## 8. Enterprise Applications

### *Oracle E-Business Suite*

See [Integration Packs](#)

### *PeopleSoft Enterprise*

See [Integration Packs](#)

## 9. Integration Packs

HP Structured Data Manager software provides pre-built modules ('Integration Packs') for some of the Enterprise Applications. These Integration Packs allow for rapid implementation in environments running the Enterprise Applications, and address the most common high-growth areas in those applications.

Each Integration Pack supports a specific version of the supported Enterprise Application, as detailed in the tables below. If your version is not supported, please check with your HP Structured Data Manager software Product Marketing/Management representative: pre-built modules can be made available according to demand. Additionally, HP Information Management Professional Services Organization can deliver services-based solutions to address other areas with these Enterprise Applications, including custom tables.
