Documentation Updates

To check for recent updates or to verify that you are using the most recent edition of a document, go to: <https://softwaresupport.hpe.com/>.

This site requires that you register for an HPE Passport and to sign in. To register for an HPE Passport ID, click **Register** on the HPE Software Support site or click **Create an Account** on the HPE Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HPE sales representative for details.

Support

Visit the HPE Software Support site at: <https://softwaresupport.hpe.com/>.

Most of the support areas require that you register as an HPE Passport user and to sign in. Many also require a support contract. To register for an HPE Passport ID, click **Register** on the HPE Support site or click **Create an Account** on the HPE Passport login page.

To find more information about access levels, go to: <https://softwaresupport.hpe.com/web/softwaresupport/access-levels>.

HPE Software Solutions Now accesses the Solution and Integration Portal website. This site enables you to explore HPE product solutions to meet your business needs, includes a full list of integrations between HPE products, as well as a listing of ITIL processes. The URL for this website is <https://softwaresupport.hpe.com/km/KM01702731>.

OMi Management Pack for SAP HANA Release Notes

For Operations Manager i for Linux and Windows® operating systems

Software version: 1.00

Publication date: April 2017

This document is an overview of the first release of OMi Management Pack for SAP HANA. It contains important information that is not included in books or Help. You can find information about the following in this document:

["New Features in this Release"](#)

["Known Problems and Workarounds"](#)

["Documentation Updates"](#)

["Localization and Globalization"](#)

Support Matrix

For information about the installation requirements and compatibility with other products, see the *Support Matrix*. The support matrix may be updated between releases, and the latest version is only available at the HPE Support web site:

<https://softwaresupport.hpe.com/km/KM323488>

New Features in this Release

The OMi MP for SAP HANA works with Operations Manager i (OMi) and enables you to monitor SAP HANA database environments using the Business Service Management (BSM). It contains the following features:

- HANA Management Templates for the complete management of SAP HANA databases. It consists of HANA Aspects for monitoring the availability, health, and performance of SAP HANA databases.

- HANA Aspects comprising of policy templates for monitoring the SAP HANA databases.
- Parameterized artifacts for easy customization and deployment.
- The Indicators - Health Indicators (HIs) to analyze and categorize the events occurring in the databases and report the health status.
- Automated instance based deployment and configuration.

Installation Notes

The OMi MP for SAP HANA is available in the electronic media (e-media). The OMi MP for SAP HANA e-media contains the software and the product documentation. You can use the e-media to install the OMi MP for SAP HANA on BSM and OMi (Linux or Windows) Servers.

For information about installing the *OMi MP for SAP HANA*, see the *OMi MP for SAP HANA Installation Guide*.

The following table provides information about the documentation available with product package.

Document	Location	Purpose
Installation Guide	DOCUMENTATION\guides	Installation instructions
Online Help	<p>Available in the BSM 9.2x console Help menu.</p> <p>From the BSM console, go to Help > BSM Help > Application Administration > Operations Management > OMi Management Pack for SAP HANA.</p> <p>Available in the OMi 10.x console ? menu</p> <p>From the OMi console, go to ? > General Help > Administration Guide > Management Packs > Management Pack Documentation > OMi Management Pack for SAP HANA.</p>	<p>To provide information about the following:</p> <ul style="list-style-type: none"> • Using Management Templates • Using Aspects and Policy Templates • Using HIs

Known Problems and Workarounds

The reference number for each defect is the Quality Center change request (QCCR) number. For more information about defects, visit [HPE Software Support Online](#), or contact your HPE Support representative directly.

Title: BSM help does not appear.

Description: BSM Online Help does not appear due to incompatibility between BSM Help and OMi Management Pack Help in the following scenarios:

- When a BSM 9.2x system with OMi Management Pack for SAP HANA already installed is upgraded to BSM 9.25
- Or
- When OMi Management Pack for SAP HANA is installed on a BSM 9.25 system

Solution: To resolve this problem, install the **BSM 9.25 patch for OMi Management Pack** by following these steps:

1. Launch the HPE Software Support - <https://softwaresupport.hpe.com> and Sign in.
2. Click **Search**.
3. Select the relevant product, version and operation system (for example, Application Performance Management (BAC) > 9.25 > Windows).
4. Under **Document Type**, select **Patches**.
5. Locate the BSM 9.25 patch for OMi Management Pack.

Title: Monitoring Automation fails to undeploy Aspects from deleted Configuration Items (CIs) if properties are resolved from these CIs (**QCCR8D30525**).

Description: Undeployment of HANA Service Discovery Aspect removes the CIs but does not remove the assignments associated with the HANA Service Discovery Aspect. For more information, see **QCCR8D30525** for OMi. This is applicable for **BSM 9.24**.

Workaround: To resolve this problem, apply the patch (OMI_00068 / OMI_00069) on BSM 9.24.121.

Before undeploying the HANA Service Discovery Aspect, you must make sure to delete the CI assignments associated with the HANA Service Discovery Aspect. This is applicable for **BSM 9.24**.

Title: The License capacity is not updated under License Management for non-monitored nodes on BSM (**QCCR8D21568**).

Description: The License capacity is not updated under License Management on the BSM server when the license counts are reduced. For more information, see **QCCR8D21568** for OMi. This is applicable for **BSM 9.23**.

Workaround: To resolve this problem, apply hotfix for **QCCR8D21568**.

Title: After deployment, it takes around 20 minutes before collection starts (**QCCR1A177248**).

Description: After MP deployment, schedule task policies take around ~20 minutes to launch after deployment on Operations Agent versions 11.13 and 11.14.

Workaround: None

Documentation Updates

The first page of this document identifies the:

- Version number for the software
- Software release date

To check for recent updates or to verify that you are using the most recent edition, visit the [HPE Software Product Manuals](#) web site.

To retrieve a document, select the:

1. **Product** name.
2. **Version** list.
3. **Operating System**.
4. Preferred **Language**.
5. Document title.
6. Click **Open** or **Download**.

You must have Adobe® Reader installed to view files in PDF format (*.pdf). To download Adobe Reader, go to the [Adobe](#) web site.

Localization and Globalization

Localization is the process by which software applications are adapted to suit a specific local market or *locale*. Globalization is the process of designing products or services for the global marketplace so that they can be sold anywhere in the world with only minor revision.

HPE supplies OMi MP for SAP HANA localized software in these languages:
