HP Cloud Service Automation

HP CSA includes software products to provide full-stack platform capability for customers who do not require embedded HP Operations Orchestration (HP OO) function. HP Cloud Service Automation provides self-service provisioning and work-flow automation. HP Universal CMDB and HP ArcSight provide configuration management capability for software infrastructure, plus data collection and analysis.

Table 1. HP CSA Software

Product	Version
HP Cloud Service Automation	4.20
HP Universal CMDB	10.11
HP ArcSight Logger	6.0

IMPORTANT

This software replaces HP Cloud Service Automation Foundation Server (TD983AAE) by including the following:

- 10 OSInst Pack for managing 10 Operating System Instances (OSI) for HP CSA.
- License for Universal CMDB Foundation.
- Free unsupported ArcSight Logger license.

This software requires **one** of the following:

- A pre-existing, separate license for HP Operations Orchestration (HP OO) with at least the same number licenses as HP OO Virtual Machine 10 Node -TD703AAE or HP OO Server and Storage Node - TD702AAE.
- HP Cloud and Automation Express Edition.

HP Cloud Service Automation (HP CSA) provides cloud management software that makes it easy for your business to benefit from secure, compliant cloud services. With HP CSA, you can automate and simplify deployment and management of your choice of hybrid IT services.

Downloads and Content	HP Live Network
Support Matrix	System and Software Support Matrix

NOTE: Supports 10 Operating System Instances (OSI).

Included with the HP CSA Package

In addition to the core HP CSA software, you also receive entitlements for these software products.

HP Universal CMDB

HP Universal CMDB provides configuration management (CMS) capabilities, including tools to collect, store, manage, update, and present data about software and infrastructure services configuration.

Downloads and Content	HP Live Network
Support Matrix	Support Matrix

NOTE: HP Cloud Service Automation 10 OS Instance pack includes a limited HP Universal CMDB (UCMDB) Foundation license, which provides the right to use the UCMDB Server, the Data Flow Probe infrastructure, the UCMDB Admin UI, and the UCMDB Browser only in conjunction with HP Cloud Service Automation. The rights to use Universal Discovery, Configuration Manager, and UCMDB adapters for third-party repositories must be licensed separately.

HP ArcSight Logger

HP ArcSight Logger unifies the collection, storage, log analysis, and machine data from any device, vendor and source. Built in rules and reports enable monitoring, alerting, and forensic investigation of security events.

Downloads and Content	HP Live Network
Support Matrix	ArcSight Logger Tech Specs

NOTE: A free unsupported version of ArcSight Logger is available for six months, bringing true enterprise-class log management functionality. Using the free version, you can collect up to 750 MB of log data per day and store up to 500 GB of uncompressed logs (assuming average compression 10:1). The free version also comes with 90 days of phone and email support, followed by access to the ArcSight Logger user community
