

Network Appliance			Release: 9.6.0	Doc Version: V34.3
Subsystems	Models	Software Requirement	Comment	
All models listed below support iSCSI also, but they will need iSCSI license on the filer. Supports NetApp iSCSI LUNs with the Windows (Win 2003, Win2008) & VMWare (ESX 3.*, 4.*) clients only. IPv6 Support: All Model running Data ONTAP 8.1 configured with IPv6 address is supported.				
Primary Storage	All models running the supported Data ONTap versions	Data ONTAP 7.2.5.1, 7.3.x, 8.0, 8.0.1, 8.0.3, 8.1	Support Qtrees, Quotas, Aggregates, Snapshots, Flexvols, https, volume chargeback, NetApp heads Aggregate information will be blank for ONTAP 6.5 as filer does not support Aggregates Cluster mode is not supported from ONTAP 8.0 onwards.	
Nearline Storage	All models running the support Data ONTap versions	Data ONTAP 7.2.5.1, 7.3.x, 8.0, 8.0.1, 8.0.3, 8.1	Support Qtrees, Quotas, Aggregates, Snapshots, Flexvols, https, volume chargeback, NetApp heads. Cluster mode is not supported from ONTAP 8.0 onwards.	
V-Series	All models running the support Data ONTap versions	Data ONTAP 7.2.5.1, 7.3.x, 8.0, 8.0.1, 8.0.3, 8.1	Support Qtrees, Quotas, Aggregates, Snapshots, Flexvols, https, volume chargeback, NetApp heads. Cluster mode is not supported from ONTAP 8.0 onwards.	
Subsystem Performance Pack				
Support all devices as stated above, the only limitation is that these metrics are available for the physical filer only, not virtual filers. Tools used : Zexplore / (STATS command of Netapp Filer)				
Replication supported				
Supports replication Local : Snapshot Remote: Snapmirror
