Documentation Updates

The title page of this document contains the following identifying information:

- · Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to: https://softwaresupport.hpe.com/.

This site requires that you register for an HPE Passport and to sign in. To register for an HPE Passport ID, click **Register** on the HPE Software Support site or click **Create an Account** on the HPE Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HPE sales representative for details.

Support

Visit the HPE Software Support site at: https://softwaresupport.hpe.com.

This website provides contact information and details about the products, services, and support that HPE Software offers.

HPE Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support website to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HPE support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HPE Passport user and to sign in. Many also require a support contract. To register for an HPE Passport ID, click **Register** on the HPE Support site or click **Create an Account** on the HPE Passport login page.

To find more information about access levels, go to: https://softwaresupport.hpe.com/web/softwaresupport/access-levels.

HPE Software Solutions Now accesses the HPE Software Solution and Integration Portal website. This site enables you to explore HPE Product Solutions to meet your business needs, includes a full list of Integrations between HPE Products, as well as a listing of ITIL Processes. The URL for this website is http://h20230.www2.hp.com/sc/solutions/index.jsp.

Chapter 1: Introduction

This chapter includes:

Who are the accessibility options intended for?	4
What are the accessibility options used for?	4

Who are the accessibility options intended for?

The accessibility options are intended for users who encounter difficulties viewing the standard Asset Manager user interface in Windows.

What are the accessibility options used for?

The accessibility options are used at different levels:

- Modifying the visual aspect
- Screen reader software
- Mouseless navigation

Chapter 2: Modifying the visual aspect

To improve your visual comfort, you can modify certain options in the Asset Manager Windows client:

- 1. Start the Asset Manager Windows client.
- 2. Connect to your database.
- 3. Display the options (**Edit/ Options** menu).
- 4. Modify the display options that can improve your visual comfort. These options are located in the following branches:
 - Accessibility
 - Display
 - Edit/ Colors
 - Lists
- 5. Exit the Asset Manager Windows client to save these options.

Chapter 3: Screen reader software

This chapter explains how to associate the Asset Manager Windows client with a screen reader.

Supported screen readers	. 6
Configuring Asset Manager to associate it with a screen reader	. 7
Configuring Asset Manager to associate it with JAWS	. 7
Configuring JAWS so that it translates visual information in Asset Manager into appropriate sound information	8
Customizing the behavior of JAWS	. 9
Advanced use: JAWS scripting and class mapping	. 9
Customizable files reference	. 10
Using screen reader software	10
Testing with Microsoft Narrator	. 10

Note: The help on fields and links, as well as the on-line help are recognized by screen reader software.

Supported screen readers

Asset Manager uses the MSAA standard to act as a server.

Software using this standard can act as MSAA clients of Asset Manager.

In particular, this is the case of:

- Microsoft Narrator
- Freedom Scientific JAWS

Configuring Asset Manager to associate it with a screen reader

- 1. Start the Asset Manager Windows client.
- 2. Connect to your database.
- 3. Display the options (Edit/ Options menu).
- 4. Modify the following options if appropriate:
 - Accessibility/ Modify the title of the application
 - Options in the Accessibility/ Screen reader tools/ MSAA branch
- 5. Exit the Asset Manager Windows client to save these options.

Configuring Asset Manager to associate it with JAWS

- 1. Start the Asset Manager Windows client.
- Connect to your database.
- 3. Display the options (Edit/ Options menu).
- 4. Set the Accessibility/ Screen reader tools/ JAWS/ Publish the Windows classes of the application option to Yes.
- 5. Exit the Asset Manager Windows client to save these options.

This configuration makes it possible to map the Asset Manager classes and the standard Windows classes.

JAWS is thus able to correctly identify the Asset Manager classes, thus enabling the scripts that we have provided.

You can modify these scripts.

Note: In the standard Windows terminology, a **window class** is a set of attributes that are used as a template by Windows to display a **window**.

The term **window** designates all types of objects that can be displayed: Frame, label, edit zone, and so on.

Each Windows **class** is associated with a procedure that processes all objects of the same class in the same way (behavior and display).

To avoid any confusion between the terms **window** and **screen**, we will use the term **class** to designate the objects displayed by Windows.

Configuring JAWS so that it translates visual information in Asset Manager into appropriate sound information

- 1. Install JAWS on the same computer as the Asset Manager windows client.
- 2. Start a Windows Explorer.
- 3. Go to the **JAWS** sub-folder of the Asset Manager installation folder. Example:
 - C:\Program Files\HPE\Asset Manager 9.60 xx\jaws
- 4. Copy the contents of the **JAWS** sub-folder (am.* files) to the Clipboard
- 5. Go to the **settings** sub-folder of the JAWS installation folder.
- 6. Go to one of the following sub-folders:
 - If you are using JAWS in English (Language/ JAWS Language/ English menu in JAWS):
 ENU sub-folder
 - Example: C:\Program Files\JAWS451\SETTINGS\ENU.
 - If you are using JAWS in French (Language/ JAWS Language/ French menu in JAWS):
 FRA sub-folder
 - Example: C:\Program Files\JAWS451\SETTINGS\FRA.
- 7. In this sub-folder, paste the files you have copied.

Using these files, JAWS can recognize the nature of the information coming from Asset Manager and translate it into appropriate sound information.

Customizing the behavior of JAWS

JAWS enables you to customize the way it translates visual information into sound information.

Refer to the JAWS documentation for instructions.

Advanced use: JAWS scripting and class mapping

To know the name of an Asset Manager class to be processed with JAWS:

- 1. Start the Asset Manager Windows client.
- 2. Connect to the database to be configured.
- 3. Display the options (Edit/ Options menu).
- Activate the Accessibility/ Screen reader tools/ JAWS/ Register the Windows application classes in a JCF file and type the full path of the file that will store the names of the classes displayed by Asset Manager.
- 5. Exit the Asset Manager Windows client to save these options.
- 6. Start the Asset Manager Windows client.
- 7. Connect to your database.
- Display the objects whose class names you want to know.
 The names and descriptions of the classes are saved in the file defined by the Accessibility/
 Screen reader tools/ JAWS/ Register the Windows application classes in a JCF file option.
 The saved file respects the JAWS JCF format.

Caution: The classes are only registered once they are displayed during an Asset Manager session.

To re-register a class, exit then relaunch Asset Manager; The classes will register again.

Customizable files reference

- am.jcf: Mapping table (lookup table) of Asset Manager classes and standard Windows classes (as recognized by JAWS)
- am.jsm: Text of messages used in the form of variables in am.jss
- am.jss: JAWS customization script for Asset Manager
- am.jsb: Compiled version of am.jss
- am.jkm: Mapping table (lookup table) of keyboard shortcuts and script functions in am.jss

Using screen reader software

Refer to the documentation of your screen reader for details on how to use this.

Testing with Microsoft Narrator

- Start the Asset Manager Windows client.
- 2. Connect to the demonstration database.
- 3. Display the options (Edit/ Options menu).
- 4. Set the Accessibility/ Screen reader tools/ MSAA compliance/ Notify activation of an MDI window option to Yes.
- 5. Populate the Accessibility/ Modify the title of the application option.
- 6. Exit the Asset Manager Windows client to save these options.
- 7. Start Microsoft Narrator (hold down both the Windows and U keys, then start Microsoft Narrator).
- 8. Start the Asset Manager Windows client.
- 9. Connect to the demonstration database.
- 10. Perform several test manipulations with Asset Manager.

Chapter 4: Mouseless navigation

General functions	12
Menus	13
Record list and detail windows	14
Wizards	23
Answer call	24
Modules	25
Database options	25
General options	26

This chapter explains how to navigate without using a mouse in the Asset Manager Windows client.

Conventions:

- **Button**: Graphical element of a dialog box
- Activate a button: This consists of pressing Enter or Return to execute the action corresponding
 to the button
- **Key**: Keyboard element
- Pressing a key: Consists simply of depressing a keyboard key

For more information on navigating in Asset Manager: See **Asset Manager - User Interface** guide, chapter **First steps with Asset Manager**.

The following is an example of reading tables taken from the table Mouseless navigation - General functions:

Intended action (followed by the context)	Corresponding manipulations
Refresh caches	Keyboard: Control + F5
(Application window)	

Desired action: Refresh the caches.

To do this, you must first select an object in the **Application window**. Doing this defines the context of the action.

Once the focus is placed on the required context, you can perform the described manipulation: Press the **Ctrl** + **F5** key combination.

General functions

Mouseless navigation - General functions

Corresponding manipulations	
 The Windows key Start/ Programs/ HPE/ Asset Manager 9.60 <language>/ Client menu</language> 	
 Start the Asset Manager Windows client Populate the Connection, Login and Password fields 	
3. Activate the Open button	
4. Asset Manager sometimes displays a dialog box just after connection. A sound signal warns you of this. If this signal is not accompanied by a sound, the dialog box might not be activated. Press the Alt + Tab key combination to enable the dialog box.	
Keyboard: Control + F5	
Keyboard: Control + P	
Keyboard: F1	
General menu: Help/ Index	
Keyboard: Alt + F4	

Menus

Mouseless navigation - Menus

Intended action (followed by the context)	Corresponding manipulations
Display the Resize and Move menu of the Asset Manager application window	Keyboard: Press and release the Alt , Down arrow and Up arrow keys successively
(Application window, no window within the application open)	
Display the Resize and Move menu of a window within the Asset Manager application window	Keyboard: Press and release the Alt , Down arrow and Up arrow keys successively
(Window)	
Select the menu bar	Keyboard: Alt
(Application window)	
Move from one option to another in the menu bar	Keyboard: Left arrow or Right arrow
(Menu bar option or menu entry)	
Display the drop-down menu of an option in the menu bar	Keyboard: Down arrow or Enter
(Menu bar option)	
Display a shortcut menu	Keyboard: Shift + F10 or Menu
(Window component)	
Move within a drop-down menu	Keyboard: Up arrow or Down arrow
(Menu entry)	
Display the shortcut menu enabling you to add, duplicate or delete a link appearing as a sub-tab	Displaying the shortcut menu that enables you to add, duplicate, or delete a link is not practical when the links are displayed in the form of sub-tabs.
	We recommend displaying the links in list form:
	Select any component of the current tab (except for the name of the tab itself)

Record list and detail windows

Mouseless navigation - List/ Detail windows

Intended action (followed by the context)	Corresponding manipulations	
Display the detail only	Keyboard: F7	
(List/Detail window)	General menu: Window/ Detail only	
	Shortcut menu: Detail only	
Display the list only	Keyboard: F6	
(List/Detail window)	General menu: Window/ List only	
	Shortcut menu: List only	
Display the list and the detail	Keyboard: F8	
(List/Detail window)	General menu: Window/ List and detail	
	Shortcut menu: List and detail	
Refresh the information in the list and detail	Keyboard: F5	
(List/Detail window)	General menu: Window/ Refresh	
Move the separator between the list and the detail (List/Detail window)	Keyboard: 1. Enable moving the separator bar by pressing the F8 key	
(Press the Up arrow and Down arrow keys to move the separator bar up or down	
	Confirm the new position of the separator by pressing Enter	

Record lists

Mouseless navigation - Main record lists

Intended action (followed by the context)	Corresponding manipulations
Create a record	Keyboard: Insert
(List zone)	

Mouseless navigation - Main record lists, continued

Intended action (followed by the context)	Corresponding manipulations
Delete a record	Keyboard: Del
(List zone)	
Select the current record in the list zone	Keyboard: Alt + F6
(List/Detail window)	Shortcut menu: Navigate to/ List
Displaying the records in the list without tree structure (List zone)	General menu: Window/ Table view
(2.01.20.10)	Shortcut menu: Table view
Displaying the records in the list with tree structure (List zone)	General menu: Window/ Tree view
(2.01.20.10)	Shortcut menu: Tree view
Select the record at the start of the list (taking all filters	Keyboard:
and sorts into account)	• Control + F11
(List/Detail window or list zone only)	• Home
	General menu: Edit/ Start
Select the record at the end of the list (taking all filters	Keyboard:
and sorts into account)	• Control + F12
(List/Detail window or list zone only)	• End
	General menu: Edit/ End
Select the next record in the list	General menu: Edit/ Next
(List/Detail window)	
Select the previous record in the list	General menu: Edit/ Previous
(List/Detail window)	
Display the previous list page (taking all filters and sorts into account)	Keyboard: Page up
(List zone)	
Display the next list page (taking all filters and sorts into account)	Keyboard: Page down
(List zone)	
Load the previous set of records	Shortcut menu: Load next/
(List zone)	Downward

Mouseless navigation - Main record lists, continued

Intended action (followed by the context)	Corresponding manipulations
Load the next set of records	Shortcut menu: Load next/ Upward
(List zone)	- P
Add a field or a link in the form of a column in the list zone	Shortcut menu: Add this column to the list
(Field or link edit zone)	
Remove a field or link from the columns in a list zone	Shortcut menu: Utilities/ Remove
(Column)	this column
Modify the width of columns to fill the exact width of the window. The space taken up by each individual column remains in proportion with the other columns.	Keyboard: F9
(List zone)	
Adjust the width of columns according to the width of the largest item of text contained in the column (for those records loaded in memory).	Keyboard: Control + F9
(List zone)	
Search for a record (taking all filters and sorts into account)	Keyboard: Control + G
(List zone sorted on the columns to be explored)	Shortcut menu: Go to
Select all records in a list	Keyboard: Control + A
(List/Detail window)	General menu: Edit/ Select all
Select a group of records	Keyboard: Hold down the Shift key
(First selected record in the list zone)	and extend the selection using the Down arrow or the Up arrow
Configure a record list	Shortcut menu: Utilities/
(List zone)	Configure list
Add a simple filter to a list	General menu: <table name="">/</table>
(List or List/Detail window zone)	Simple filter or <table name="">/ And/ Simple filter</table>
	Shortcut menu: Simple filter or And/ Simple filter
Add a simple filter to a field or a list	Shortcut menu: Filter on this field
(Field edit zone)	

Mouseless navigation - Main record lists, continued

Intended action (followed by the context)	Corresponding manipulations
Add a simple filter to a link or a list	Shortcut menu: Filter on this link
(Link edit zone)	
Add a query filter to a list (Field or link edit zone)	General menu: <table name="">/ Query filter or <table name="">/ And/ Query filter</table></table>
	Shortcut menu: Query filter or And/ Query filter
Group the records by a field	Shortcut menu: Group by this
(Field edit zone)	field
Group the records by a link	Shortcut menu: Group by this link
(Link edit zone)	
Refresh the status bar of the list (List zone)	Shortcut menu: Utilities/ Refresh status bar

Mouseless navigation - Lists within tabs

Intended action (followed by the context)	Corresponding manipulations
Display the list in the form of tabs (not recommended when using the mouse)	Shortcut menu: Display in tab-
(List zone)	
Display the list in table form (recommended for ease of use with the mouse)	Shortcut menu: Display in list-form
(List zone)	
Add a link	Shortcut menu: Add a link
(List zone)	
Duplicate a link	Shortcut menu: Duplicate
(List zone)	linked record
Delete a link	Shortcut menu: Delete link
(List zone)	
View detail of link	Shortcut menu: Show detail of
(List zone)	link

Mouseless navigation - Lists within tabs, continued

Intended action (followed by the context)	Corresponding manipulations
Copy links	Control + C key combination
(List zone)	Edit/ Copy menu
Cut links	Keyboard:
(List zone)	Control + X key combination
	2. Modify button
	General menu:
	1. Edit/ Cut menu
	2. Modify button
Paste links	Keyboard:
(List zone)	Control + V key combination
	2. Modify button
	General menu:
	1. Edit/ Paste menu
	2. Modify button
Delete links	Keyboard:
(List zone)	1. Delete key
	2. Modify button
	General menu:
	1. Edit/ Delete menu
	2. Modify button

Mouseless navigation - Lists in table form

Intended action (followed by the context)	Corresponding manipulations
Display a list in table form	Keyboard: Control + L
(List/Detail window)	
Select the previous record (taking all filters and sorts into	Keyboard:
account)	• F11
(List/Detail window or list zone only)	• Up arrow

Mouseless navigation - Lists in table form, continued

Intended action (followed by the context)	Corresponding manipulations
Select the next record (taking all filters and sorts into account) (List/Detail window or list zone only)	Keyboard: • F12 • Down arrow

Mouseless navigation - Lists in tree form

Intended action (followed by the context)	Corresponding manipulations	
Display a list in tree form	Keyboard: Control + T	
(List/Detail window)		
Unfold a whole list displayed in tree form	Shortcut menu: Unfold/ Two levels (or	
(List displayed as tree structure zone)	Three levels or AII)	
Fold a whole list displayed in tree form	Shortcut menu: Unfold/ One level	
(List displayed as tree structure zone)		
Activate or disactivate Left arrow and Right arrow	General menu:	
keys to unfold or fold a node in a tree structure	1. Edit/ Options menu	
(Application window)	Select the Lists/ Arrow keys used to open/close nodes in tree structures option	
	3. Set this option to Yes	
Navigation when the Lists/ Arrow keys used to open/close nodes in tree structures option (Edit/ Options menu) is selected		
Unfold a tree node	Keyboard: Right arrow	
(Tree-structured list)		
Fold a tree node	Keyboard: Left arrow	
(Tree-structured list)		
Select the parent	Keyboard: Left arrow	
(Tree-structured list)		
Select the next visible record	Keyboard: Down arrow	
(Tree-structured list)		
Select the previous visible record	Keyboard: Up arrow	
(Tree-structured list)		

Mouseless navigation - Lists in tree form, continued

Intended action (followed by the context)	Corresponding manipulations	
Select the next column	Keyboard: Shift + Right arrow	
(Tree-structured list)		
Select the previous column	Keyboard: Shift + Down arrow	
(Tree-structured list)		
Navigation when the Lists/ Arrow keys used to open/close nodes in tree structures option (Edit/ Options menu) is cleared		
Select the next column	Keyboard: Right arrow	
(Tree-structured list)		
Select the previous column	Keyboard: Left arrow	
(Tree-structured list)		
Unfold a node in the list displayed in tree form	Keyboard: +	
(Node)		
Fold a node in the list displayed in tree form	Keyboard: -	
(Node)		
Fully unfold a node in the list displayed in tree form	Keyboard: *	
(Node)		
Fully fold a node in the list displayed in tree form	Keyboard: /	
(Node)		

Record details

Mouseless navigation - Record detail

Intended action (followed by the context)	Corresponding manipulations
Select the first field or link of a detail zone	Keyboard: Alt + F7
(List/Detail window)	Shortcut menu: Navigate to/ Detail
Select the next field or link	Keyboard: Tab
(Field or link edit zone)	
Select the previous field or link	Keyboard: Shift + Tab

Mouseless navigation - Record detail, continued

Intended action (followed by the context)	Corresponding manipulations
(Field or link edit zone)	
Select the name of a tab or sub-tab (List/Detail window)	Keyboard: Hold down thhe Tab key until the name of the tab or the subtab is selected
Select the next tab	Keyboard: Control + Page down
(Any component of the current tab (tab, field, link or button name, for example) except the components of the sub-tabs of the current tab)	
Select the next tab	Shortcut menu: Next tab
(Name of the tab)	
Select the previous tab	Keyboard: Control + Page up
(Any component of the current tab (tab, field, link or button name, for example) except the components of the sub-tabs of the current tab)	
Select the previous tab	Shortcut menu: Previous tab
(Name of the tab)	
Configure the tab (Title of a tab or record zone)	General menu: Tools/ Configure tabs
(Title of a tab of record Zone)	Shortcut menu: Configure tabs
Select the first button of the button zone	Keyboard: Alt + F8
(List/Detail window)	Shortcut menu: Navigate to/ Buttons
Select the next button	Keyboard: Tab
(Button)	
Select the previous button	Keyboard: Shift + Tab
(Button)	
Activate a button	Keyboard: Enter
(Button)	

Mouseless navigation - Fields and links of a detail

Inten	ded action (followed by the context)	Corresponding manipulations	
Selec	ct a value in a drop-down list	Keyboard: Enter	

Mouseless navigation - Fields and links of a detail, continued

Intended action (followed by the context)	Corresponding manipulations
(Drop-down list)	
Configure the field or the link	Keyboard: Alt + Enter
(Field or link edit zone)	Shortcut menu: Configure object
Display help on the field or link	Keyboard: Shift + F1
(Field or link edit zone)	General menu: Help/ Help on this field
	Shortcut menu: Help on this field
Copy the text from a field or link to the Clipboard	Keyboard: Control + C
(Field or link edit zone)	General menu: Edit/ Copy
Paste text in a field or link	Keyboard: Control + V
(Field or link edit zone)	General menu: Edit/ Paste
Cut text in a field or link	Keyboard: Control + X
(Field or link edit zone)	General menu: Edit/ Cut
Delete text in a field or link	Keyboard: Del
(Field or link edit zone)	Shortcut menu: Edit/ Delete
Edit a Basic script	Keyboard: F4
(Script edit zone)	Shortcut menu: Zoom

Mouseless navigation - Fields of a detail

Intended action (followed by the context)	Corresponding manipulations
Display the drop-down list used to populate a field	Keyboard: Down arrow
(Field edit zone)	
Check or clear a checkbox	Keyboard: Spacebar
(Checkbox)	
Increment by one unit the value of a numeric field	Keyboard: Up arrow
(Number field edit zone)	
Activate the calculator	Keyboard: Alt + Down arrow
(Number field edit zone)	
Decrease the value of a numeric field	Keyboard: Down arrow

Mouseless navigation - Fields of a detail, continued

Intended action (followed by the context)	Corresponding manipulations
(Number field edit zone)	
Edit the value of a currency	Shortcut menu: Edit currency
(Money field edit zone)	
Set an alarm for a field	Shortcut menu: Edit alarm
(Date field edit zone)	
Insert the current date and time	Keyboard: Control +;
(Date or date and time field edit zone)	

Mouseless navigation - Links in a detail

Intended action (followed by the context)	Corresponding manipulations
Display the drop-down list used to populate a link	Keyboard: Alt + Down arrow
(Link edit zone)	
Select a link in a choice window instead of a drop-down list	Shortcut menu: Select link
(Link edit zone)	
Display the detail of a link	Keyboard: F4
(Link edit zone)	Shortcut menu: Show detail of link
Delete a link	Shortcut menu: Delete link
(Link edit zone)	

Wizards

Mouseless navigation - Wizards

Intended action (followed by the context)	Corresponding manipulations
Launch the wizard debugger	Keyboard: Shift + F9
(Wizard being executed)	

Answer call

Mouseless navigation - Answering calls	
Intended action (followed by the context)	Corresponding manipulations
Answer call	Keyboard: F2
(Application window)	General menu: Helpdesk/ Answer call
Refresh the information in the help zone straight away	Keyboard: F5
(Data-entry zone)	
Refresh the information in the data-entry zone straight away	Keyboard: F5
(Help zone)	
Moving from one field to another in the data- entry zone	Keyboard: Tab
(Data-entry zone field)	
Select the help zone	Keyboard: Alt + Right arrow
(Data-entry zone)	
Select the data entry zone	Keyboard: Alt + Left arrow
(Help zone)	
Select the Nth field of the data-entry zone (the fields are numbered 1 to 8 starting from the top)	Keyboard: Alt + x or Alt + Shift + x (depending on whether the shift-lock is activated) where x is a number from 1 to 8.
(Data-entry zone)	Note: You cannot use the numeric keypad.
Automatically populate the Type field (Data-entry zone)	Keyboard: Ctrl + x , where x is the shortcut character assigned to a problem type
	Note: You cannot use the numeric keypad.
Hide the data entry zone	Keyboard: F6
(Call-answer screen)	
Hide the help zone	Keyboard: F7
(Call-answer screen)	
Cycle between showing: The data entry zone	Keyboard: F8
	·

Mouseless navigation - Answering calls, continued

Intended action (followed by the context)	Corresponding manipulations
only, the help zone only, both zones	
(Call-answer screen) Activate or disactivate the button to the right	Shortcut menu: Sub-ticket creation mode
of the Ticket field (Open a new sub-ticket or complete an existing ticket)	
(Call-answer screen)	

Modules

Note: These are the same options as given in the File/ Manage modules menu.

Mouseless navigation - Modules

Intended action (followed by the context)	Corresponding manipulations
Moving within the enable/disable modules window	Keyboard: Up arrow or Down arrow
(Enable/Disable modules window)	
Select or deselect a module	Keyboard: Spacebar
(Module name)	

Database options

Note: These are the same options as given in the Adminstration/ Database options menu.

Mouseless navigation - Database options

Intended action (followed by the context)	Corresponding manipulations
Moving within the option edit window	Keyboard: Left arrow or Right arrow
(Option)	

General options

 $\textbf{Note:} \ \ \textbf{These are the same options as given in the } \textbf{Edit/ Options} \ \textbf{menu}.$

Mouseless navigation - General options

Intended action (followed by the context)	Corresponding manipulations
Edit the settings of an option	Keyboard:
(Option)	1. Shift + Spacebar
	 To replace the current value, type the new value directly, or: To change the current value, press Up arrow or Down arrow.
	3. To cancel any changes being made to the current option, press the Escape key
	4. To validate the current entry, press Enter

Send documentation feedback

If you have comments about this document, you can contact the documentation team by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

Feedback on Accessibility Options (Asset Manager 9.60)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to ovdoc-ITSM@hpe.com.

We appreciate your feedback!
