

# HP ALM

Software Version: 12.21

## Addins

---

Document Release Date: July 2015

Software Release Date: July 2015

The following HP ALM addins are available via HPLN

<b>Addin</b>	<b>Description</b>
<i>HP Sprinter</i>	HP Sprinter provides a suite of advanced features and tools that make manual testing more efficient and effective.
<i>HP Application Lifecycle Intelligence (ALI)</i>	Enables you to aggregate information from multiple ALM tools to establish complete traceability.
<i>QuickTest Professional Add-in</i>	Enables you to work with QuickTest Professional features in an HP ALM project.
<i>QuickTest Professional Add-in for Business Process Testing</i>	Enables you to work with QuickTest Professional business process testing features in an HP ALM project.
<i>Unified Functional Testing Add-in for ALM</i>	Enables you to work with Unified Functional Testing tests in an HP ALM project.
<i>Unified Functional Testing for Business Process Testing Add-in for ALM</i>	Enables you to work with QuickTest Professional business process testing features in an HP ALM project.
<i>HP Enterprise Integration Module for SAP</i>	Enables you to integrate SAP Solution Manager with HP ALM.
<i>HP Service Test Add-in</i>	Enables the integration of Quality Center and Service Test tests and enhances the capabilities of the Service Test Management extension.
<i>HP Service Test Management Extension</i>	Facilitates the testing of application components such as Web services, by storing, managing, and running them in HP ALM.

<i>Enterprise Collaboration for HP ALM</i>	HP Enterprise Collaboration (EC) enables HP ALM users to collaborate across different platforms and communicate through conversations. These conversations are associated with specific entities, such as requirements, tests, and defects.
<i>HP ALM Microsoft Word Add-in</i>	Enables you to export your existing test plan data or requirement data stored in Microsoft Word directly to HP ALM.
<i>HP ALM Microsoft Excel Add-in</i>	Enables you to export your existing tests, requirements, or defects stored in Microsoft Excel directly to HP ALM.
<i>HP ALM Business Views Microsoft Excel Add-in</i>	Enables you to create and populate Excel reports based on ALM Business Views.
<i>HP Screen Recorder Add-in</i>	Enables you to record what is displayed on your screen as a movie, and create a defect in HP ALM with the movie attached.
<i>HP ALM Explorer Add-in</i>	Enables HP ALM client users to run a browser-independent version of HP ALM.
<i>IDE Connector Customizer</i>	Enables you to perform customizations necessary for working with Application Lifecycle Intelligence for HP ALM.
<i>HP ALM Client MSI Generator</i>	Enables you to generate MSI files for locally deploying ALM client components on client machines.

<p><i>HP ALM Synchronizer</i></p>	<p>Enables synchronization between HP ALM and third-party products, including Rational ClearQuest, Rational RequisitePro and Microsoft Team Foundation Server. In addition, HP ALM Synchronizer Adapter SDK enables development of additional adapters to other third-party products.</p>
<p><i>Defects and Requirements Exchange with HP Service Manager/Service Center</i></p>	<p>Enables defects and requirements exchange between Service Manager/Service Center and HP ALM.</p>
<p><i>SOX IT Assessment Accelerator</i></p>	<p>Provides a predefined project template to assist you in testing for SOX compliance.</p>
<p><i>HP ALM Client Log Manager</i></p>	<p>The ALM Client Log Manager allows you to manage the ALM client logs.</p>
<p><i>HP ALM System Test Remote Agent</i></p>	<p>Enables you to run an HP ALM system test. You run a system test to retrieve a machine's system information, view a captured desktop image of a test run on a machine, or restart your computer.</p>
