Documentation Updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for recent updates or to verify that you are using the most recent edition of a document, go to:

<https://softwaresupport.hpe.com/>

This site requires that you register for an HP Passport and sign-in. To register for an HP Passport ID, go to:

<https://hpp12.passport.hp.com/hppcf/createuser.do>

Or click the **Register** link at the top of the HP Software Support page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HPE sales representative for details.

Support

Visit the HPE Software Support web site at:

<https://softwaresupport.hpe.com/>

This Web site provides contact information and details about the products, services, and support that HPE Software offers.

HPE Software online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support web site to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Download software patches
- Manage support contracts
- Look up HPE support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require that you register as an HP Passport user and sign in. Many also require a support contract. To register for an HP Passport ID, go to:

<https://hpp12.passport.hp.com/hppcf/createuser.do>

To find more information about access levels, go to:

<https://softwaresupport.hpe.com/web/softwaresupport/access-levels>

New features	7

This document provides an overview of HPE Database and Middleware Automation Premium and Express Edition Capsules (HPE DMA) for the 10.50.000.000 release. There are no Fixed Issues or Enhancement Requests included in these Release Notes.

Release Highlights

HPE Database and Middleware Premium Edition (DMA Premium) and Express Edition (DMA Express) enable DBaaS and PaaS services using HPE Cloud Service Automation (CSA) and HPE Operations Orchestration (OO). The DMA Premium - Middleware and DMA Express - Middleware service designs simplify and accelerate the creation of the Middleware lifecycle service designs and implementation so that it can be consumed more easily by multiple business users and managed more quickly and consistently by application server administrators.

About Content Capsules

HPE CSA Content Capsules include new content and functionality for HPE CSA that can be added independent of platform releases. These contents and functionality consist primarily of resource offerings, service designs, HPE OO flows, and documentation.

Requirements

This implementation requires a fully configured and functioning environment as described in the following sections. Each component must be verified to work individually and as a complete solution.

- You must run the HP Cloud Content Capsule Installer on the server, where you installed HP CSA.
- You must have the Java SE Runtime Environment (JRE) version 8 or later installed on the server.
- If you use the Graphical UI, you must ensure that all the required graphics packages are configured on the server.
- The HP Cloud Content Capsule Installer is designed to work in graphical and non-graphical environment. A non-graphical (silent/headless-mode) installation process also exists. For information about silent mode, see the "Importing the capsule" topic in the HPE DMA *Middleware Capsule User Guide*.

Component	Supported version
HPE Cloud Service Automation	4.20, 4.50, 4.60
HPE Operations Orchestration	10.20, 10.22
HPE Operations Orchestration Content Packs	oo10-base-cp-1.4.3 oo10-cloud-cp-1.5.1 oo10-csa-cp-4.50.0000 Note: The latest content pack is available at HPE Live Network
