HP Support July 2012

LoadRunner

[Addressee's Name
Addressee's Title
Company Name
Street Address
City, Postal Code
Country]

Dear HP Software Customer,

Hewlett-Packard (HP) is announcing version obsolescence of LoadRunner 9.x, effective as of the dates set forth below.

This letter is for LoadRunner 9.x support customers worldwide, to inform you of our end of support plans.

Loadrunner 8.1x is not supported anymore since end of June 2008. Customers that still have their support contract on LoadRunner 8.1x will see a contract update at time of renewal.

Along with the obsolescence of these versions, we will also obsolete an older pre-merger HP product structure as well as the old HP (pre-Nov 2010) product structure. This will also result in changes on your support contract at time of renewal, to reflect the new HP (post-Nov 2010) product structure.

End of Sale / End of Support

HP is committed to providing the highest level of customer care to you while you determine your future strategy for your LoadRunner 9.x products. Please read below for key timelines and support options that are now available to you:

Date	Program Activity
July 1, 2012	Product discontinuance announced
September 1, 2012	End of sale (no longer orderable or available for purchase)
June 30 (Q2) 2008	End of Support for LoadRunner 8.1x (as announced previously)
December 31, 2013	End of Support for LoadRunner 9.x End of Support pre-merger HP product structure and old HP (pre-Nov 2010) product structure End of Support LoadRunner Wan Emulator Add-in
December 31, 2015	End of Self-Help Support LoadRunner 9.x End of Support pre-merger HP product structure and old HP (pre-Nov 2010) product structure End of Self-Help Support LoadRunner Wan Emulator Add-in

Please note that all LoadRunner 9.x customers with active support contracts are eligible to upgrade to the latest version of LoadRunner, version 11.50.

Hewlett-Packard Company

Mt. View, CA 94043
www.hp.com

July 2012
Page 2

While these LoadRunner 9.x versions may continue to meet your immediate needs, HP recommends that all customers upgrade to LoadRunner 11.50.

For a successful renewal of your support contract, we may need to discuss your current loadRunner configuration and assist you in making a few choices. This will allow us to update your support contract to meet your needs. Your HP contract administrator, renewal sales representative or software support account manager will contact you upon time of renewal of your support contract.

HP had decided to no longer develop the business for the LoadRunner WAN Emulator Add-in over 5 years ago. The product was still in support during these years. In the context of this obsolescence, you may choose the Shunra for HP Software product as a replacement. Please use any of the following options to contact Shunra directly:

- Get contacted by a Shunra for HP Software representative:
http://ape.shunra.com/HP_Upgrade.html
- Direct e-mail contact: james.newton@shunra.com
- Phone contact: + 1 267-519-5104

HP Professional Services has the following Quick Start services available to help you get up and running with the products as quickly and efficiently as possible:

- **The LoadRunner Foundation Supplement QuickStart Service** is designed to provide customers with assistance in the installation of LoadRunner and assistance with the creation of two performance test scripts per resource, and provide mentoring on HP's leading practices for performance testing.
- **The HP LoadRunner to Performance Center Upgrade QuickStart Service** is designed to provide customers with assistance in moving quickly and safely from LoadRunner to Performance Center, and provide mentoring on HP's leading practices for performance testing.

For more information, contact your HP representative or email HP Software Professional Services in your region.

AMS: amsalmpsoswat@hp.com

EMEA: hpsw-pso-emea-alm-mcs@hp.com

APJ: apjalmpsoswat@hp.com

HP Software Education has a **LoadRunner Essentials 11.00 class** available. This five-day course introduces students to LoadRunner 11. The course covers topics for the VuGen, the Controller, and Analysis tools. It also includes a final one day, hands-on lab.

For more information, please visit the [HP Software Education Services website](#) (>Region >Country >Training by Product >BTO/Applications Performance Center).

Please refer to attached Appendix A for definition of terms for product obsolescence and Appendix B for the list of affected LoadRunner 8.1x & 9.x and pre-HP product structure product numbers as well as old HP (pre-Nov 2010) product structure product numbers affected by this obsolescence announcement.

Should you have any questions about this end of availability communication, or for assistance in understanding the options available to you, please contact your local HP sales representative or HP software business partner. When providing information, please include your name, country, phone number, company name, product number and your HP Service Agreement ID or HP System Handle.

In addition, for technical assistance and information, please visit Software Support Online:
www.hp.com/go/hpsupport

HP once again wishes to thank you for choosing LoadRunner 9.x. We appreciate your business and look forward to continuing to serve your business needs in the future.

Sincerely,

HP Software Services

APPENDIX A: Definitions

This product version obsolescence is covered by version 4.3 of the support & obsolescence policy. Definitions of terms are provided by the HP Software product version obsolescence documented at:

www.hp.com/go/hpsupport/support-lifecycle

Product Support

Product Support is the reactive engagement of regional support resources (Support Center) and division support resources (Lab), in accordance with your purchased support plan, for the resolution of product defects, plus product enhancements for a specific product version. This includes investigation of newly reported defects and if appropriate, development of defect fixes and making these available for customers via patches. The HP Software product teams (Lab) will review and either approve or deny requests for defect fixes and enhancements (including additional support for newly-released operating system versions).

While HP Software investigates all problems and issues raised for products covered under Product Support, customers may be required to install the most current version or patches as part of the troubleshooting process.

Version Maturity may apply to specific versions of HP Software products. Version Maturity means that, for a specific product version, no further enhancements or changes to functionality are planned, nor are any further platform refreshes planned in order to update that product version to support current or future operating systems, operating system versions or hardware platforms.

End-of-Support Date

© Copyright 2012 Hewlett-Packard Development Company, L.P. The information contained herein is subject to change without notice. The only warranties for HP products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein.

For more information, go to www.managementsoftware.hp.com

07/2012.

End-of-Support Date is the last date Software maintenance, installation and configuration assistance, and other standard support services will be accepted for the specified product release (as specified by Major and Minor version numbering). EOS also means the last date Software Change Requests (SCRs) will be accepted for a specified Version of a Product. After the EOS date, all SCRs will be planned for future versions, as applicable. Current patches for the version of the HP Software reaching EOS will remain available for electronic download for a reasonable period of time.

Self-Help Support

Self-Help Support is an integral component of all HP Software Support contracts. Self-Help Support consists of web-based access to the online support Knowledge Base, which contains technical information for HP Software products including white papers, existing patches and known problems for a specific product version.

In some instances support for specific HP Software product(s) and/or version(s) may run longer than the support for underlying operating system(s), adjacent/integrated application(s) or version(s). In this event, it is HP's intent to communicate with affected HP Software product/product versions customers in a timely manner. However, there are cases where HP does not receive notification of the End-of-Support for these products (operating system(s) or adjacent/integrated application(s), or version(s)) in advance of the general public. In any case, should the underlying operating system(s), adjacent/integrated application(s) or version(s) become unsupported by its developer, support for the affected HP Software product/product versions will immediately be limited to self-solve support available through Software Support Online, and Telephone Support associated with questions concerning a product's/product version's functionality and/or interoperability in line with the said product's/product version's original parameters/requirements at the time of release. Any product updates and/or fixes will be limited to those already available. No additional updates, patches or fixes will be engineered. Should said product/product version operate or integrate with other still supported, underlying operating system(s), adjacent/integrated application(s) or version(s), support for said product/product version on any remaining supported platform(s), supported adjacent/integrated application(s), or supported version(s) will continue unaffected, or through the planned End-of-Support date, if one has been announced.
