=====

This document provides the hardware and software requirements for an on-premise installation of Agile Manager.

To install:

1. Unpack the rpm installation file.
2. Run the installation wizard as described in the Installation Guide (PDF).

The Installation Guide also includes detailed prerequisites for Linux and Oracle servers and security best practices.

View the installation video for an overview of the installation and configuration process.

Install a PDF reader and MP4 player to open these files.

Note: Your default license includes 100 licenses, and expires 30 days after starting your Agile Manager server.

For more details:

* After installing, access the Help Center from Agile Manager or the Agile Manager Administration site.
