Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
API	Means Application Programming Interface
API Bundle	Means multiple APIs combined together to form one composite API. Also known as 'mashup'.
Concurrent User	Means users who are logged in and accessing the system simultaneously.
Connector	Means applications used to access the network resources such as location service, billing, etc.
E-LTU and *E-Media*	Means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Internal Use	Means access and Use of the software for purposes of supporting your internal operations or functions.
LTU	Means License To Use
Non-Commercial Use	Non-commercial License applies when there is a need to provide a standalone License to customers, partners or companies in charge of developing add-ons without any goal of running it in a commercial way.
RTU	Means Right To Use
Server	Means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
Smart Insights API Bundle	An API bundle used for Big data, and customer intelligence. Has APIs for location, big data, customer interests, etc. See *API Bundle*.
Transaction	Means Full API request handling including both request and response message, and internal processing of request by the product, it may also be a notification, without the request.
TPS	Means Transactions Per Second. See *Transaction*.
Use	Means to install, store, load, execute and display one copy of the software.

Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

HP Service Governance Framework

- **HP SGF Commercial** is licensed by ordering the TPS required by the customer. The SGF is ordered with 40, 80, or 160 TPS. If a Licensee needs more TPS, they can upgrade to the next level by paying the price difference between their original system, and the one they are upgrading to. If additional TPS is needed beyond 160, the licensee can buy additional TPS in 80 TPS increments.

- **HP SGF RESTful Web2.0 Gateway** is licensed per server.

- **HP SDP Policy Enforcer for SGF** is licensed per server.

- **HP SGF Non-Commercial** license entitles Licensee to non-commercial use of the product. One Non-Commercial license is required *per-server,* on which the HP SGF software is running.

HP Enterprise Mobility Gateway

- **HP EMG Commercial** license is priced per average concurrent user. Licensee may purchase license per increment of concurrent users. The licensee can purchase 50 users up to 100 at a specific price, 50 users up to 500 at another price, or 250 users above 500, depending on how many users they need to support. The licensee can add on licenses as needed. Examples are shown below.

  Customer A would like to deploy a Mobility Gateway solution in which they will require capacity for 80 concurrent users.

Product Name	Quantity
HP Mobility Gateway up to 100 Users Step 50 LTU	2

  Customer B would like to deploy a Mobility Gateway solution in which they will require capacity for 250 concurrent users.

Product Name	Quantity
HP Mobility Gateway up to 100 Users Step 50 LTU	2
HP Mobility Gateway up to 500 Users Step 50 LTU	3

- **HP EMG Non-Commercial** license entitles Licensee to non-commercial use of the product. This license can only support 1-40 concurrent users.

HP Service Orchestration Manager

- **HP SOM Commercial** is licensed by ordering the TPS required by the customer. The SOM is ordered with 40, 80, 120, or 160 TPS. If a Licensee needs more TPS, they can purchase additional 40 TPS upgrade packages, up to a total of 160 TPS. A second expansion option is to purchase additional 60 TPS blocks if additional TPS is needed beyond 80 TPS.

Customer wants to upgrade from 40 to 220 TPS

Product Name	TPS (Total)
HP SOM 40 Initial TPS E-RTU	40
HP SOM 40 to 80 TPS Upgrade E-RTU	80
HP SOM 80 to 120 TPS Upgrade E-RTU	120
HP SOM 120 to 160 TPS Upgrade E-RTU	160
HP SOM Additional 60 TPS E-RTU (Beyond 80 TPS)	220

Customer wants to upgrade from 40 to 200 TPS

Product Name	TPS (Total)
HP SOM 40 Initial TPS E-RTU	40
HP SOM 40 to 80 TPS Upgrade E-RTU	80
HP SOM Additional 60 TPS E-RTU (Beyond 80 TPS)	140
HP SOM Additional 60 TPS E-RTU (Beyond 80 TPS)	200

- **HP SOM Connector** is licensed per each connector. For example, if a Licensee required a SMPP and SMS connectors, they would need to purchase 2 SOM connectors.

- **HP SOM Context Enabler** is licensed per Smart Insights API Bundle.

- **HP SOM Business Rule Management System (BRMS)** is licensed per Server.

- **HP SOM Non-Commercial** license entitles Licensee to non-commercial use of the product. One Non-Commercial license is required *per-server,* on which the HP SOM software is running.

HP Partner Relationship Management

- **HP PRM Commercial** license entitles Licensee to commercial use of the product. One Commercial license is required *per-server,* on which the HP PRM software is running.

- **HP PRM Non-Commercial** license entitles Licensee to non-commercial use of the product. One Non-Commercial license is required *per-server,* on which the HP PRM software is running.

Additional license terms

Term

A.	Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties.
B.	You shall install and use the software as authorized in the applicable agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the Supporting Material, specifications or an applicable agreement.
