In This Version

The following features are introduced with the HP Backup Navigator 9.10:

- New reports are introduced to cover the virtualization environment, drives, and HP Data Protector Scheduler functionality.
- User insight to the HP Backup Navigator functionality was enhanced with the possibility to view the events occurred in the HP Backup Navigator including error states and failures. For each HP Backup Navigator event, you can configure monitors to trigger notifications on the specified events.
- PostgreSQL database is introduced as an HP Backup Navigator database. The migration from MariaDB to PostgreSQL is performed automatically during the upgrade.
- A new license type is introduced. Besides the capacity based license, a lite edition for smaller and medium backup environments is introduced. The HP Backup Navigator lite license can be used with the single Cell Manager environments that do not exceed 10 TB.
- Database maintenance is improved with the possibility to delete old database entries.

Supported Environments

HP Backup Navigator runs in the operating system environments listed in the *HP Backup Navigator Support Matrix*. For more information, see [Installation Notes](#).

Limitations and Workarounds

This release contains additional limitations:

- The amount of available media space in the Media Pool Capacity report is not calculated correctly for media pools containing dedupe media and file library media. The capacity for this media cannot be detected up-front.

Documentation Updates

The first page of this release notes document contains the following identifying information:

- Version number, which indicates the software version.
- Publish date, which changes each time the document is updated.

To check for recent updates or to verify that you are using the most recent edition, visit the following URL:

<http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign-in. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

NOTE: To view files in PDF format (*.pdf), Adobe Acrobat Reader must be installed on your system. To download Adobe Acrobat Reader, go to the following web site:

<http://www.adobe.com/>

Installation Notes

Installation requirements, as well as instructions for installing HP Backup Navigator are documented in the “Installation and Configuration” chapter of the *HP Backup Navigator User’s Guide* provided in Adobe Acrobat (.pdf) format. After installation the document can be found at:

</opt/apache-tomcat/webapps/ROOT/resources/>

Support

You can visit the HP Software support web site at:

www.hp.com/go/hpsoftwaresupport

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online software support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers

- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require an active support contract. To find more information about support access levels, go to the following URL:

http://h20230.www2.hp.com/new_access_levels.jsp

To register for an HP Passport ID, go to the following URL:

<http://h20229.www2.hp.com/passport-registration.html>
