

# Additional License Authorizations

For HPE Security Atalla software products

## Products and suites covered

PRODUCTS	E-LTU OR E-MEDIA AVAILABLE <sup>*</sup>	NON-PRODUCTION USE CATEGORY <sup>**</sup>
HP Atalla Information Protection and Control	Yes	Class 3
HP Atalla Network Security Processor	Yes <sup>***</sup>	N/A
HP Atalla Secure Configuration Assistant	No	N/A
HP Boxcar Software	Yes	Class 3
HP Enterprise Secure Key Manager	Yes	N/A
HP Network Security Processor Enhanced	Yes	Class 3

<sup>\*</sup> Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

<sup>\*\*</sup> Non-production use rights, if any, can be found at [hpe.com/software/SWlicensing](https://hpe.com/software/SWlicensing).

<sup>\*\*\*</sup> Only applicable to HP Atalla Network Security Processor Variant software.

## Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
<b>AKB</b>	means Atalla Key Block which is a key management system.
<b>Appliance or Appl</b>	means an Instance of software loaded and pre-configured on a Server.
<b>Application</b>	means any software program that performs specific functional tasks other than the operation of the software system upon which the software program runs.
<b>Application Server</b>	means software that executes business or application logic that is made available to a web server for processing requests. Application Servers are typically J2EE application servers or .Net application servers.
<b>Application User</b>	means a single User authorized to use the functionality of the licensed software as integrated with a single unique Application.
<b>Business Application</b>	means a class of cloud applications that helps the enterprise run their business and business operations (e.g., HR, Supply Chain etc.)
<b>Client</b>	means any applications or systems which provide functionality separate from that of the software while providing for the facility to connect to and interact with the software.
<b>Cluster</b>	means a group of servers or other resources that act like a single system and enable high availability and in some cases, load balancing and parallel processing.
<b>CPU</b>	means a system in a single integrated circuit package with one or more discrete processing Cores.

TERM	DEFINITION
<b>E-LTU and E-Media</b>	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<b>Implementation</b>	means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software.
<b>Instance</b>	means each implementation of the application installed on a Server.
<b>Interceptor</b>	means a single integration of an Application via API or software development kit (SDK) implemented via a single Instance of the HP Atalla IPC Classification and Protection Server.
<b>IT Application</b>	means software that provides a specified set of functions to support an information technology infrastructure, for example antivirus, indexing, search, or archiving. Each application may run on one or more Servers or Clients
<b>LTU</b>	means License To Use.
<b>Mailbox</b>	means one Microsoft Exchange mailbox, or enabled email address.
<b>MFK</b>	means Master File Key which is the root cryptographic key.
<b>Non-Stop System</b>	means an HPE high-end server.
<b>NSP</b>	means Network Security Processor.
<b>Platform</b>	means software that provides a base level of functionality to the User, upon which additional functionality may be added.
<b>Platform User</b>	means a single User authorized to use the applicable licensed Platform, to which multiple Applications may integrate.
<b>Protected Data</b>	means data which has had granular permissions applied to individual users or groups providing assignment of rights such as view, edit, print, copy or save , etc., and enforced via an information rights management system with encryption technology such as Microsoft Active Directory Rights Management Services (Microsoft AD RMS)
<b>Server orSvr</b>	means any designated computer system in which an Instance or Instances of the software is installed.
<b>Term License to Use or Term LTU</b>	means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M), One Year (1Y), Three Year (3Y), etc. Term LTU's are not perpetual licenses.
<b>Term Support</b>	means a fixed period support offering that is only valid during the time period of the associated Term LTU.
<b>User</b>	means a user whose Use is restricted to the type of software that is being licensed.
<b>User Pack</b>	means a predetermined number of Users.
<b>Variant</b>	means legacy key wrapping technology software for NSP Appliance
<b>Virtual Appliance</b>	means Virtual Machine image designed to run on a virtualization platform (e.g, VirtualBox, Xen, VMware Workstation, Parallels Workstation).
<b>Virtual Machine(s) or VM(s)</b>	means a computer that does not physically exist but is simulated by another computer.

## Software specific license terms

Software products with software specific license terms are described below. Software products covered by this ALA document (as listed above) and not covered in this section do not have software specific license terms.

### HP Atalla Information Protection and Control

**HP Atalla Information Protection and Control Enterprise** is licensed per User.

**HP Atalla Information Protection and Control Express** is licensed per User.

**HP Atalla Information Protection and Control Mobile** is licensed per User.

**HP Atalla Information Protection and Control Data Interceptors** is licensed per User and Interceptor. A license is required for each User for each specific type of Interceptor.

**HP Atalla Information Protection and Control Scanner** is licensed per User.

**HP Atalla Information Protection and Control Bridge** is licensed per User.

**HP Boxcar**

HP Boxcar is licensed per CPU for Non-Stop Systems for the purpose of managing multiple NSP systems.

**HP Enterprise Secure Key Manager**

HP Enterprise Secure Key Manager (ESKM) is licensed per ESKM Client type (i.e: Storage, Tape Library, SAN Switch, Nonstop VLE, etc) and a separate license is required for each Client accessing the ESKM Cluster.

**HP Atalla Network Security Processor**

HP Atalla Network Security Processor is licensed by Appliance for either AKB or Variant.

HP Network Security Processor Enhanced is licensed by Appliance for either AKB or Variant.

HP Atalla Network Security Processor One Master File Key (MFK) is licensed by Appliance for AKB only.

HP Atalla Additional Function is licensed by Appliance for either AKB or Variant.

HP Atalla Custom Command is licensed by Appliance for either AKB or Variant.

HP Atalla Remote Key Support is licensed by Appliance for AKB only.

**Additional license terms****TERM**

- 
- A.** Any licensing terms designated as being part of Secure Islands, Ltd that may be embedded in the HP Atalla Information Protection and Control software products are inapplicable in their entirety.
