Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
Device *or* **Dev**	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
E-LTU *and* **E-Media**	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on Licensee's purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Internal Use	means access and Use of the software for purposes of supporting your internal operations or functions.
LTU	means License To Use.
Operations Bridge Reporter Node *or* **OBR Node**	means a real or virtual computer system, or a device (for example printer, router or bridge) in a network.
Operations Management Node *or* **OM Node**	means a real or virtual computer system, or a device (for example printer, router or bridge) in a network.
TB	means terabytes which designates the amount of physical capacity that can be managed.
Use	means to install, store, load, execute and display one copy of the software.

Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

HPE Operations Bridge Reporter (previously called HP Service Health Reporter)

HPE Operations Bridge Reporter (previously called HP Service Health Reporter) is licensed by Operations Bridge Reporter Node.

HPE Operations Bridge Reporter is available in the Standard Edition, which includes reporting, collection and customization for System and Event Reports only, and in the Advanced Edition, which includes reporting, collection and customization for all report packs that are available.

HPE Operations Bridge Reporter uses HP Vertica data storage with a limit of 1 TB (Terabyte) for every 50 Operations Bridge Reporter Nodes for the sole use with HPE Operations Bridge Reporter. Storage of any other data, requires separate purchases of the appropriate HP Vertica licenses.
