# HPE Network Automation Software

Software Version: 10.20  
Windows® and Linux® operating systems

## Fixed Defects Report

Document Release Date: July 2016  
Software Release Date: July 2016

## Legal Notices

### Warranty

The only warranties for HPE products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. HPE shall not be liable for technical or editorial errors or omissions contained herein.

The information contained herein is subject to change without notice.

### Restricted Rights Legend

Confidential computer software. Valid license from HPE required for possession, use or copying. Consistent with FAR 12.211 and 12.212, Commercial Computer Software, Computer Software Documentation, and Technical Data for Commercial Items are licensed to the U.S. Government under vendor's standard commercial license.

### Copyright Notice

© Copyright 2001-2016 Hewlett Packard Enterprise Development LP

### Trademark Notices

Adobe® is a trademark of Adobe Systems Incorporated.

AMD is a trademark of Advanced Micro Devices, Inc.

Intel® and Intel® Itanium® are trademarks of Intel Corporation in the U.S. and other countries.

Linux® is the registered trademark of Linus Torvalds in the U.S. and other countries.

Microsoft®, Windows®, and Windows Server® are U.S. registered trademarks of Microsoft Corporation.

Oracle and Java are registered trademarks of Oracle and/or its affiliates.

Red Hat® is a registered trademark of Red Hat, Inc. in the United States and other countries.

UNIX® is a registered trademark of The Open Group.

### Oracle Technology – Notice of Restricted Rights

Programs delivered subject to the DOD FAR Supplement are 'commercial computer software' and use, duplication, and disclosure of the programs, including documentation, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement. Otherwise, programs delivered subject to the Federal Acquisition Regulations are 'restricted computer software' and use, duplication, and disclosure of the programs, including documentation, shall be subject to the restrictions in FAR 52.227-19, Commercial Computer Software-Restricted Rights (June 1987). Oracle America, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

For the full Oracle license text, see the license-agreements directory on the NA product installer bundle.

## Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:  
<https://softwaresupport.hpe.com/group/softwaresupport/search-result?keyword=>.

This site requires an HP Passport account. If you do not have one, click the **Create an account** button on the HP Passport Sign in page.

## Support

Visit the HPE Software Support web site at: <https://softwaresupport.hpe.com>

This web site provides contact information and details about the products, services, and support that HPE Software offers.

HPE Software Support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HPE support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to <https://softwaresupport.hpe.com> and click **Register**.

To find more information about access levels, go to:

<https://softwaresupport.hpe.com/web/softwaresupport/access-levels>

# About This Document

This document is for the Windows® and Linux® operating systems.

**Software version:**10.20

**Publication date:** July 2016

This document is an overview of the defects fixed in HPE Network Automation Software (NA). This document contains the following information:

- ["Defects Fixed in This Release" on the next page](#)

# Defects Fixed in This Release

The reference number for each fixed defect is the change request (QCCR) number. For detailed information about the fixed defects, visit [HPE Software Support Online](#), or contact your Support representative.

The following table lists the defects fixed in this release:

## Fixed Defects

Defect	Symptom	Area of Modification
<a href="#">QCCR1B146043</a>	Huge number of events are generated from "Last Used Device Password Changed" when a snapshot/diagnostic task is executed on a device	Notification & Events
<a href="#">QCCR1B146017</a>	More than 60000 duplicate pruner tasks created in NA Core 6	Scheduler
<a href="#">QCCR1B145984</a>	Change the UsePollRead option for driver discovery from default to true	Core Application Server
<a href="#">QCCR1B145477</a>	Need to run the <code>snmp get</code> command as a user with specific permissions	CLI
<a href="#">QCCR1B145200</a>	The device home page displays an error message indicating that there is a problem accessing device even after the Snapshot task succeeds	Snapshots
<a href="#">QCCR1B142008</a>	The TACACS failover should work when the AUTH service is down	User Management
<a href="#">QCCR1B145105</a>	Running a skipped Update Device Software task throws an error	Core Application Server
<a href="#">QCCR1B145140</a>	NA should be able to re-run a policy compliance check task, select two or more devices to run against it, run it for a set of selected devices, and prevent it from re-running the entire inventory	Scheduler
<a href="#">QCCR1B145096</a>	To have the option to increase the configuration window size or to have horizontal scroll bars in the LDAP Setup Wizard	NA Console
<a href="#">QCCR1B145050</a>	In the Internet Explorer 11 browser, the 'Email Search Result' in the search results page works only once	Reporting
<a href="#">QCCR1B144785</a>	After upgrading from 9.22.02 to 10.11, many messages are displayed with the Sanitizing tag	Core Application Server

### Fixed Defects, continued

Defect	Symptom	Area of Modification
<a href="#">QCCR1B144833</a>	Update of the primary IP of a device fails under certain conditions	IP Handling
<a href="#">QCCR1B144626</a>	The \$tc_device_password\$ variable displays the password in clear text for advanced expect script	Core Application Server
<a href="#">QCCR1B144431</a>	Devices added via API do not inherit global Bastion host configuration	CLI
<a href="#">QCCR1B144367</a>	An error message indicating that the columns are ambiguously defined appears while integrating NA with CMDB	Database
<a href="#">QCCR1B144309</a>	The NA SPI installer doesn't handle the MS-SQL server named instance URLs	Installer
<a href="#">QCCR1B144093</a>	IP Address management errors appear in the server.log file	Snapshots
<a href="#">QCCR1B144050</a>	The Fortigate context devices do not inherit the device settings correctly	Core Application Server
<a href="#">QCCR1B144044</a>	Issues faced with the Discover Driver task in a virtual context	Device Management
<a href="#">QCCR1B143613</a>	NA takes time to launch data	Database
<a href="#">QCCR1B143838</a>	SOAP WSDL does not define __equivCode and __equivCodeCalculated	Integration API
<a href="#">QCCR1B142190</a>	Child task re-run contains one device group from the parent task	Scheduler
<a href="#">QCCR1B143303</a>	NA sends a 'Device Data Failure' event for skipped diagnostics	Notification & Events
<a href="#">QCCR1B142813</a>	System generates false events	Notification & Events
<a href="#">QCCR1B142393</a>	The TFTP server shows the Linux directory even when the file is not present	TFTP Server
<a href="#">QCCR1B142506</a>	NA SOAP API Stack Trace gets generated for some commands	Integration API
<a href="#">QCCR1B142166</a>	The SSH user ID and password are sent as variables (instead of the actual values) to the device	Driver Layer
<a href="#">QCCR1B140425</a>	TACACS expects NA to pass an IP address instead of FQDN for remote user address	Integration API
<a href="#">QCCR1B142045</a>	Increase the length of the 'Message To' field of the Event	Reporting

### Fixed Defects, continued

Defect	Symptom	Area of Modification
	Notification & Response Rule	
<a href="#">QCCR1B141696</a>	Tasks do not get equally distributed, and thus get queued up in the 'Waiting' state	Scheduler
<a href="#">QCCR1B141759</a>	The 'passwd' and 'enablepasswd' attributes do not get listed in the .wsdl file	CLI
<a href="#">QCCR1B140561</a>	NA Proxy fails to connect to a device via Telnet because of the \r+NULL extra character	Proxy Interface
<a href="#">QCCR1B141057</a>	After an NNMi-NA integration, the NA jboss_wrapper.log displays the 'ORA-12899: value too large for column' error when the NNMi password is moderately long. Equivalent errors occur in other databases as well	Database
<a href="#">QCCR1B140649</a>	Multiple cores go into the "Abnormal Shutdown" status	Core Application Server
<a href="#">QCCR1B140629</a>	NA 10.10 rejects the SA 10.10 certificate	NAS/SAS Integration
<a href="#">QCCR1B140604</a>	Issues with database connection when NA is integrated with NNMi	CLI
<a href="#">QCCR1B140488</a>	HTML tags appear in the Result field on the Task Search Results page	Reporting
<a href="#">QCCR1B140439</a>	User is unable to disable SCP without disabling SFTP	Core Application Server
<a href="#">QCCR1B139811</a>	Incorrect device port duplex mismatch detected on trunk ports	Notification & Events
<a href="#">QCCR1B140222</a>	Policy event is generated even when no changes have been made	Policy Manager
<a href="#">QCCR1B140223</a>	DatabaseDataMonitor errors received from all the production cores	Reporting
<a href="#">QCCR1B140040</a>	Performance issues lead to unreturned DB connections	Database
<a href="#">QCCR1B139752</a>	The DynamicDeviceGroupMonitor status displays an error	Device Groups
<a href="#">QCCR1B139802</a>	Report entries are missing in the Summary Report inventory tab when the number of devices is very large	Workflow

**Fixed Defects, continued**

<b>Defect</b>	<b>Symptom</b>	<b>Area of Modification</b>
<a href="#">QCCR1B139418</a>	The Topology and Duplex diagnostics fail after upgrade to NA 9.22.02	Scripting & Diagnostics
<a href="#">QCCR1B139565</a>	In NA/NNMi integration, when the user changes the management IP address of a device with multiple IP addresses to another on NNMi, it does not synchronize with NA properly	NAS/NNMi Integration
<a href="#">QCCR1B138637</a>	Unable to collect troubleshooting.zip from command line	Content
<a href="#">QCCR1B137624</a>	The Store Diagnostic data displays a warning even for successful commands	Scripting & Diagnostics
<a href="#">QCCR1B137120</a>	The NA Installer fails if the server.xml file contains only one connector	Installer
<a href="#">QCCR1B133869</a>	Duplicate proxy session login and logout messages are created in the audit_log .txt	Proxy Interface
<a href="#">QCCR1B132783</a>	The database table grows outrageously and thereby impacts the performances such as of the web console, search, reporting and SQL query	Database

# We appreciate your feedback!

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

**Feedback on Fixed Defects Report, July 2016 (Network Automation Software 10.20)**

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to [network-management-doc-feedback@hpe.com](mailto:network-management-doc-feedback@hpe.com).
