Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to: **http://h20230.www2.hp.com/selfsolve/manuals**

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to: **http://h20229.www2.hp.com/passport-registration.html**

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Support

Visit the HP Software Support Online web site at: **http://www.hp.com/go/hpsoftwaresupport**

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

http://h20229.www2.hp.com/passport-registration.html

To find more information about access levels, go to:

http://h20230.www2.hp.com/new_access_levels.jsp

HP Software Solutions Now accesses the HPSW Solution and Integration Portal Web site. This site enables you to explore HP Product Solutions to meet your business needs, includes a full list of Integrations between HP Products, as well as a listing of ITIL Processes. The URL for this Web site is **http://h20230.www2.hp.com/sc/solutions/index.jsp**

About this PDF Version of Online Help

This document is a PDF version of the online help. This PDF file is provided so you can easily print multiple topics from the help information or read the online help in PDF format. Because this content was originally created to be viewed as online help in a web browser, some topics may not be formatted properly. Some interactive topics may not be present in this PDF version. Those topics can be successfully printed from within the online help.

Contents

HP SX Content Management

Concepts

Content packs are extension points to HP Service Exchange (HP SX). In collaboration with adapters, content packs enable HP SX to communicate with end-point systems such as HP Service Manager (HP SM) or HP Cloud Service Automation (HP CSA). A content pack is a ZIP or JAR file that can contain operation definitions, Free Marker templates, HP Operation Orchestration (HP OO) flows, and/or other configuration files. Content packs contain the order message lifecycle modeled in HP OO flows in request-to-fulfill (R2F) use cases. Content packs can be installed or uninstalled in HP Propel.

> **Tip**: Refer to the *HP Propel SX SDK Guide* for more information on Content Management.

The **Content Management** application allows you to view, download, upload and delete content packs in HP Propel. Upload and delete operations include upload or removal of relevant HP OO JAR files (HP OO content packs), and the merging of HP SX customizations into HP Propel.

Content Pack Structure

Though the structure of content packs differs, the following folders and files are typical:

- `oo` - folder containing the HP OO content pack(s) of custom HP OO flow(s)

- `sx` - folder containing HP SX-specific configuration files

- `template` - folder containing Free Marker templates

- `operations.json` - file containing HP SX operation definitions

- `flows.json` - file containing the mapping of adapter and message type to OO flow

- `metadata.json` - the content pack description file

Examples with different content pack structures:

- HP SM content packs contain an `sm` folder for the customization HP SM unload files.

- Ticketing content packs do not contain OO flows (HP OO content packs), so the `oo` folder and `flows.json` file are not present.

Tasks

The HP Propel administrator can perform the following tasks from the **Content Management** application:

- "View Content Packs" below

- "Download Content Pack" below

- "Upload Content Pack" on the next page

- "Delete Content Pack" on the next page

View Content Packs

To view content packs in HP Propel:

1. From the Launchpad in HP Propel, click the **Content Management** application. The list of content packs is displayed in the **Content Pack List**.

2. See Content Packs List for detailed information about a content pack.

Download Content Pack

To download a content pack from HP Propel:

1. From the Launchpad in HP Propel, click the **Content Management** application. The list of content packs is displayed in the **Content Pack List**.

2. For the content pack to download, click ⋮ and select **Download**.

3. In the confirmation dialog, confirm downloading the content pack.

The content pack is downloaded into HP Propel.

Upload Content Pack

To upload a content pack into HP Propel:

1. From the Launchpad in HP Propel, click the **Content Management** application. The list of content packs is displayed in the **Content Pack List**.

2. Click **Upload New Content Pack**.

3. Locate and select the `.zip` or `.jar` file to be uploaded.

4. Click **Open**.

When the upload is complete, a confirmation appears near the top of the **Content Management** view. The upload time for the content pack is updated.

> **Note:** When uploading a content pack that was previously loaded, HP SX replaces the existing version. Content packs are identified by an ID attribute provided in their metadata file.

Delete Content Pack

To delete a content pack from HP Propel:

1. From the Launchpad in HP Propel, click the **Content Management** application. The list of content packs is displayed in the **Content Pack List**.

2. For the content pack to delete, click ⋮ and select **Delete**.

3. In the confirmation dialog, confirm deleting the content pack.

The content pack is deleted from HP Propel.

Content Packs List

The **Content Pack List** view provides the following detailed information. This information is user defined, and is extracted from the content pack's `metadata.json` file.

To view this detailed information, click the content pack in the **Content Pack List** view.

Value	Description
Content Pack ID	The content pack's unique identifier.

Value	Description
Version	The user-defined content pack version number. **Note**: Update the version before uploading or re-uploading a content pack.
Adapter	The HP Propel adapter that the content pack was created for.
Features	The user-defined features for the content pack. **Note**: Update the features before uploading or re-uploading a content pack.
OO Content Pack	The HP Operations Orchestration content pack.

Tip: Refer to the *HP Propel SX SDK Guide* for more information on Content Management and content packs.

Send Documentation Feedback

If you have comments about this document, you can contact the documentation team by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

Feedback on Content Management Help (Propel 2.01)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to Propel_IE@hp.com.

We appreciate your feedback!
