This document is an overview of the first release of OMi MP for Vertica. It contains important information that is not included in books or Help. You can find information about the following in this document:

"New Features in this Release"

"Known Problems and Workarounds"

"Limitations"

"Documentation Updates"

Support Matrix

For information about the installation requirements and compatibility with other products, see the *Support Matrix*. The support matrix may be updated between releases, and the latest version is only available at the HPE Support web site:

https://softwaresupport.hpe.com/km/KM323488

New Features in this Release

OMi MP for Vertica works with OMi and enables you to monitor Vertica cluster databases operating in a Big Data environment using the Business Service Management (BSM). It contains the following features:

- Management Templates for a complete management solution of Vertica databases. It consists of aspects for monitoring the availability, health, and performance of Vertica database environments.
- Aspects comprising of policy templates for monitoring Vertica clusters.

- Parameterized artifacts for easy customization and deployment.

- Configuration Item (CI) based configuration and deployment.

Installation Notes

The OMi MP for Vertica is available in the electronic media (e-media). The OMi MP for Vertica e-media contains the software and the product documentation. You can use the e-media to install the OMi MP for Vertica on BSM and OMi (Linux or Windows) Servers.

For information about installing the *OMi MP for Vertica*, see the *OMi MP for Vertica Installation Guide*.

The following table provides information about the documentation available with product package.

User Guide	**DOCUMENTATION\guides**	
Release Notes	**DOCUMENTATION\releasenotes**	To provide information about the following: • Salient Features • Installation Notes

Known Problems and Workarounds

The reference number for each defect is the change request (QCCR) number. For more information about defects, visit HPE Software Support Online, or contact your HPE Support representative directly.

Title: BSM help does not appear.

Description: BSM Online Help does not appear due to incompatibility between BSM Help and OMi Management Pack Help in the following scenarios:

- When a BSM 9.2x system with OMi Management Pack for Vertica already installed is upgraded to BSM 9.25

  Or

- When OMi Management Pack for Vertica is installed on a BSM 9.25 system

Solution: To resolve this problem, install the **BSM 9.25 patch for OMi Management Pack** by following these steps:

1. Launch the HPE Software Support - https://softwaresupport.hpe.com and Sign in.

2. Click **Search**.

3. Select the relevant product, version and operation system (for example, Application Performance Management (BAC) > 9.25 > Windows).

4. Under **Document Type**, select **Patches**.

5. Locate the *BSM 9.25 patch for OMi Management Pack*.

Title: You are unable to launch tools from the CI.

Description: You are unable to launch tools from the CI. For more information, see **QCCR1A161405**.

Workaround: None.

Title: Content Pack definition of OMi MP for Vertica contains references to OMi MP for Oracle Database folders and missing references to OMi MP for Vertica folders.

Description: Content Pack definition of OMi MP for Vertica contains references to OMi MP for Oracle Database folders and missing references to OMi MP for Vertica folders. For more information, see **QCCR1A162346**.

Workaround: None.

Title: When you undeploy a Custom discovery policy, the node CIs that are referenced by discovered elements are deleted.

Description: When you undeploy a Custom discovery policy the node CIs that are referenced by discovered elements are deleted. For more information, see **QCCR1A161653**.

Workaround: None.

Title: After setting the Java path in PATH and JAVA_HOME environment variables, you must restart Operations agent.

Description: After setting the Java path in PATH and JAVA_HOME environment variables, you must restart Operations agent. For more information, see **QCCR1A162928**.

Workaround: None.

Title: Dependent parameters do not appear sometimes after you deploy the Vertica Management Template

Description: After you deploy the Vertica Management Template, the dependent parameters do not appear sometimes for further tuning under Assignments and Tuning.

Workaround: To resolve this problem, edit the parameters at the Aspect level for the corresponding Management Template. For more information, see **QCCR1A162664**.

Limitations

If you do not apply a license after the installation of OMi Management Pack for Vertica, the license report will not show the product entry.
