

Additional License Authorizations

For HPE Archiving and e-Discovery software products

Products and suites covered

PRODUCTS	E-LTU OR E-MEDIA AVAILABLE [*]	NON-PRODUCTION USE CATEGORY ^{**}
HP Consolidated Archive	Yes	Class 3
HP File Archiving	Yes	Class 3
HP Legal Hold	Yes	Class 3
HP Structured Data Manager (previously called HP Application information Optimizer)	Yes	Class 3

^{*} Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

^{**} Non-production use rights, if any, can be found at hpe.com/software/SWlicensing.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
Adapter	means the management adapter software to enable HPE software to properly interoperate during runtime with the designated application or technology.
Base	means primary software required to enable core functionality.
Cluster <i>or</i> Clustered Computer	means a group of servers or other resources that act like a single system and enable high availability and in some cases, load balancing and parallel processing. A clustered computer may also be referred to as a cluster node.
Concurrent Active Custodian	means a specific individual who is listed in an active hold notice at any point in time.
CPU	means a system that contains a single central processing unit with a single integrated circuit package with a single discrete processing core.
CPU Core <i>or</i> CRE	means each individual core where a CPU may have more than one core.
Database <i>or</i> DB	means a container which stores application data including table structure, stored procedures, and other functionality that runs on a Database Instance.
Database Instance	means a software application that has the sole purpose of acting as a container that hosts and executes one or more Databases.
Device <i>or</i> Dev	means an addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptops, handheld device or printer that resides within the range defined for interrogation and asset tracking.
E-LTU <i>and</i> E-Media	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Employee	means those personnel employed by you.

TERM	DEFINITION
GB	means gigabytes which designates the amount of physical capacity that can be managed.
Implementation	means an installation of the software on a single Server or installed on a Cluster of Servers which work together as a single installation of the software.
Instance	means each Implementation of the application installed on a Server.
Internal Use	means access and Use of the software for purposes of supporting your internal operations or functions.
LTU	means License To Use.
Named User <i>or</i> Nmd Usr	means a specific individual authorized by you to access the software regardless of whether they are actively using the software.
Repository	means a set of data locations that are grouped together for the purpose of data analysis and management.
Server <i>or</i> Svr	means any designated computer system in which an Instance or Instances of the software is installed.
Source <i>or</i> SRC	means the production Database being extracted or archived from.
TB	means terabytes which designates the amount of physical capacity that can be managed.
Term License to Use <i>or</i> Term LTU	means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month(1M), One Year(1Y) etc. Term LTU's are not perpetual licenses.
Unlimited	means without restrictions in terms of number of systems, devices or media, depending on the context.
Use	means to install, store, load, execute and display one copy of the software.

Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

HP Consolidated Archive

HP Consolidated Archive **Base** is licensed per Named User.

HP Consolidated Archive **Mail Search** is licensed per Named User.

HP Consolidated Archive **Discovery** is licensed per Named User.

HP Consolidated Archive **Supervisor** is licensed per Named User.

HP Consolidated Archive **Bloomberg Adapter** is licensed per Named User.

HP Consolidated Archive **Reuters Adapter** is licensed per Named User.

HP Consolidated Archive **IM Chat Adapter** is licensed per Named User.

HP Consolidated Archive **Mailbox Management with Folder Sync** is licensed per Named User.

HP Consolidated Archive **File Archive Base** is licensed per Instance.

HP Consolidated Archive **File Archive Storage** is licensed per Terabyte.

HP Consolidated Archive **SharePointCapture Base** is licensed per Instance.

HP Consolidated Archive **SharePointCapture Storage** is licensed per Terabyte.

HP File Archiving (previously called HP File Migration Agent)

All HP File Migration Agent software for HP Storage versions 2.x (Server or Cluster) include a license-to-use (LTU) to migrate and archive unlimited TB of data per Server or Cluster. For File Archiving software versions 3.x, up to 500 TB per Server or per Cluster may be migrated and archived. HP File Archiving version 3.x is licensed per TB of migrated and archived data. The LTUs available are for 1, 10 or 50 TB.

HP Legal Hold

HP Legal Hold **Server** is licensed per Server based upon number of Employees in the business active servers running the software.

HP Legal Hold Notice and Interview Processing Server is licensed per Server.

HP Legal Hold Notice and Interview Form Processing is licensed per Concurrent Active Custodian.

HP Legal Hold Collections and Preservation Policy Server is licensed per Server.

HP Legal Hold Indexed Volume Content is licensed per Gigabyte.

HP Legal Hold Non-indexed File Content Server is licensed per Server. Allows indexing of a limited quantity of documents with a single IDOL content server.

HP Legal Hold Desktop per Device is licensed per Device. Each Device on which this software is installed requires a license. Licenses are transferrable between Devices.

HP Structured Data Manager (previously called HP Application Information Optimizer and HP Database Archiving)

HP Structured Data Manager is licensed by Source Database. If multiple Databases exist on one physical Server, each Database to be archived is considered a Source Database and must have a separate license. For example if three Databases reside on one physical Server and only one will be archived with HP Structured Data Manager, only that one Database is considered a Source Database and requires a license. Licenses cannot be transferred between production Databases.

HP Structured Data Manager is only licensed per Source Platform to customers who purchased such licenses prior to December 1, 2013.

HP Structured Data Manager single Source Platform: includes the license-to-use (LTU) for archiving data from a production Database to an archive in either the form of another Database or a file. Licensing is determined by:

- The total number of CPU Cores that are being used by the production Database to be archived.
- If multiple Databases exist on one physical server, each Database to be archived must have a separate license. For example if 3 Databases reside on one physical server and only one will be archived with HP Structured Data Manager, only that 1 Database requires a license.
- If the production Database does not have a fixed number of CPU Cores allocated to it, in a partitioned or provisioned environment for example, the Database should be licensed for the maximum number of CPU Cores that the Database could use at any given time.
- If the production Database resides in an Oracle RAC environment, the Database should be licensed according to the total number of CPU Cores across nodes allocated to that production Database.

Licenses cannot be transferred between production Databases. License does not include HP Neoview as a production Source Database.

HP Structured Data Manager 5 Source Platform: includes the license-to-use (LTU) for archiving data from 1-5 production Databases to an archive in either the form of another Database or a file. This multi-Source license is determined by:

- The total number of production Databases between 1-5 to be archived.
- This multi-Source license does not consider the amount of CPU Cores on each of the individual Databases.

This license is strictly limited for use on 1-5 production Databases. Use of the software on 6 or more production Databases is in violation of the license. Licenses cannot be transferred between production Databases. License does not include HP Neoview as a production source Database.

HP Structured Data Manager 25 Source Platform: includes the license-to-use (LTU) for archiving data from 1-25 production Databases to an archive in either the form of another Database or a file. This multi-Source license is determined by:

- The total number of production Databases between 1-25 to be archived.
- This multi-Source license does not consider the amount of CPU Cores on each of the individual Databases.

This license is strictly limited for use on 1-25 production Databases. Use of the software on 26 or more production Databases is in violation of the license. Licenses cannot be transferred between production Databases. License does not include HP Neoview as a production source Database. Options for all pre-packaged application support modules (EBS or PSFT), Transparency and Archive Query Server are included.

HP Structured Data Manager Unlimited Source Platform: includes the license-to-use (LTU) for archiving data for an Unlimited number of production Databases to archives in either the form of another Database or a file. This multi-Source license is strictly limited to the legal entity that this license is being sold to. This multi-Source license does not consider the amount of CPU Cores on each of the individual Databases. License does not include HP Neoview. Options for all pre-packaged application support modules (EBS or PSFT), Transparency and Archive Query Server are included.

Additional license terms

TERM

- | | |
|-----------|--|
| A. | Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties. |
| B. | You shall install and use the software as authorized in the applicable agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the Supporting Material, specifications or an applicable agreement. |
| C. | Unless stated otherwise, you are authorized to Use one Device at a time for your Internal Use. |
| D. | Any licensing terms designated as being of Autonomy that may be embedded in the software are inapplicable in their entirety. |
