### Trademark Notices

Adobe™ is a trademark of Adobe Systems Incorporated.

Microsoft® and Windows® are U.S. registered trademarks of Microsoft Corporation.

UNIX® is a registered trademark of The Open Group.

This product includes an interface of the 'zlib' general purpose compression library, which is Copyright © 1995-2002 Jean-loup Gailly and Mark Adler.

## Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to: <http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to: <http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

## Support

Visit the HP Software Support Online web site at: <https://softwaresupport.hp.com/>

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

To find more information about access levels, go to:

[http://h20230.www2.hp.com/new\\_access\\_levels.jsp](http://h20230.www2.hp.com/new_access_levels.jsp)

**HP Software Solutions Now** accesses the HPSW Solution and Integration Portal Web site. This site enables you to explore HP Product Solutions to meet your business needs, includes a full list of Integrations between HP Products, as well as a listing of ITIL Processes. The URL for this Web site is <http://h20230.www2.hp.com/sc/solutions/index.jsp>

## Introduction

This document provides an overview of the HP Operations Orchestration Business Applications Content Pack 1.3.0 release. It contains important information that is not included in the manuals or in the online help.

This release supports the following languages:

- en - English
- fr - French
- de - German
- ja - Japanese
- es - Spanish
- zh\_CN - Simplified Chinese

Business Applications Content Pack 1.3.0 is a cumulative Content Pack.

## Content Pack Integrations

The following table lists the integrations that the Business Applications content pack supports:

Integration	Versions
Exchange	Exchange 2000 Exchange 2003 (clustered or not) Exchange 2007 (clustered or not) Exchange 2010 Exchange 2013

## What's New

When interacting with a Microsoft Exchange server, use the generic **Powershell** operation under */Library/Operations/Exchange/<version specific>* folder, instead of loading the Exchange snap-in to this Powershell Script operation. For more information, see <http://www.get-exchange.info/2012/12/30/powershell-scripting-for-exchange-server-some-tips/>.

The HP Business Applications content pack now contains additional information that describes which content packs must be deployed along with the Business Applications content pack in order to function properly. The content pack dependency information is visible in HP Operations Orchestration starting with version 10.50.

## Deploying the Business Applications Content Pack

OO platform versions 10.00 and later support Business Applications Content Pack 1.3.0. However, it is recommended to deploy the Business Applications Content Pack 1.3.0 on an existing OO platform version of 10.50 or later.

For details on deploying a content pack, see "Importing Content Packs to a Project" in the *Studio Authoring Guide* and "Deploying a Content Pack" in the *Central User Guide*.

**Note:** For details on how to uninstall/roll back a content pack, see "Roll back to the last deployment" in the *HP OO Central User Guide*.

## Known Issues

For more information about known issues, visit HP Software Support Online, or contact your HP Support representative directly.

### **Flows in the Test Exchange folder occasionally do not behave as expected**

Depending on the Microsoft Exchange 2013 release version (for example, RTM, SP1, Cumulative Update 6), some API elements (such as Exchange Powershell cmdlets) may not work as expected or may fail when the target host of the operations and flows is an Exchange 2013 server that has only one role installed (either Client Access or Mailbox role but not both).

If the target host of the operations and flows is an Exchange 2013 server with both roles installed (Client Access and Mailbox) then this issue does not apply.

### **Exchange - Send emails with attachments**

The */Library/Operations/Exchange/Emails/Send Email* operation cannot send emails with attachments.

### **Microsoft Exchange 2010 and 2013 Move Mailbox Fails for Valid Inputs**

When running the operation with valid inputs, and there are no previous existing move requests for a mailbox on the Microsoft Exchange Server, the operation fails with the message that it cannot find the user identity for the mailbox to be moved.
