Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
<i>Agent</i>	means that portion of the software that manages and is required for each physical or virtual PC, laptop, or Mac device for which backup is required.
<i>E-LTU and E-Media</i>	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<i>Instance</i>	means each implementation of the application installed on a Server.
<i>LTU</i>	means License To Use.
<i>Mirrored Server</i>	means the configuration of two identical Servers (OS Instances). that provide redundant storage of data and failover backup and retrieval service
<i>Operating System Instance or OS Instance or OSI</i>	means each implementation of the bootable program that can be installed onto a physical system or a partition, such as system Virtual Machines, virtual environments, virtual private servers, containers, guests and zones, within the physical system. A physical system can contain multiple Operating System Instances. A container means a system partition based on software rather than hardware. Guests means a VM system running on a host system where the host runs its own complete OS Instance (as opposed to a hypervisor), like VMware Workstation. Zone means Oracle/Sun Solaris specific nomenclature for a software partition which can run a virtual OS instance including but not limited to Sparse, native, and ipkg.
<i>Single Server or SVR</i>	means a designated computer system in which an Instance or Instances of the software is installed.
