OMi Management Pack for Oracle WebLogic Release Notes

For Operations Manager i for Linux and Windows® operating systems

Software version: 1.00

Publication date: May 2017

This document is an overview of the first release of OMi Management Pack for Oracle WebLogic. It contains important information that is not included in books or Help. You can find information about the following in this document:

["New Features in this Release"](#)

["Known Problems and Workarounds"](#)

["Documentation Updates"](#)

["Localization and Globalization"](#)

Support Matrix

For information about the installation requirements and compatibility with other products, see the *Support Matrix*. The support matrix may be updated between releases, and the latest version is only available at the HPE Support web site:

<https://softwaresupport.hpe.com/km/KM323488>

New Features in this Release

The OMi MP for Oracle WebLogic works with Operations Manager i (OMi) and enables you to monitor Oracle WebLogic servers operating in your environment using the Business Service Management (BSM). It contains the following features:

- Out-of-the-box Management Templates and Aspects to monitor availability and performance of your Oracle WebLogic deployment.

- Indicators - Health Indicators (HIs), Event Type Indicators (ETIs), and Topology Based Event Correlation (TBEC) Rules that categorize and correlate the events based on the type of occurrence and report the health status of the Oracle WebLogic servers.

Installation Notes

The OMi MP for Oracle WebLogic is available in the electronic media (e-media). The OMi MP for Oracle WebLogic e-media contains the software and the product documentation. You can use the e-media to install the OMi MP for Oracle WebLogic on BSM and OMi (Linux or Windows) Servers.

For information about installing the *OMi MP for Oracle WebLogic*, see the *OMi MP for Oracle WebLogic Installation Guide*.

The following table provides information about the documentation available with product package.

Document	Location	Purpose
Installation Guide	DOCUMENTATION\guides	Installation instructions
Online Help	<p>From the BSM console, go to Help > BSM Help > Application Administration > Operations Management > OMi Management Pack for Oracle WebLogic.</p> <p>Available in the OMi 10.x console  menu</p> <p>From the OMi console, go to  > General Help > Administration Guide > Management Packs > Management Pack Documentation > OMi Management Pack for Oracle WebLogic.</p>	<p>To provide information about the following:</p> <ul style="list-style-type: none"> • Using Management Templates • Using Aspects and Policy Templates • Using Indicators - HIs, ETIs, and TBEC Rules
User Guide	DOCUMENTATION\guides

Known Problems and Workarounds

The reference number for each defect is the Quality Center change request (QCCR) number. For more information about defects, visit [HPE Software Support Online](#), or contact your HPE Support representative directly.

Title: Installation of OMi Management Pack for Oracle WebLogic on the BSM 9.25 system fails.

Description: Installation of OMi Management Pack for Oracle WebLogicMedia on the BSM 9.25 system fails.

Solution: To resolve this problem, install the **BSM 9.25 patch for OMi Management Pack** following these steps:

1. Launch the HPE Software Support - <https://softwaresupport.hpe.com> and Sign in.
2. Click **Search**.
3. Select the relevant product, version and operation system (for example, Application Performance Management (BAC) > 9.25 > Windows).
4. Under **Document Type**, select **Patches**.
5. Locate the **BSM 9.25 Patch for OMi Management Pack**.
6. Follow the installation instructions in the README.txt file in the patch package.

Title: BSM Online Help does not appear.

Description: BSM Online Help is not accessible when a BSM 9.2x system with OMi Management Pack for Oracle WebLogic already installed is upgraded to BSM 9.25.

Solution: To resolve this problem, install the **BSM 9.25 patch for OMi Management Pack** by following these steps:

1. Launch the HPE Software Support - <https://softwaresupport.hpe.com> and Sign in.
 2. Click **Search**.
 3. Select the relevant product, version and operation system (for example, Application Performance Management (BAC) > 9.25 > Windows).
 4. Under **Document Type**, select **Patches**.
 5. Locate the **BSM 9.25 patch for OMi Management Pack**.
-

Title: Monitoring Automation fails to undeploy Aspects from deleted Configuration Items (CIs) if properties are resolved from these CIs (**QCCR8D30525**).

Description: Undeployment of Weblogic Discovery Aspect removes the CIs but does not remove the assignments associated with the Weblogic Discovery Aspect. For more information, see **QCCR8D30525** for OMi. This is applicable for **BSM 9.24**.

Workaround: To resolve this problem, apply the patch (OMI_00068 / OMI_00069) on BSM 9.24.121.

Before undeploying the Weblogic Discovery Aspect, you must make sure to delete the CI assignments associated with the Weblogic Discovery Aspect. This is applicable for **BSM 9.24**.

Title: The License capacity is not updated under License Management for non-monitored nodes on BSM (**QCCR8D21568**).

Description: The License capacity is not updated under License Management on the BSM server when the license counts are reduced. For more information, see **QCCR8D21568** for OMi. This is applicable for **BSM 9.23**.

Workaround: To resolve this problem, apply hotfix for **QCCR8D21568**.

Title: libOvParam runtime link error for libovper1.so on Solaris (**QCCR1A175210**).

Description: OMi MP for Oracle WebLogic monitoring may not work on Solaris managed nodes. For more information, see **QCCR1A175210** for Operations Agent.

Workaround: To resolve this problem, apply hotfix for **QCCR1A175210**.

Title: WebLogic data sources are not created out-of-the-box solution (**QCCR1A173610**).

Description: WebLogic Configuration fails to create the data sources and to start the Collection manager process on all Windows platforms. For more information, see **QCCR1A173610** for Operations Agent.

Workaround: None.

Title: After deployment, it takes around 20 minutes before collection starts (**QCCR1A177248**).

Description: After MP deployment, schedule task policies take around ~20 minutes to launch after deployment on Operations Agent versions 11.13 and 11.14.

Workaround: None

Documentation Updates

The first page of this document identifies the:

- Version number for the software
- Software release date

To check for recent updates or to verify that you are using the most recent edition, visit the [HPE Software Product Manuals](#) web site.

To retrieve a document, select the:

1. **Product** name.
2. **Version** list.
3. **Operating System**.
4. Preferred **Language**.
5. Document title.
6. Click **Open** or **Download**.

You must have Adobe® Reader installed to view files in PDF format (*.pdf). To download Adobe Reader, go to the [Adobe](#) web site.

Localization and Globalization

Localization is the process by which software applications are adapted to suit a specific local market or *locale*. Globalization is the process of designing products or services for the global marketplace so that they can be sold anywhere in the world with only minor revision.

HPE supplies OMi MP for Oracle WebLogic localized software in these languages:

- English
- Simplified Chinese
- Japanese

HPE supplies OMi MP for Oracle WebLogic localized documentation in these languages:

- English
- Simplified Chinese
- Japanese
