

## HP Data Protector 9.00 List of Implemented Enhancements and Resolved Issues

List of implemented enhancements and resolved issues

Global ID	Summary
QCCR2A49005	The IDB recovery results in a critical error: "Replacement of the Internal Database failed".
QCCR2A49469	The Data Protector 8.0 "omnimigrate.pl" script fails if a space exists in the DPDATA path name.
QCCR2A49135	The Data Protector 6.21 Microsoft SQL Server Integration backup session takes a long time to start.
QCCR2A49740	Selection of the restore version is inconsistent in the Data Protector 8.0 Graphical User Interface (GUI).
QCCR2A49541	The Data Protector 7.03 Graphical User Interface (GUI) ends abnormally while performing the "List of Sessions" report.
QCCR2A49478	The Backup Media Agent (BMA) ends abnormally in SysWrite_SODA.
QCCR2A49334	The "Apply Template" procedure does not work for integrations.
QCCR2A49673	In the DP 8.0 Graphical User Interface (GUI), the session filter in the "Backup Specifications" field is too small.
QCCR2A49833	Size of the restored file does not match the size of the backed-up file.
QCCR2A49820	Instant recovery of SQL ZDB with P9500 ends unexpectedly.
QCCR2A49412	The Virtual Environment Integration restore session fails with the following error: "Wrong datastore path format".
QCCR2A49875	The media replication session ends abnormally without unloading the media in Data Protector 8.0.
QCCR2A49840	The object copy session uses only one device.
QCCR2A50044	Data Protector 7.0 is unable to start the StoreOnce software deduplication datastore.
QCCR2A49623	The Data Protector 7.01 Graphical User Interface (GUI) ends abnormally in MoM during listing of objects.
QCCR2A49369	Licenses are not available after the system restart.
QCCR2A50119	Possible memory irregularities in the Volume Restore Disk Agent (VRDA).
QCCR2A50158	Data Protector 7.03 has notifications and schedule issues for replication sessions.
QCCR2A50147	The Data Protector 8.0 Database Session Manager (DBSM) on the Linux system fails with an error message.
QCCR2A49944	During the IDB SMBF check, a lot of session message files are missing.
QCCR2A50091	Data Protector 7.03 cannot back up files that have path names longer than 1024 characters.

DP = Data Protector

<b>Global ID</b>	<b>Summary</b>
QCCR2A49966	Data Protector Microsoft SharePoint Server 2007/2010/2013 integration backup session ends abnormally.
QCCR2A50162	Unable to remove items from the StoreOnce devices.
QCCR2A50232	Restore session fails with the following error: "Could not find datacenter".
QCCR2A50272	The restore session fails with the following error: "Error: sharepoint_bar: The farm is unavailable".
QCCR2A49715	After an upgrade to Data Protector 8.00, the Detail Catalog (DC) gets corrupted when using the non-migrated tapes.
QCCR2A50348	The Volume Backup Disk Agent (VBDA) displays the following error: "Cannot read ACLs: ( 22  Invalid argument)".
QCCR2A50453	Data Protector HP P9000 XP Agent (SSEA) displays the following error: "Mapping from character device file of disk to LDEV failed".
QCCR2A50227	The Backup Catalog on Data Protector 8.0 is not displayed after a media copy from VLS to LTO.
QCCR2A50449	After an upgrade to Data Protector 7.03, the session fails with the following error: "The creation of ISO image failed".
QCCR2A49655	Scheduled reports do not work.
QCCR2A46934	Query data is not found in the Data Protector Graphical User Interface (GUI).
QCCR2A50642	The IDB backup session stops responding on Data Protector 8.0.
QCCR2A50468	The LTO6 medium cannot be initialized though 2.5 TB is its native size.
QCCR2A50605	The TBL database unpacking in Data Protector 8.1 fails when the string size is 0.
QCCR2A50688	The "omnidbutil -remap_dcdir" command fails and thereafter the DCBF information is corrupted in the IDB.
QCCR2A50576	The incremental backup session fails on NSS/OES.
QCCR2A50769	Access to Data Protector 8.1 Graphical User Interface (GUI) is denied for users with special characters in the name.
QCCR2A50760	The Data Protector 8.1 IDB is not correctly upgraded.
QCCR2A50349	The catalog migration fails with the following error: "Cannot upgrade catalog of medium".
QCCR2A39081	Oracle 11g on RHEL 6.1 Veritas cluster 5.1 support.
QCCR2A48578	The "omnirpt -report obj_lastbackup" command does not report some of the VEagent objects.
QCCR2A49416	The CSM locks to many target devices during the Data Protector 8.0 object copy session.
QCCR2A48841	The backup session fails due to a disabled primary device in the mirroring devices.
QCCR2A49827	When the first gateway server is down, the replicaiton session does not switch to the second configured gateway server.
QCCR2A50476	The backup sessions stop responding.
QCCR2A49603	The output of the "omnidownload" command is not sorted correctly.
QCCR2A49284	The original virtual machine is overwritten when the "Restore as" option is used.
QCCR2A48734	The Data Protector Virtual Environment Integration component ends abnormally.
QCCR2A50149	After an upgrade to Data Protector 8.0, a warning message is displayed during the daily maintenance checks.
QCCR2A50809	After upgrading to Data Protector 8.0, the restore sessions are very slow.
QCCR2A50750	The Novell Open Enterprise Server 11 SP1 backup session in Data Protector 8.1

DP = Data Protector

Global ID	Summary
	fails with a segmentation error.
QCCR2A50365	A restore session fails with the following error: "Cannot write: ( 5  Access is denied.) => not restored".
QCCR2A51024	After an upgrade from Data Protector 6.20, the folder restore is not possible.
QCCR2A50942	The script "Mount.bat" does not start in the Data Protector Windows Cell Manager.
QCCR2A50868	There are memory allocation issues during the object copy sessions.
QCCR2A48632	Data Protector 7.03 fails due to the SCSI Reserve/Release barcode scan issue.
QCCR2A41587	EMC SYMMETRIX VMAXE storage array support.
QCCR2A47238	Enhancement request for SYMA to support new device special files.
QCCR2A51124	The Data Protector 8.1 "omnib -rawdsk" command does not run.
QCCR2A51127	vCenter 5.1 update 2 starts with a blank page.
QCCR2A46384	In the Data Protector Graphical User Interface (GUI), add filters for the virtual machine name.
QCCR2A50891	The Data Protector 8.0 "omnidbcheck -bf" command does not run correctly.
QCCR2A50817	A standalone Media Agent or Disk Agent stops responding.
QCCR2A51086	The Data Protector 8.1 Virtual Environment Integration backup session fails with the following error: "Exception Occurred while creating VM snapshot".
QCCR2A50745	After upgrading to Data Protector 7.03, VBDA ignores the exclude list from the backup specification.
QCCR2A50983	The Data Protector 8.0 restore session of German vowels fails on SUSE Linux Enterprise Server 11 with Novell Open Enterprise Server 11.
QCCR2A51125	The Data Protector 7.03 Lotus integration cannot restore a backup on which the objects appear as failed.
QCCR2A51295	The "Encrypted control communication" option does not function correctly on an HP-UX client.
QCCR2A51257	An enhancement request to disable the "encrypted" checkbox for the StoreOnceSoftware store.
QCCR2A51154	The restored files from deduplicated volumes to a different host are corrupted.
QCCR2A51033	The ZDB SSE Agent backup session fails if the "SSEA_ATOMIC_SPLIT=1" omnirc option is used.
QCCR2A49880	The configured Daily report is not executed correctly.
QCCR2A50399	Objects with the "Completed/Errors" status are excluded from the object copy session.
QCCR2A51225	The Data Protector "omnioflr" command reports the "Unknown option -dfmf." error.
QCCR2A50089	The total "Store Data Size" does not match the size of the StoreOnce root directory.
QCCR2A51142	The Data Protector Virtual Environment Integration (VEagent) template creation fails with the "details unknown" error.
QCCR2A51060	The backup session fails with the following error: "The string was not recognized as a valid DateTime".
QCCR2A51465	Upgrade to Data Protector 8.11 for the VMware Granular Recovery Extension agent fails.
QCCR2A50798	The Data Protector 8.1 SAP HANA Appliance integration fails.
QCCR2A51498	Upgrade to Data Protector 8.0 displays rejected lines from media.txt.

DP = Data Protector

Global ID	Summary
QCCR2A51527	Data Protector 8.1 incorrectly handles empty spaces in data paths.
QCCR2A51398	Auto-registration of virtual machine fails.
QCCR2A50218	An error occurs while running the Data Protector "omnidl" command.
QCCR2A50550	The Data Protector Granular Recovery Extension for SharePoint Server installation fails on the German SharePoint environment.
QCCR2A51446	When restoring a vApp, if a machine is backed up on a Windows XP storage, the restore fails with the following message: "handleDiskMetaData-Unknown".
QCCR2A51324	Data Protector Virtual Environment Integration backup sessions fail with the following error: "Connection reset by peer".
QCCR2A51456	The backup session fails with the following error: "Backup failed because unable to utilize CBT as it was required".
QCCR2A50434	Upgrade to Data Protector 8.1 does not proceed.
QCCR2A51522	The IDB upgrade to Data Protector 8.0, 8.01, or 8.1 fails and is missing the catalog information.
QCCR2A51318	EADR on Linux systems fails with the update boot disk error.
QCCR2A51396	The "omnikeytool -import CSVFile" command causes the kms.exe file to end abnormally.
QCCR2A47390	Connection to the application agent (OB2BAR) backup disk agent (DA) is lost.
QCCR2A50673	The Data Protector 8.0 Graphical User Interface (GUI) stops responding.
QCCR2A51239	The Data Protector 7.03 Microsoft SQL Server integration backup session fails with the following error: "Session has failed".
QCCR2A51198	The IDB backup session on Data Protector 8.1 fails if the NTFS mountpoint is used.
QCCR2A51234	The Data Protector Session Manager fails to load or unload.
QCCR2A51214	The "omnidbutil -mergemmdb" command fails if the hostname contains a special character.
QCCR2A51567	The Data Protector 8.1 object copy session fails with the following error: "Specified device for the object not found".
QCCR2A51589	The Data Protector 8.1 VEPA backup session reports a false warning message.
QCCR2A51726	A mailbox cannot be enumerated during the restore session.
QCCR2A48803	For verification sessions, the Session Flow report shows a Red bar under the Success column.
QCCR2A51243	Data Protector 8.1 backup sessions do not start during the removal of a virtual machine snapshot.
QCCR2A51956	Snapshot is not removed after the backup session completes.
QCCR2A50933	Data Protector 7.03 backup session fails with the following error: "ASR information could not be collected".
QCCR2A51056	Replication session stops responding.
QCCR2A52056	The backup specification preview progress is missing in the Monitor context.
QCCR2A51415	After upgrading to Data Protector 8.1 on a MOM environment, the IDB records related to tape are not migrated correctly.
QCCR2A52103	The Virtual Environment Integration backup session fails after upgrading to the Data Protector 8.11
QCCR2A51518	Data Protector 8.01 client statistics reports display the integer overflow error.
QCCR2A52139	Enabling user restrictions causes the RDS to end abnormally.
QCCR2A51776	The EADR of SAP HANA appliance does not complete.

DP = Data Protector

Global ID	Summary
QCCR2A52338	The Data Protector 8.11 virtual machine restore session denies filter settings when a host or cluster is selected.
QCCR2A52438	The Data Protector 8.01 "devbra" command does not list the EML drives under robotics.
QCCR2A52218	The Data Protector 7.03 "omnicc" command reports incorrect number of licenses.
QCCR2A52308	The virtual machine name is not displayed in the Object Latest Backup report.
QCCR2A52582	The Data Protector 8.11 Graphical User Interface (GUI) does not list all virtual machines in the Restore context.
QCCR2A52585	The Data Protector 8.11 Virtual Environment Integration backup session fails with the following error: "Exception Occurred while creating VM snapshot".
QCCR2A52943	Cannot open device (Semaphores).
QCCR2A52941	Logsense overflow on Solaris hosts.
QCCR2A52939	SCSI reserve/release failing on Solaris.
QCCR2A52410	Upgrading the catalog in Data Protector 8.1 and 8.11 fails.
QCCR2A52416	Problems with the "omnimm -delete_unprotected_media" command on Data Protector 7.03.
