewNodeIntoTree() |
| QCCR2A28888 | User preferred PVG 'XXX' is not available for replication. |
| QCCR2A28979 | A change in the configuration is found hence instant recovery is not possible. |
| QCCR2A29143 | Wake On LAN wait configuration |
| QCCR2A29185 | Session flow report is hard to read |
| QCCR2A29498 | There is not enough free space in the following disk group to perform a backup for this storage volume |
| QCCR2A29591 | Truncated SNMP traps are sent by SUSE 11 Linux DP 6.11 Cell Manager |
| QCCR2A29635 | Need fix for QCCR2A26308. |
| QCCR2A29647 | Netapp Filer device format is not successful |
| QCCR2A29652 | Backup reports SRD information could not be collected |
| QCCR2A29779 | omniobjcopy -targetprotect option not working. |
| QCCR2A29943 | Share Point error after selecting database and clicking next during cache import |
| QCCR2A29954 | [OEM]PRI=3/omnimlist fails. |

DP = Data Protector

| Global ID | Summary |
|-------------|----------------------------------------------------------------------------------------------|
| QCCR2A30028 | import of encrypted media on target cell failing with error retrieving encryption key |
| QCCR2A30031 | Configuration object 'SYSVOL' not restored in Primary mode AD restore |
| QCCR2A30263 | sqlcode 245 error occurred at line 1.: ORA-00245: control file backup operation failed |
| QCCR2A30327 | DP6.11 is unable to restore ACL permission in Debian 6.0 x64 |
| QCCR2A30380 | Keppcatalog option in objectcopylist is not correctly set. |
| QCCR2A30490 | Creating a unique key for encryption with omnikey tool fails. |
| QCCR2A30571 | GUI Search Interval does not allow for Daylight Saving time |
| QCCR2A30611 | BMA-NET reaches IPC_MAX_CONNECTIONS |
| QCCR2A30633 | Dp 6.11, Win2008R2 The disaster recovery wizard was unable to find "object/drive" backed up. |
| QCCR2A30789 | DP6.21 - support of short filename (original fix- QCCR2A24888) |
| QCCR2A30853 | [Critical] From: BMA Bad message format. |
| QCCR2A30905 | File was not backed up in any backup session in the restore chain being consolidated. |
| QCCR2A30906 | memory leak in BMA |
| QCCR2A30991 | Cannot write filemark. ([5] Input/output error) |
| QCCR2A31111 | VMware GRE fails if VM is member of a vAPP |
| QCCR2A31155 | Trans logs backups not included in point in time recovery after copy of trans session |
| QCCR2A31286 | Consistency check in 6.2 slower than 6.11 |
| QCCR2A31450 | GUI: Unable to include a previously excluded object in a HOST unix object backup |
| QCCR2A31480 | Share Point unable to browse items under Content database |
| QCCR2A31487 | BMA hangs if a session had to wait for a device |
| QCCR2A31506 | Customer wants Progress percentages in the Session Report |
| QCCR2A31510 | There are inconsistencies in the Data Protector Omniinet |
| QCCR2A31560 | GRE doesn't show custom lists for recovery... |
| QCCR2A31596 | ER for BE ZDB EVA support for Oracle 11g RAC ASM on 2003 R2 x64 |
| QCCR2A31666 | Continuous spike of RDS at 100% on Linux |
| QCCR2A31670 | Oracle backup failing with "Bad file format" and unable to get the configuration file |
| QCCR2A31891 | Hard link errors from VRDA during Disaster Recovery |
| QCCR2A31912 | Fallback to legacy filesystem backup was not allowed. Aborting the backup. |
| QCCR2A31947 | DP 6.2 Enabling Encrypted Control Communication - cannot enable for >35 clients |
| QCCR2A31958 | Lost connection to VBDA |
| QCCR2A32003 | AMDR does not restore user.dat registry files |
| QCCR2A32102 | Guide for DataProtector with ACSLS in firewalled Environments is not available |
| QCCR2A32133 | DP6.2 HyperV cluster setup using volume GUID not supported |
| QCCR2A32199 | 6.20 util_oracle8.pl -config failing with RetVal 8433 for virtual host |

DP = Data Protector

| Global ID | Summary |
|-------------|----------------------------------------------------------------------------------------------------------------------|
| QCCR2A32260 | DP6.2: Push Agent not supported for Solaris 11 32bit |
| QCCR2A32286 | DP6.2: Push Agent not supported for Solaris 11 SPARC |
| QCCR2A32289 | BMA-NDMP crashes during backup |
| QCCR2A32315 | VEPA GUI barlist creation warning |
| QCCR2A32343 | VBDA crashes during CONFIGURATION backup since upgrade to 6.20 |
| QCCR2A32495 | Add VSS provider tab entry for NetApp FAS3070 Array |
| QCCR2A32499 | ORA-00245: control file backup operation failed |
| QCCR2A32522 | "Look up Schedule" not reporting Schedule Time |
| QCCR2A32636 | Session hangs after canceling mount request. |
| QCCR2A32699 | DP6.11:DA:REG(NID):Physical rasdisk backup is not giving the warning message when it is mounted |
| QCCR2A32838 | After upgrade to 6.20 DP is not able to start the PC with the magic packet |
| QCCR2A32849 | Exchange 2010: Consistency check for log files takes too long |
| QCCR2A33048 | Oracle backup fails with "External utility reported error" |
| QCCR2A33052 | VMWare GRE doesn't list backup versions if Datacenter resides in a folder |
| QCCR2A33159 | Received ABORT request from RSM (ERR: Media Agent aborted.) |
| QCCR2A33160 | DP does not handle 'NOT READY, BECOMING READY' condition. |
| QCCR2A33162 | DP 6.11 encryption is failing when oracle user is owner of the backup |
| QCCR2A33189 | Pre/Post Exec Scripts cannot be configured to be executed on a Vcenter |
| QCCR2A33244 | Oracle recovery catalog backup fails when the catalog DB is in Cluster |
| QCCR2A33402 | Defect:6.2 NDMP copy media is failing by stating improper error message when copied from large media to short media. |
| QCCR2A33412 | Unable to restore data across cells within MOM environment |
| QCCR2A33414 | backup catalog disappears after media copy from VLS to LTO |
| QCCR2A33419 | Inet results in a segfault |
| QCCR2A33476 | Silent data loss suspected probably due to hostname object too long |
| QCCR2A33547 | Estimated library capacity consumption cannot be changed with latest patches |
| QCCR2A33548 | Support for NDMP media copy |
| QCCR2A33553 | Exchange VSS Object name display GUID rather than Man Readable name. |
| QCCR2A33631 | DP611:L0:MA: MA binaries are shoing old time stamp on AIX 6.1 |
| QCCR2A33830 | Unable to copy exchange 2010 session to tape via CLI |
| QCCR2A33837 | omnidb and omnirpt out of sync after upgrade. |
| QCCR2A33872 | DP 6.2 Data Protector 6.2 support for a minimum of 500 concurrent drives (LTO) up from current 128. |
| QCCR2A33900 | DP 6.2 - IS upgraded from 6.0 fails to update CC component on 11.11/11.23_PA clients |
| QCCR2A33906 | Devbra SN contains inconsistent data when device is busy |
| QCCR2A33951 | font size in the output of pre/post exec becomes strange |
| QCCR2A33959 | DP 6.2: Skipped mirroring of object |
| QCCR2A33977 | Oracle backup fails with "ORA-12154: TNS:could not resolve the connect identifier specified" |

DP = Data Protector

| Global ID | Summary |
|-------------|------------------------------------------------------------------------------------------------------------------------------------|
| QCCR2A34077 | sometimes devbra shows the same serial number for tape library and drive |
| QCCR2A34140 | Invalid block sequence number: XXXX expected 0. |
| QCCR2A34244 | ORA-27193: sbtinfo2 did not return volume label |
| QCCR2A34261 | BMA reports"Encryption could not be enabled on the drive, session will be aborted." |
| QCCR2A34268 | DP 6.11, omnidbutil -readdb failed for one fnames file, [136:32] Bad import file format in file "fnames.i011-247.bk.fin.local.txt" |
| QCCR2A34318 | DR backup fails |
| QCCR2A34353 | DP6.20/VBDA-ECC backup problem/could not connect to inet in order to start VBDA |
| QCCR2A34355 | DP 6.2 NDMP Restore with unknown error |
| QCCR2A34419 | incorrect varbind sent snmp traps from Linux cell manager |
| QCCR2A34481 | Cannot exclude/filter system reserved partition from backup |
| QCCR2A34537 | DP6.20 Oracle/ZDB: OB2RMAN: Failed to start ASM instance. |
| QCCR2A34627 | SP:VSS Cannot create datalists for FAST index backup |
| QCCR2A34771 | BSM loops if encounters write-protected tape |
| QCCR2A34810 | VMware GRE request catch 22 when linux was selected |
| QCCR2A34883 | No backup session versions listed in Sharepoint GRE |
| QCCR2A34889 | VM is restored to the different datastore, when the DP user doesn't specify any datastore name |
| QCCR2A34906 | SQL Advanced Properties hang when trying to manipulate Logical/Physical file names for instant recover |
| QCCR2A34915 | DP 6.2 installation of DA agent failed on SLES 11 x64 SP2 with BrtFS filesystem |
| QCCR2A34922 | DP 6.11 HPUX 11.23 - Internal DP error |
| QCCR2A34972 | DP 6.2 license TD590AA doesn't work on DataProtector (HP-UX)- B6951AA |
| QCCR2A35053 | DP6.11, Failed backup filesystem AIX error 80:1031 |
| QCCR2A35082 | Unable to restore to network share which originated from Blue Arc Filer |
| QCCR2A35096 | Exporting a client results in failed backups when user_restriction file is in place |
| QCCR2A35108 | Vcenter VM move disabled by "_DP_VEPA_BACKUP_RESTORE_LOCK_' |
| QCCR2A35118 | SharePoint GRE fails to recover when 'Rename if exists' option is selected |
| QCCR2A35167 | Error "Backup of recovery catalog failed". |
| QCCR2A35189 | Missing of data block detected, expecting block XXXXXX ! |
| QCCR2A35230 | "omnirpt command" lookup schedule report fails to display information. |
| QCCR2A35247 | No data for user USER@DOMAIN in Inet's impersonation configuration. |
| QCCR2A35248 | AIX DA modification for DirectIO environment |
| QCCR2A35291 | Omniobjcopy limits number of arguments |
| QCCR2A35371 | DP6.11:Unable to browse the mount point having space in LINUX |
| QCCR2A35415 | Data Protector(DP) Sharepoint GRE solution doesn't trigger the DP utilities |
| QCCR2A35452 | Backup of recovery catalog fails if the backup specification has space in it |
| QCCR2A35525 | Data Protector 6.21 GUI displays multipath devices incorrectly |
| QCCR2A35526 | HP-UX 11.23, DP 6.2, CRS using a lot of memory, possible memory leak. |

DP = Data Protector

| Global ID | Summary |
|-------------|-------------------------------------------------------------------------------------------------------------------------|
| QCCR2A35557 | inconsistancies in SRD file lead to iso creation failure |
| QCCR2A35617 | SMISA is only processing only two of four PV for the LV backed up |
| QCCR2A35620 | VMWare Backup error "No Object found for Backup". |
| QCCR2A35646 | DP when customer runs a vmr back up , trying to do a test , error message :no objects found for restore |
| QCCR2A35665 | DP 6.2 Volume shadow copy "not a valid mountpoint" |
| QCCR2A35747 | Storeonce Deduplication-Consolidation requires a second gateway |
| QCCR2A35819 | EXCEPTION at src/coolie/mkrset.cpp |
| QCCR2A35852 | SSPNT620_008 introduces a problem when browsing a VEAgent restore directory |
| QCCR2A35862 | Linux config backup fails- Cannot find volume for boot volume (/boot) |
| QCCR2A35876 | Cannot get information on file '/var/opt/omni/tmp/rcvcat22157.exp' Error: 2 |
| QCCR2A35899 | No ACSLS Support on Linux x32/x64 |
| QCCR2A35911 | Medium export failed, due to failure in export of encryption keys |
| QCCR2A36028 | 6.20 VBDA crashes during CONFIGURATION backup |
| QCCR2A36030 | DP 6.20 CS W2008 / MA-NDMP W2003 // NETAPP NDMP Server, // VTL // Error 12:200 No valid Host Name or Host Not Found. |
| QCCR2A36039 | Latest GR patches results in object copies not using multiple source devices |
| QCCR2A36055 | [DP6.21] Report parsing error for Japanese media status (utf-8) |
| QCCR2A36058 | Exchange VSS Restores using the incorrect session id to restore from |
| QCCR2A36119 | DP 6.11,WORM media, Error 90:51 ? Cannot write to device [13] Permission denied, write-protected cartridge. |
| QCCR2A36121 | heavy io load on cmmdb server since installing patch-suite + hotfixes |
| QCCR2A36125 | GUI lists media copy for restore |
| QCCR2A36129 | setting write-through and write-back policy not properly handled for mirrorclone/snapshot |
| QCCR2A36166 | SMIS: Write true policy is set on mirrorclone instead on source LUN |
| QCCR2A36175 | VEAgent silent loss of vmdk descriptor files although available in tmp |
| QCCR2A36179 | DP6.21: import client is not working after pushing DA agent from CM to solaris 11 sparc client |
| QCCR2A36204 | VSS backups with more than 110 MS-SQL databases intermittently fails |
| QCCR2A36211 | VEAgent independent disk make the backup to fail. |
| QCCR2A36341 | BMA - Unknown internal error |
| QCCR2A36373 | Uninstallation utility doesn't clean the SP GRE solution properly in a multi node SharePoint farm. |
| QCCR2A36376 | Error receiving catalog data from the BMA - introduced on 8 sites after installing b621 |
| QCCR2A36380 | Cannot forward block. (Details unknown) (DP6.21) |
| QCCR2A36395 | DP7.0::CS::Fix is not working for QCCR2A35666 @MMR1 |
| QCCR2A36467 | MMA ***** Medium verification returns "cannot find daID=1 in the table" or "cannot find daID=0 in the table |
| QCCR2A36505 | When resolv.conf is enabled, omnidb reports "[12:1602] Cannot access the Cell Manager system. (inet is not responding)" |

DP = Data Protector

| Global ID | Summary |
|-------------|----------------------------------------------------------------------------------------------------------------------------|
| QCCR2A36531 | After file backup, file access time is not restored to original value |
| QCCR2A36564 | VEAGENT restore of second disk fails into directory or GRE |
| QCCR2A36577 | CRS hang ***** Non responding cell manager service after use of omnichk - patches utility. |
| QCCR2A36599 | GRE fails to query object versions if vm has versions dating back to 6.11 |
| QCCR2A36648 | OMNIDBUTIL ***** DP 6.20, HP-UX 11.31, omnidbutil -show_locked_devs , shows incorrect information |
| QCCR2A36678 | NDMP Restore operation has failed |
| QCCR2A36730 | LINUX EADR FAILS WHEN MULTIPATH EXIST |
| QCCR2A36733 | Restore of ACL fails after upgrade for backups from PHSS_42705. |
| QCCR2A36804 | data protector crashes when OMNI_HOSTS variable is set |
| QCCR2A36840 | Cannot use wildcards in excludes (eg *.ldf) |
| QCCR2A36915 | MS SharePoint Granular Recovery Extension Install problem |
| QCCR2A36923 | SQL restore fails with : The log in this backup set terminates at LSN 3467000001550500001, which is too early |
| QCCR2A36982 | SharePoint GRE fails to create Recovery Web Application |
| QCCR2A36986 | DP6.2:CS-CC:Fix not working for QCCR2A33547 |
| QCCR2A37034 | DP6.2: VEPA: ESX backup giving Vmotion warning |
| QCCR2A37056 | Hostname Upper Case / Lower Case Issue |
| QCCR2A37063 | Installing Vmware GRE Plug in component failing intermittently |
| QCCR2A37069 | DP6.2:Reg: VEPA: Second disk restore to folder restoring first disk too if both disks belong with two different DataStore. |
| QCCR2A37071 | DP6.2::L0::DA patch installation on Linux throwing error |
| QCCR2A37134 | DP6.2-VEPA-Restore of VM with multiple disks in different datastores fails through Vcenter |
| QCCR2A37160 | NDMP/CORE ***** Unable to restore file from previous backup ***** |
| QCCR2A37202 | DP6.2::MA::NDMP::Fix not working for QCCR2A34771 |
| QCCR2A37207 | DP6.2::CS::Fix is not working for QCCR2A35189 |
| QCCR2A37228 | MS SharePoint Granular Recovery Extension Install problem |
| QCCR2A37261 | Cannot write to device ([1100] The physical end of the tape has been reached.) |
| QCCR2A37289 | [SQL Server]Incorrect syntax near the keyword 'FILE'. |
| QCCR2A37304 | DP6.2:DA:Reg<NID>:AIX:Incorrect ACL messages while cross File system restore @MR |
| QCCR2A37402 | No data is restored on X9000 Granular NDMP restores. |
| QCCR2A37410 | Offline DR doesn't work with B2D Devices |
| QCCR2A36139 | DP Memory Performance Problems on Windows Server 2008 R2 |
| QCCR2A31975 | omnidb -catalog output is misleading when done with Log File or Log Directory |
| QCCR2A35195 | Offline Oracle ZDB does not start target database after replicas are created but after the data is backed up |
| QCCR2A35956 | Windows GUI is duplicating exclusions in datalist files |
| QCCR2A36729 | License ***** S/W:DP6.2/OS:WinServer2008R2 x64/ license errors. |
| QCCR2A37033 | New SCSItab entry to Support NEC T30A/T60A with DP 6.20 and DP 6.21 |

DP = Data Protector

| Global ID | Summary |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------|
| QCCR2A37066 | DP6.2::CS::Backup is failing with omnirc variable OB2COMPRESSCATALOG=1 |
| QCCR2A37201 | DP6.2::CS::Fix not working for QCCR2A30028 |
| QCCR2A37460 | DP6.2::Oracle GUI Reg<NID> barlist creation giving warning message |
| QCCR2A36977 | PERFORMANCE / Restore : DP 6.2 Slow Restore on Windows 2008 Storage Server |
| QCCR2A37507 | DP6.2:Core: remove_patch.bat file doesn't list vmware GRE component in help. |
| QCCR2A32592 | GUI displays "You have attempted to show all available nodes for the database (Oracle) that is not ..." when ECC turned on |
| QCCR2A35379 | EADR Support of SAN booting with Redhat 5.5/5.6 |
| QCCR2A38018 | DP6.20:CS:ZDB backup completed with unwanted warnings |
| QCCR2A37389 | Oracle control files left in /var/opt/omni/tmp |
| QCCR2A37612 | Oracle backups do not release DLLs BrandChgUni.dll, libde.dll and libae.dll after backup |
| QCCR2A36322 | unable to IR restore from Oracle11gR2 RAC |
| QCCR2A36596 | DR not available for UEFI partitions and creation of ISO image fails. |
| QCCR2A38122 | DP6.2:Oracle:Backup of recovery catalog failing |
| QCCR2A38209 | DP6.2: L0-Sharepoint GRE: Upgrade of client throws "file not found" messages in session logs |
| QCCR2A38293 | Media Agent report incorrect value of total size to SM for File Library. |
| QCCR2A37119 | Problem getting snapshot detail: 80070057 |
| QCCR2A38210 | GUI ***DP 7.0 used media is not listed in DP GUI Internal Database Session properties |
| NA | DP 6.21 new patches installation fails in custom installations |
| QCCR2A37384 | DVD Verification:Windows IA64 Local Client installation using setup.exe Or Splash screen is crashing GUI. |
| QCCR2A36022 | Notification file is not upgraded, after Uninstalling MMR1 |
| QCCR2A35684 | Query regarding licensing |
| QCCR2A38372 | DP 6.11, Poss 4Tb limit for data written by a devicerive as displayed by `omnistat -sess <sessID>` |
| QCCR2A33011 | Copy from StoreOnce device to diff device type takes more space than original data |
| QCCR2A38295 | DP Oracle doesn't backup DPMCTL when the ASM environment variables are set through GUI |
| QCCR2A38258 | Debug.log file flooded with messages when SRD backup is performed. |
| QCCR2A19206 | DP6.0: Documentation change for IR for Oracle ASM |
| QCCR2A19665 | SCTL_ReadElementStatusSerial() cannot locate serial number of STK SL500 |
| QCCR2A23107 | incorrect procedure specified fro SQL MAXDB recovery |
| QCCR2A24485 | A.06.11: Please can we have documentation for Groupwise 8 integration |
| QCCR2A25289 | HP-UX chunking 1MB blocks to 256k meaning verfiy and restore failures. |
