Contents

HP Cloud and Automation Suite Ultimate Edition

The HP Cloud and Automation Suites are automation solutions for private and hybrid cloud environments. Each suite combines HP's industry-leading software to assist IT organizations in the rapid and consistent provisioning, deployment, and governance of applications and infrastructures.

HP Cloud and Automation Ultimate Suite Edition focuses on advanced features and scalable performance for larger enterprises. The Ultimate Edition's founding software solutions are HP Cloud Service Automation and HP Operations Orchestration, providing self-service provisioning and work-flow automation. HP IT Executive Scorecard adds a rich set of reporting and analytical tools to support IT compliance and governance. HP Server Automation Ultimate provides secure and scalable provisioning, configuring, and patching automation for servers; while HP Database and Middleware Automation provisions industry-leading database and middleware services.

With the HP Cloud and Automation Ultimate Edition, IT administrative tasks become more efficient, while IT support needs are much reduced. HP has bundled the strengths of five industry-leading automation products to ensure provisioning, configuring, and managing your cloud environment is secure, consistent, and easy to use.

Table 1. HP Cloud and Automation Ultimate Suite Edition Software

Product	Version
HP Cloud Service Automation	4.20
HP Operations Orchestration	10.20
HP IT Executive Scorecard	9.50
HP Server Automation Ultimate	10.10
HP Database and Middleware Automation	10.20

HP Cloud Service Automation

HP Cloud Service Automation (HP CSA) provides cloud management software that makes it easy for your business to benefit from secure, compliant cloud services. With HP CSA, you can automate and simplify deployment and management of your choice of hybrid IT services.

Website	HP Operations Orchestration
Support	HP Software Support (Patches and Product Documentation)
Downloads and Content	HP Live Network
Support Matrix	System Requirements

NOTE: Supports 10 OSI.

HP IT Executive Scorecard

HP IT Executive Scorecard (HP XS) automatically gathers metrics from diverse sources across your IT systems to build key performance indicators. HP XS gathers and consolidates the information, links it to a service hierarchy, and presents insights in near real time through business-friendly scorecards and dashboards that help you convey the value of IT.
