Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

<http://h20230.www2.hp.com/selfsolve/manuals>

This site requires that you register for an HP Passport and sign in. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

Or click the **New users - please register** link on the HP Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HP sales representative for details.

Support

Visit the HP Software Support Online web site at:

<http://www.hp.com/go/hpsoftwaresupport>

This web site provides contact information and details about the products, services, and support that HP Software offers.

HP Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HP support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<http://h20229.www2.hp.com/passport-registration.html>

To find more information about access levels, go to:

http://h20230.www2.hp.com/new_access_levels.jsp

Introduction

This document provides an overview of the HP Operations Orchestration IT Operations Content Pack 1.2.0 release. It contains important information that is not included in the manuals or in the online help.

This release supports the following languages:

- en - English
- fr - French
- de - German
- ja - Japanese
- es - Spanish
- zh_CN - Simplified Chinese

IT Operations Content Pack 1.2.0 is a cumulative Content Pack.

Content Pack Integrations

The following table lists the integrations that the IT Operations Content Pack supports:

Integration Name	Versions
TN3270	3.3+
Opalis	6.2.2
System Center Configuration Manager	2003, 2007, 2012
System Center Operations Manager	2007, 2012
System Center Orchestrator	2012
VMware vCenter Orchestrator (vCO)	4.0

What's New

- The IT Operations content pack now contains additional information that describes which content packs must be deployed along with the HP IT Operations content pack in order to function properly. The content pack dependency information is visible in HP Operations Orchestration starting with version 10.50.

Deploying the IT Operations Content Pack

You must deploy the HP Operations Orchestration IT Operations Content Pack 1.2.0 on an existing OO platform version of 10.00 or later. However, it is recommended that you deploy the IT Operations Content Pack 1.2.0 on an existing OO platform version of 10.50 or later.

For details on deploying a content pack, see "Importing Content Packs to a Project" in the *Studio Authoring Guide* and "Deploying a Content Pack" in the *Central User Guide*.

Known Issues

The reference number for each known issue is the Quality Center Change Request (QCCR) number.

For more information about known issues, visit HP Software Support Online, or contact your HP Support representative directly.

CR Number	Title	Description
QCCR1D159369	System Center Orchestrator authentication failure.	The operations from the Library/Integrations/Microsoft/System Center Orchestrator folder fail to run with a local user on a host included in a domain.
QCCR1D167191	VMware vCenter Orchestrator requires support for HTTPS certificate	VMware vCenter Orchestrator operations support https protocol, however there is currently no way to import the certificates at input. If you use the HTTPS protocol, the operation fails with a message indicating that a valid certificate was not found.
