

Web Browser			Release: 9.6.0	Doc Version: V34.3
Browser	Version	Platform	Comment	
Internet Explorer	7.0, 8.0	Windows	Internet Explorer (IE) may hang on some machines while viewing the management server software. Sometimes IE will crash when you use the Back button. Keeping current with the latest Internet Explorer updates (including Windows Update updates and hotfixes) has been shown to eliminate this problem. Microsoft patch Q813489 (found at www.microsoft.com) should correct this issue.	
	9.0		The recommended JRE plug-in version is 1.6. Refer the product documentation should you want to upgrade the Java plug-ins. Refer the user guide to configure 64-bit browser. IPv6 Support: IE 8 is supported IPv6 environment.
