Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to: <http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to: <http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Support

Visit the HP Software Support Online web site at: <http://www.hp.com/go/hpsoftwaresupport>

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

To find more information about access levels, go to:

http://h20230.www2.hp.com/new_access_levels.jsp

HP Software Solutions Now accesses the HPSW Solution and Integration Portal Web site. This site enables you to explore HP Product Solutions to meet your business needs, includes a full list of Integrations between HP Products, as well as a listing of ITIL Processes. The URL for this Web site is <http://h20230.www2.hp.com/sc/solutions/index.jsp>

Chapter 1: How to Generate a Business View Excel Report in Microsoft Excel

This task describes how to create Business View Excel reports in Microsoft Excel.

To learn more about Business View Excel reports, see the *HP Application Lifecycle Management User Guide*.

This task includes the following steps:

- ["Install the HP ALM Business Views Microsoft Excel Add-in." below](#)
- ["Log in to ALM" below](#)
- ["Select business views" on the next page](#)
- ["Configure the Excel report" on the next page](#)
- ["Save the report" on page 7](#)

1. Install the HP ALM Business Views Microsoft Excel Add-in.

You can install the HP ALM Business Views Microsoft Excel add-in:

- From the HP Application Lifecycle Management Add-ins page (**Help > Add-ins**).
- From the Analysis module of ALM.

Note: If you do not install the HP ALM Business Views Microsoft Excel add-in from the Add-ins page, you are prompted to install the add-in when creating a business view excel report in the Analysis module.

Installing via the Add-ins page allows you to install for only yourself or for all users on the machine. Installing from the Analysis module installs only for yourself.

To install for all users, you must have administrator permissions.

2. Log in to ALM

Log in to ALM from Microsoft Excel.

- a. Open Microsoft Excel.

Note: In Microsoft Excel 2013, you can only open one Business View Excel report at a

time.

- b. Open the Login screen. In the HP ALM tab, click **Login**.
- c. Enter the login information. Select **Standard Authentication** or **External Authentication**.
 - i. For **Standard Authentication**, enter the ALM server URL, Login Name, and Password, and click **Authenticate**.
 - ii. For **External Authentication**, enter the web server URL and click **External Authentication**.
- d. Select the project. Enter the Domain and Project, and click **Login**.

3. Select business views

Select the business views for which you want to create Excel reports. You can select multiple business views. Each business view is displayed in a separate Excel worksheet.

- a. **Open the Add Worksheet dialog box.** In the HP ALM tab, click **Add** to add business view Excel worksheets in the same Excel book, or click **New Report** to add business view Excel worksheets in a new Excel book. For user interface details, see the *HP Application Lifecycle Management User Guide*.
- b. **Select the business views.** Select the business view and click **OK**. To select multiple business views, use the SHIFT or CTRL keys. The new business view Excel worksheets are added and the Worksheet Configuration pane becomes active.

4. Configure the Excel report

Configure the report in Excel.

- a. **Select the fields to be included in the report.** In the Fields tab of the Worksheet Configuration pane, select the fields to be removed from the report. To select multiple fields, use the SHIFT or CTRL keys. For user interface details, see "[Worksheet Configuration Pane - Fields Tab](#)" on page 11.
- b. **Filter the data to be included in the report.** In the Filter tab of the Worksheet Configuration pane, select the fields to be filtered and enter the filter criteria. For user interface details, see "[Worksheet Configuration Pane - Filter Tab](#)" on page 13.

Note: You cannot filter based on memo (CLOB) fields.

- c. **Sort the report.** In the Sort tab of the Worksheet Configuration pane, select the fields by which the report is sorted and set the sorting criteria. For user interface details, see "[Worksheet Configuration Pane - Sorting Tab](#)" on page 15.

Note: You cannot sort on memo (CLOB) fields.

- d. **Select the projects to be included in the report.** In the Advanced tab of the Worksheet Configuration pane, select **Include domain and project name** and select the projects to include in the report. For user interface details, see "[Worksheet Configuration Pane - Advanced Tab](#)" on page 17.
- e. **Edit the query.** In the Advanced tab of the Worksheet Configuration pane, click **Edit Query** to configure the report by directly editing the DQL query. For user interface details, see "[Worksheet Configuration Pane - Advanced Tab](#)" on page 17.

Note: If you edit the query, the other tabs of the Worksheet Configuration pane are disabled and all selection, sorting, and filtering of fields are done directly in the DQL query.

5. Save the report

Save the report directly to the ALM Analysis View tree or as a file.

- a. **Save the report to ALM.** Click the arrow under the **Save** button and select **Save to ALM**. For user interface details, see "[Save Business View Excel Report Dialog Box](#)" on page 23.
- b. **Save the report as a file.** Click the arrow under the **Save** button and select **Save to file**. In the search window, navigate to the desired location, enter the desired file name, and click **Save**.

Chapter 2: HP ALM Tab - Microsoft Excel

This tab enables you to create and configure Business View Excel reports.

<p>To access</p>	<ol style="list-style-type: none"> 1. On the ALM sidebar, under Dashboard, select Analysis View. 2. Expand the analysis tree, and select a Business View Excel report. 3. Click the Configuration tab. 4. Click New Excel. Microsoft Excel opens. 5. Click the HP ALM tab.
<p>Relevant tasks</p>	<p>"How to Generate a Business View Excel Report in Microsoft Excel" on page 5</p>

User interface elements are described below:

UI Element	Description
	<p>Login. Opens the login screen to log in to ALM.</p>
	<p>Logout. Logs out of ALM.</p>
	<p>Switch Project. Opens the login screen to switch to another project in the same ALM session.</p>
	<p>Add. Opens the Add Worksheet dialog box to create a new worksheet for each selected business view.</p>
	<p>Show Configuration. Toggles the Worksheet Configuration pane.</p>

UI Element	Description
	<p>Auto Refresh. Automatically refreshes the active worksheet each time its configuration is changed.</p>
	<p>Row Limit. Sets the maximum number of rows shown in each Business View worksheet.</p> <p>Note: Set the value to zero to retrieve all rows.</p>
	<p>Refresh. Refreshes the current worksheet.</p>
	<p>Refresh All. Refreshes all worksheets.</p>
	<p>New Report. Opens the Add Worksheet dialog box to create a new worksheet for each selected business view in a new Excel workbook.</p>
	<p>Open. Opens a business view Excel workbook from a file or from the ALM Analysis View tree.</p>
	<p>Save. Saves the current Business View Excel workbook to a file or to the ALM Analysis View tree.</p>
	<p>Options. Opens the HP ALM Addin Options dialog box. See "Business View Options Dialog Box" on page 22 for details.</p>
	<p>Help. Opens the HP Application Lifecycle Management Help for the add-in.</p> <p>Note: The help opens only when you are logged in to ALM.</p>

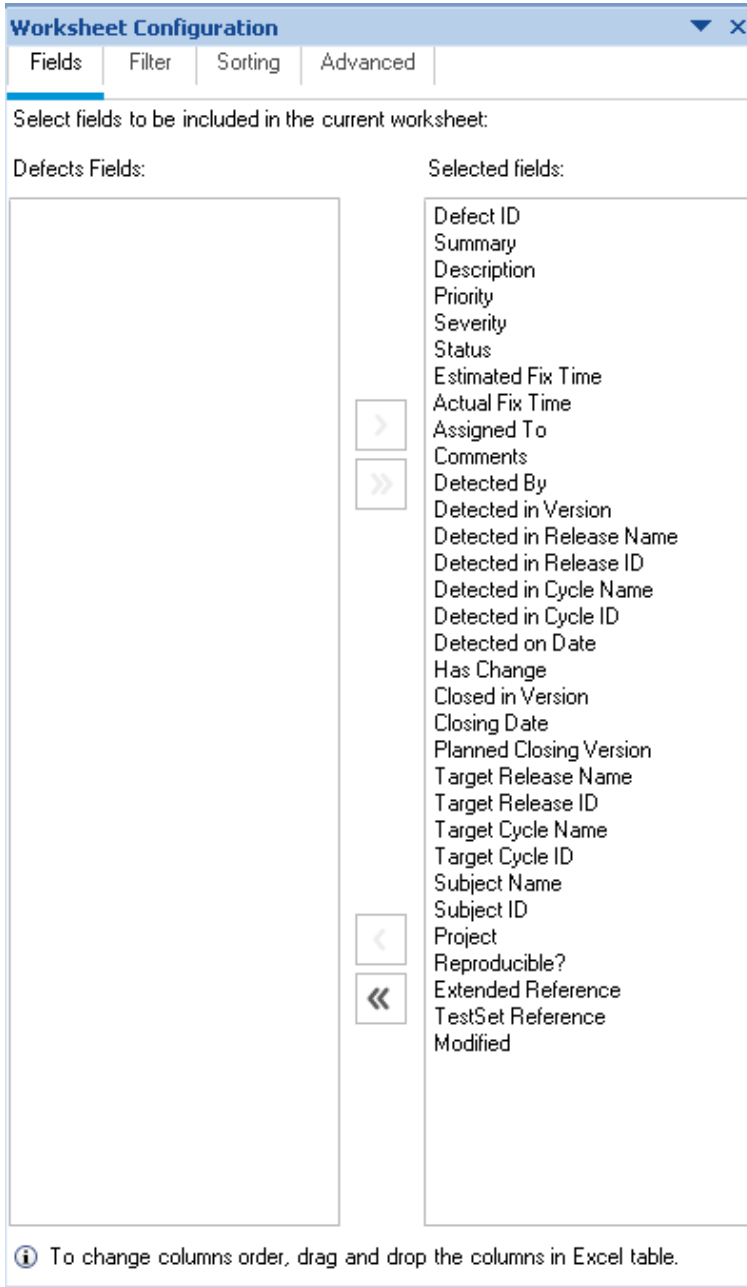

Chapter 3: Worksheet Configuration Pane

This chapter includes:

Worksheet Configuration Pane - Fields Tab	11
Worksheet Configuration Pane - Filter Tab	13
Worksheet Configuration Pane - Sorting Tab	15
Worksheet Configuration Pane - Advanced Tab	17
