HP Unified Functional Testing - Business Process Testing

Please refer to ALM 12.00 Product Availability Matrix for a list of supported clients

¹ More information about this item can be found in the Additional Information section.

² Not supported for API Testing.

HP Unified Functional Testing Product Availability Matrix Additional Information

Note: The information in the Unified Functional Testing Product Availability Matrix is up-to-date at the time of its release. Refer to the http://www.hp.com/go/uft_sysreq page for a link to the most updated version of this document.

This appendix provides supplemental information about the environments listed below.

- "Windows 8/Windows 2012 Supportability" on page 2
- "Server Operating Systems" on page 2
- "Add-in for SAP Solutions" on page 2
- "Siebel Add-in" on page 2
- "Standard Windows Applications" on page 2
- "Terminal Emulator Add-in" on page 3
- "Web Add-in" on page 3
- "Technology Preview Technology Support" on page 3

Windows 8/Windows 2012 Supportability

UFT is supported for Windows 8/Windows 2102. However, for external plugins that work with UFT, these plugins must be supported on Windows 8/Windows Server 2012 to enable UFT to use them.

Server Operating Systems

Seat licenses are not available for operating systems with session capabilities, such as Windows servers or Citrix.

Oracle Add-in

The Oracle Forms and Oracle E-Business suite toolkits are supported only when working with Oracle JInitiator or Oracle Forms using the Sun Plug-in.

Add-in for SAP Solutions

- ▶ CRM 2007 is supported only for controls that support test mode enhancements. Requires SAP notes: 1147166, 1066565, and 1002944. Later SAP notes related to test mode enhancements are not supported.
- ▶ The SAP patch levels mentioned in the *HP Unified Functional Testing Product Availability Matrix* are the minimum supported levels. Except where otherwise indicated, later patch levels may be supported. If you want to test your SAP application using a later patch, contact HP Software Support to ensure that the Unified Functional Testing Add-in for SAP Solutions is compatible with your patch version.

Siebel Add-in

Siebel 7.7.x and later is supported only when the Siebel Test Automation module is installed and enabled. For information on installing and configuring Siebel Test Automation, refer to the *Testing Siebel eBusiness Applications Guide*, provided with your Siebel installation.

Standard Windows Applications

Unified Functional Testing supports testing on applications based on Win32 and Win64 bit standard applications.

Terminal Emulator Add-in

- ▶ If you are working with Microfocus (formerly NetManage) RUMBA Web-to-Host:
 - ▶ Only mainframe display is supported for the Java client.
 - ▶ Only run sessions are supported for Java client and Pro client.
 - ▶ In Rumba Web-To-Host v6.x, the Java client does not support the HLLAPI. Therefore, the Rumba Web-to-Host v6.x Java client is not supported.
- ▶ If you are using a newer version of one of the emulators listed in the *HP Unified Functional Testing Product Availability Matrix*, or your emulator version is different from one listed in a minor version number only, select the nearest preconfigured version in the Terminal Emulator Configuration Wizard. It is likely that the Unified Functional Testing Terminal Emulator Add-in will work successfully with your emulator.

The Unified Functional Testing Terminal Emulator Add-in can also be used with most other terminal emulators. You can define the exact configuration settings that you need using the Terminal Emulator Configuration Wizard.

For more information, see the *HP Unified Functional Testing Add-ins Guide*.

Web Add-in

Users of Google Chrome versions 17 and earlier should contact HP Software Support to enable UFT to recognize Chrome objects.

Technology Preview Technology Support

Items marked as Technology Preview indicate that they are provided with limited functionality and support. It is recommended to use such environments for internal purposes and evaluations only.
