Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

<https://softwaresupport.hp.com>

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to:

<https://hpp12.passport.hp.com/hppcf/createuser.do>

Or click the **Register** link at the top of the HP Software Support page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Support

Visit the HP Software Support Online web site at: **<https://softwaresupport.hp.com>**

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<https://hpp12.passport.hp.com/hppcf/createuser.do>

To find more information about access levels, go to:

<https://softwaresupport.hp.com/web/softwaresupport/access-levels>

HP Software Solutions Now accesses the HPSW Solution and Integration Portal Web site. This site enables you to explore HP Product Solutions to meet your business needs, includes a full list of Integrations between HP Products, as well as a listing of ITIL Processes. The URL for this Web site is

<http://h20230.www2.hp.com/sc/solutions/index.jsp>

Storage Operations Manager Release Notes

for the Windows® and Linux® operating systems operating system.

Software version: 10.00

Publication date: March 2015

This document is an overview of the changes made to Storage Operations Manager (SOM). It contains important information that is not included in books or Help. You can find information about the following in this document:

["About This Release" on the next page](#)

["Installation " on page 7](#)

["Open Defects" on page 8](#)

Note: This document is updated as new information becomes available. To check for recent updates, or to verify that you are using the most recent edition of a document, go to:
<https://softwaresupport.hp.com/group/softwaresupport>

For more information, see ["Documentation Updates" on page 3](#).

Support Matrix

For information about the installation requirements and compatibility with other products, see the *SOM Support Matrix*.

The support matrix includes the following information:

- **Requirements**
 - Hardware
 - Operating System
 - Databases
 - Application Servers

- Web Servers
- Web Browsers and Plug-ins
- **Compatibility**
 - Languages
 - Internationalization Variances
 - Virtualization Products
 - High-Availability Products
 - HP Software Integrations
 - HP Software Coexistence
 - Other Software Coexistence
 - Performance and Sizing

About This Release

HP Storage Operations Manager (SOM) 10.00 is a new offering for storage resource management. Key benefits of SOM include:

- Heterogeneous device support with enablement for device and reporting updates between releases. For the supported devices, see the *SOM Device Support Matrix*.
- A rich set of environment capacity dashboards for easy visualization of your current storage availability.
- Topology views that highlight the connectivity in your storage network.
- Optimized storage device discovery and data collection with an appropriate default configuration.
- A high-performance HTML5 user interface that runs in modern web browsers.
- Simplified deployment: SOM is customer installable and configurable for quick time-to-value.
- Low cost of ownership with the embedded Postgres database that scales to support many environments.
- High performance enterprise reporting with the bundled HP Service Health Reporter.
- High scale: Each SOM management server can manage a large number of storage devices. For specific numbers, see the *SOM Support Matrix*.

Installation

You can find steps to install SOM in the *Storage Operations Manager 10.00 Interactive Installation Guide* at the root of the product installation media.

Open Defects

The reference number for each defect is the change request (QCCR) number. For more information about open defects, visit [HP Software Support Online](#), or contact your HP Support representative directly.

Localization and Globalization Known Issues

The following known issues apply to SOM running in a non-English language.

Title: English text in the SOM installer.

Description: Some messages in the pre-installation checks are not localized.

Title: Date and time values are displayed in the English format not the local date and time format.

Description: Dates and times are not localized.

Title: Command-line output is in English.

Description: The SOM command line interface is not localized. While the commands can accept localized language inputs as parameter values, all command output is in English.

Title: English text in the localized product.

Description: The following text strings cannot be localized and are always shown in English:

- Java runtime exceptions such as "Unknown type"
 - Device profile names
 - The contents of the Description field for the properties of a data collection control.
-

Title: The SOM content pack installer is available in English and not in any other languages.

Description: The SOM reports have been localized into the same languages as the SOM management server software. The SOMcontent pack installer is not available in these languages.

Workaround: If the SOM reports have been localized to the locale of the SOM reporting server (the HP Service Health Reporter (SHR) system), the SOM content pack installer installs the SOM reports

in that language. Otherwise, the SOM content pack installer installs the SOM reports in English.

Title: The SOM content pack uninstaller is available in English and not in any other languages.

Description: The SOM content pack uninstaller is not available in other languages.

Workaround: Regardless of report language, run the English language SOM content pack uninstaller to remove the SOM reports from the SOM reporting server.

Title: SOM report descriptions are in English.

Description: In SHR, the descriptions of reports delivered in the SOM content packs are not localized.

Title: Report prompts for raw measures are in English.

Description: When configuring the SOM performance statistics reports, the prompts and options for raw data measures are not localized.

Title: Graph labels are in English.

Description: Some labels on graphs in the SOM reports are not localized.

Title: Content pack tool tips are in English.

Description: The tool tips for SOM content packs in the SHR administration console are not localized.

General Product Known Issue

The following known issues apply to SOM running in any language.

QCCR1G53849

Title: 404 errors while navigating the product help.

Description: Some of links in the help navigation pane do not open the indicated topic. Instead the browser returns a 404 error.

Workaround: View the content in the *SOM User Guide*.

We appreciate your feedback!

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

Feedback on Release Notes, March 2015 (Storage Operations Manager 10.00)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to storage-management-doc-feedback@hp.com.
