

Additional License Authorizations

For HPE Security Atalla software products

Products and suites covered

PRODUCTS	E-LTU OR E-MEDIA AVAILABLE [*]	NON-PRODUCTION USE CATEGORY ^{**}
Adallom Cloud Protection Platform	Yes	Class 3
HP Atalla Cloud Encryption	Yes	Class 3
HP Atalla Information Protection and Control	Yes	Class 3
HP Atalla Network Security Processor	Yes ^{***}	N/A
HP Atalla Secure Configuration Assistant	No	N/A
HP Boxcar Software	Yes	Class 3
HP Enterprise Secure Key Manager	Yes	N/A
HP Network Security Processor Enhanced	Yes	Class 3

^{*} Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

^{**} Non-production use rights, if any, can be found at hpe.com/software/SWlicensing.

^{***} Only applicable to HP Atalla Network Security Processor Variant software.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
AKB	means Atalla Key Block which is a key management system.
Appliance or Appl	means an Instance of software loaded and pre-configured on a Server.
Application	means any software program that performs specific functional tasks other than the operation of the software system upon which the software program runs.
Application Server	means software that executes business or application logic that is made available to a web server for processing requests. Application Servers are typically J2EE application servers or .Net application servers.
Application User	means a single User authorized to use the functionality of the licensed software as integrated with a single unique Application.
Business Application	means a class of cloud applications that helps the enterprise run their business and business operations (e.g., HR, Supply Chain etc.)

TERM	DEFINITION
Business Platform Application	means a class of cloud applications that provide a platform, to which multiple software and solution Applications may integrate.
Client	means any applications or systems which provide functionality separate from that of the software while providing for the facility to connect to and interact with the software.
Cluster	means a group of servers or other resources that act like a single system and enable high availability and in some cases, load balancing and parallel processing.
Collaboration Application	means a class of cloud applications that provide collaboration across people in an organization (e.g., file sharing, chat, etc.)
CPU	means a system in a single integrated circuit package with one or more discrete processing Cores.
E-LTU and E-Media	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
IaaS Application	means a class of cloud applications that is a form of cloud computing and provides virtualized computing resources over the Internet.
Implementation	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
Instance	means each implementation of the application installed on a Server.
Interceptor	means a single integration of an Application via API or software development kit (SDK) implemented via a single Instance of the HP Atalla IPC Classification and Protection Server.
IT Application	means software that provides a specified set of functions to support an information technology infrastructure, for example antivirus, indexing, search, or archiving. Each application may run on one or more Servers or Clients
LTU	means License To Use.
Mailbox	means one Microsoft Exchange mailbox, or enabled email address.
MFK	means Master File Key which is the root cryptographic key.
Non-Stop System	means an HP high-end server.
NSP	means Network Security Processor.
Platform	means software that provides a base level of functionality to the User, upon which additional functionality may be added.
Platform User	means a single User authorized to use the applicable licensed Platform, to which multiple Applications may integrate.
Protected Data	means data which has had granular permissions applied to individual users or groups providing assignment of rights such as view, edit, print, copy or save, etc., and enforced via an information rights management system with encryption technology such as Microsoft Active Directory Rights Management Services (Microsoft AD RMS)
Server or Svr	means any designated computer system in which an Instance or Instances of the software is installed.
Shadow IT	means any IT systems and/or IT solutions built and used inside organizations without explicit approval from that organization's IT organization.
Term License to Use or Term LTU	means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M), One Year (1Y), Three Year (3Y), etc. Term LTU's are not perpetual licenses.
Term Support	means a fixed period support offering that is only valid during the time period of the associated Term LTU.
Unlimited Application User	means a single User authorized to use the functionality of the licensed software as integrated with Business Application, Business Platform Application and Collaboration Application.
User	means a user whose Use is restricted to the type of software that is being licensed.
User Pack	means a predetermined number of Users.
Variant	means legacy key wrapping technology software for NSP Appliance
Virtual Appliance	means Virtual Machine image designed to run on a virtualization platform (e.g., VirtualBox, Xen, VMware Workstation, Parallels Workstation).
Virtual Machine(s) or VM(s)	means a computer that does not physically exist but is simulated by another computer.

Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

Adallom Cloud Protection Platform

Adallom Cloud Protection Platform is licensed per Platform User and 1) per Application User or 2) per Unlimited Application User. A license is required for each User requiring usage of the Platform, each representing one Platform User. An additional license is required for Users to integrate Applications with the Platform. Purchase of an Application User license enables an Application User to integrate a Business Platform Application, Business Application or Collaboration Applications with the Platform. Purchase of an Unlimited Application User license enables an Unlimited Application User to integrate Business Platform Applications, Business Applications and Collaboration Applications with the Platform. When Adallom Cloud Protection Platform is used for the discovery of Shadow IT cloud Applications, only a per Application User license is required. Similarly, a license is required for each IaaS Application integrated with the platform, each representing one Application Instance.

HP Atalla Cloud Encryption

HP Atalla Cloud Encryption for Amazon Web Services is licensed per Virtual Appliance, only for use within your Amazon Web Services cloud environment. This software includes a subscription to the HP Atalla Cloud Encryption Virtual Key Management Service.

HP Atalla Cloud Encryption for VMware is licensed per Virtual Appliance, only for use within your VMware cloud environment. This software includes a subscription to the HP Atalla Cloud Encryption Virtual Key Management Service.

HP Atalla Cloud Encryption for HP Helion is licensed per Virtual Appliance, only for use within your HP Helion cloud environment. This software includes a subscription to the HP Atalla Cloud Encryption Virtual Key Management Service.

HP Atalla Cloud Encryption Agent for Amazon Web Services is licensed per Instance, only for use within your Amazon Web Services cloud environment on one Application Server.

HP Atalla Cloud Encryption Agent for VMware is licensed per Instance, only for use within your VMware cloud environment on one Application Server.

HP Atalla Cloud Encryption Agent for HP Helion is licensed per Instance, only for use within your HP Helion cloud environment on one Application Server.

HP Atalla Information Protection and Control

HP Atalla Information Protection and Control Enterprise is licensed per User.

HP Atalla Information Protection and Control Express is licensed per User.

HP Atalla Information Protection and Control Mobile is licensed per User.

HP Atalla Information Protection and Control Data Interceptors is licensed per User and Interceptor. A license is required for each User for each specific type of Interceptor.

HP Atalla Information Protection and Control Scanner is licensed per User.

HP Atalla Information Protection and Control Bridge is licensed per User.

HP Boxcar

HP Boxcar is licensed per CPU for Non-Stop Systems for the purpose of managing multiple NSP systems.

HP Enterprise Secure Key Manager

HP Enterprise Secure Key Manager (ESKM) is licensed per ESKM Client type (i.e: Storage, Tape Library, SAN Switch, Nonstop VLE, etc) and a separate license is required for each Client accessing the ESKM Cluster.

HP Atalla Network Security Processor

HP Atalla Network Security Processor is licensed by Appliance for either AKB or Variant.

HP Network Security Processor Enhanced is licensed by Appliance for either AKB or Variant.

HP Atalla Network Security Processor One Master File Key (MFK) is licensed by Appliance for AKB only.

HP Atalla Additional Function is licensed by Appliance for either AKB or Variant.

HP Atalla Custom Command is licensed by Appliance for either AKB or Variant.

HP Atalla Remote Key Support is licensed by Appliance for AKB only.

Additional license terms**TERM**

- | | |
|-----------|--|
| A. | Any licensing terms designated as being part of Porticor, Ltd that may be embedded in the HP Atalla Cloud Encryption software products are inapplicable in their entirety. |
| B. | Any licensing terms designated as being part of Secure Islands, Ltd that may be embedded in the HP Atalla Information Protection and Control software products are inapplicable in their entirety. |
| C. | Adallom Cloud Protection Platform software is governed by HP terms and conditions. |
