Documentation Updates

To check for recent updates or to verify that you are using the most recent edition of a document, go to: https://softwaresupport.hpe.com/.

This site requires that you register for an HPE Passport and to sign in. To register for an HPE Passport ID, click **Register** on the HPE Software Support site or click **Create an Account** on the HPE Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HPE sales representative for details.

Support

Visit the HPE Software Support site at: https://softwaresupport.hpe.com/.

Most of the support areas require that you register as an HPE Passport user and to sign in. Many also require a support contract. To register for an HPE Passport ID, click **Register** on the HPE Support site or click **Create an Account** on the HPE Passport login page.

To find more information about access levels, go to: https://softwaresupport.hpe.com/web/softwaresupport/access-levels.

HPE Software Solutions Now accesses the HPESW Solution and Integration Portal website. This site enables you to explore HPE Product Solutions to meet your business needs, includes a full list of Integrations between HPE Products, as well as a listing of ITIL Processes. The URL for this website is https://softwaresupport.hpe.com/km/KM01702731.

Contents

Introduction

This section provides an overview of the changes made to Data Center Automation Suite 2016.10 release.

For the most updated release notes, see the DCA Suite 2016.10 Release Notes on the HPE Software Support site.

For information about what was new in previous releases, use your HPE Passport Credentials to log in to the HPE Software Support site and use the Search button to search for a specific release note document.

This section contains the following important information not included in the manuals:

- What's new
- Fixed issues
- Known issues

Support and compatibility information

For the complete support and compatibility information for this release, see the DCA Suite 2016.10 Express and Premium compatibility matrices on the HPE Software Support site.

What's new in DCA Suite 2016.10

This section describes new functionality and other relevant release-specific information.

- The following embedded products have been updated:
  - Server Automation (SA) 10.50
  - Operations Orchestration (OO) 10.60
  - DCA Operations Portal for DCA virtual appliance

- An embedded product has been added (available during the trial period for Express edition of the Suite and with the Premium edition of the Suite):
  - IT Operations Compliance (ITOC) 1.20

- Trial license duration is 90 days.
- OO Content Packs have been updated to:
  - `oo10-base-cp-1.8.0`
  - `oo10-hpe-solutions-cp-1.8.2`
  - `oo10-cloud-cp-1.8.2`
  - `oo10-sa-cp-1.3.0.002`
  - `oo10.50-csa-integrations-cp-4.70.0000.jar`

Consult the Release Notes of the following embedded products for product-specific notes:

- Operations Orchestration 10.60
- Server Automation 10.50
- IT Operations Compliance 1.20

Fixed issues

QCCR1D	Symptom/Description
218268	The Provision servers offering was reported as failed when the Attach Business Service option was not selected.
218276	The `DCAA_Remediate_DG_Timeout` configuration item was missing from the DCAA Content Pack.
219479	ITOC flows did not run when using an external OO Central.
232506	`iptables` configuration was installed by default during the DCA or DCA suite setup.

Known issues

This section describes known issues in DCA Suite 2016.01. The table lists issues first alphabetically by subsystem, then numerically within each subsystem.

QCCR1D	Symptom/Description	Workaround
INSTALLATION AND SETUP		
195012	When the MD5 integrity check is skipped while reassembling the OVA file, some temporary files may be left over.	Delete the temporary files. No functionality is effected.
200728	Express setup application does not work if run from a network share.	Assign a drive letter to the network share before running the DCA installer.
202326	In the DCA installer, two buttons may not be localized: "Browse for folder" and "Make new folder".	This is dependent on the locale for the operating system itself. If the system is in the English locale, and the language for the installer is set to Simplified Chinese or Japanese, then this situation may occur.
USER INTERFACE		
202424	In the Operations Portal, some messages may appear in English although the user's locale is set to Simplified Chinese or Japanese.	No workaround exists. This issue will be resolved in a future release.
217263	The Operations Portal and IT Operations Compliance portals cannot be used simultaneously in the same browser.	No workaround exists.
OFFERING AND CONTENT		
202152	The Provision Server offering may list configuration options with gaps in the numbering for the options.	There is no workaround. The UI layer requires the numbering to provide ordering, and if the administrator hides one or more options from the operator user, then gaps may appear in the numbering scheme. This does not affect any functionality.
202963	Hostname prefix not being updated when provisioning Solaris. Setting the hostname through use of	The hpsa_netconfig attribute is not supported on Solaris. The workaround is to configure the hostname by

	the hpsa_netconfig custom attribute does not result in the correct hostname being set.	including a '--hostname' parameter in the Inject Personalization step in the Solaris OS build plan.
203090	In the Manage Server offering, Ubuntu patch policies are not displayed in the Patch policy section; instead, Ubuntu Patch policies are displayed as Software Policies.	You may remediate the Ubuntu patch policies via a Device Group.
216511	The SA ADT component may fail to contact the target server when the appliance is connected to two distinct networks, and the target server is not in the same subnet as the appliance.	The scanning problem can be resolved by performing the following steps: 1. Log into SA using the SA Client (NGUI). 2. Navigate to **Tools** > **Options** > **SA Agent installation** > **Advanced**. 3. Locate the parameters for the NMAP scanning tool. 4. Remove the "-S %GATEWAY_IP%" option from the NMAP parameters. 5. Save the changes.

Access to DCA Suite 2016.10 documentation

All DCA Suite 2016.10 documentation is available as individual documents on the HPE Software Support site. This site allows access to guides, release notes, support matrices, and white papers for all current and past releases. The HPE Software Support site requires an HPE Passport, which you can create once you access the site. After signing in, click the Search button and begin filtering documentation and knowledge documents using the filter panel.

Download the **Data Center Automation Suite 2016.10 Documentation Library**.

Send documentation feedback

If you have comments about this document, you can contact the documentation team by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

Feedback on Release Notes (Data Center Automation Suite 2016.10)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to hpedca-docs@hpe.com.

We appreciate your feedback!
