Deploying the HP Solutions Content Pack

OO platform versions 10.00 and above support HP Solutions Content Pack 1.2.3. However, it is recommended to deploy the HP Solutions Content Pack 1.2.3 on an existing OO platform version of 10.10 or later.

For details on deploying a content pack, see "Importing Content Packs to a Project" in the *Studio Authoring Guide* and "Deploying a Content Pack" in the *Central User Guide*.

Note: For details on how to uninstall/rollback a content pack, see "Roll back to the last deployment" in the *HP OO Central User Guide*.

Fixed Defects

The reference number for each fixed defect is the ALM Global ID number (QCCR).

For more information about fixed defects, visit HP Software Support Online, or contact your HP Support representative directly.

| CR Number | Title | Description |
|-------------|---|---|
| QCCR8C21401 | SiteScope - Redeploy Template operation fails with null point exception | <p>SiteScope - The Redeploy Template operation under <i>/Integrations/Hewlett-Packard/SiteScope/9.x and 10.x and 11.00</i> failed with a null point exception.</p> <p>To solve this, the API method used by Redeploy Template has been replaced. The new API method required the addition of the following optional inputs to the operation: connectToServer, deleteOnUpdate, identifier.</p> |
| QCCR8C22972 | Content which still uses the ICONCLUDE_HOME env variable in 10.x CPs should be cleaned up | <p>The content that used ICONCLUDE_HOME if the path was relative, now uses the java.home location. This path now depends on the application from which the flow is run.</p> <p>If the path is relative, it will be relative to: studio/bin for Studio central/bin for Central ras/bin for RAS</p> |

Known Issues

For more information about known issues, visit HP Software Support Online, or contact your HP Support representative directly.

OO200: Get Run Status operation does not return correct state of the run

The operations returns status=RUNNING for the runs that have the state Canceled or Pending-Canceled.

Limitations

The operation "Add object" found at "Library/Integrations/Hewlett-Packard/Universal CMDB/" doesn't handle correctly the property if the "=" sign is part of the property value

The operation **Add object** under */Integrations/Hewlett-Packard/Universal CMDB* allows to you to create a CI in uCMDB.

When a property contains a password whose value includes an equal sign, for example, abc=123, OO records the password as "abc" and the rest of the string is ignored.

Using FQDN in Run Script Command

Only IPs are accepted as input when running the **Run Command Script** operation under */Integrations/Hewlett-Packard/Network Automation/7.x and 9.x/Commands*.

OO200: Get Run Status operation does not return correct state of the run

The operations returns status=RUNNING for the runs that have the state Canceled or Pending-Canceled.

Third Party Limitations

OneView: some API calls don't work for the environment

HP OneView Integration 1.0: When setting the **Get Firmware Drivers List** operation under */Integrations/Hewlett-Packard/OneView/Settings/Firmware* or the **Get Server Hardware Types List** operation under */Integrations/Hewlett-Packard/OneView/Servers/Server Hardware Types*, an error is raised in Operations Orchestration.

This is due to a limitation caused by a third-party API.
