Documentation Updates

To check for recent updates or to verify that you are using the most recent edition of a document, go to: <https://softwaresupport.hpe.com/>.

This site requires that you register for an HPE Passport and to sign in. To register for an HPE Passport ID, click **Register** on the HPE Software Support site or click **Create an Account** on the HPE Passport login page.

You will also receive updated or new editions if you subscribe to the appropriate product support service. Contact your HPE sales representative for details.

Support

Visit the HPE Software Support site at: <https://softwaresupport.hpe.com/>.

Most of the support areas require that you register as an HPE Passport user and to sign in. Many also require a support contract. To register for an HPE Passport ID, click **Register** on the HPE Support site or click **Create an Account** on the HP Passport login page.

To find more information about access levels, go to: <https://softwaresupport.hpe.com/web/softwaresupport/access-levels>.

HPE Software Solutions Now accesses the HPSW Solution and Integration Portal website. This site enables you to explore HPE Product Solutions to meet your business needs, includes a full list of Integrations between HPE Products, as well as a listing of ITIL Processes. The URL for this website is <https://softwaresupport.hpe.com/km/KM01702731>.

Embedded Product Support Compatibility Matrices

DCA Suite 2016.10 - Express

10/27/2016

© Copyright 2016 Hewlett Packard Enterprise Development LP

Last Modified: October 25, 2016

This matrix does not contain all configuration and resource requirements. For more information, download the product Release Notes for this release from Hewlett Packard Enterprise Software Support Online.

Note: Service releases are implicitly supported by SA releases that support the original OS version. HPE support for any OS, listed or not, ends when the OS Vendor ends support for that platform.

Warranty

The only warranties for Hewlett Packard Enterprise products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Hewlett Packard Enterprise shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

Note: Platform support listed in the matrices applies to managed server targets only¹

Product	Compatibility matrix
DCA Operations Portal for DCA virtual appliance	Provides access to pre-integrated SA and OO.
Server Automation for DCA Suite 2016.10	Refer to Managed Server Platforms, Virtualization, Satellite Platforms, Java Client Platforms, Cross-Product Compatibility, Addendum-Provisioning Feature in this document.
Operations Orchestration 10.60	https://softwaresupport.hpe.com/km/KM02248774

¹ Except for SA Satellite support. SA Satellite is not preinstalled in the DCA virtual appliance.

DCA Virtual appliance Requirements

DCA Suite 2016.10 - Express

10/27/2016

Last Modified: October 25, 2016

This matrix does not contain all configuration and resource requirements. For more information, download the product Release Notes for this release from Hewlett Packard Enterprise Software Support Online.

Note: Service releases are implicitly supported by SA releases that support the original OS version. HPE support for any OS, listed or not, ends when the OS Vendor ends support for that platform.

Warranty

The only warranties for Hewlett Packard Enterprise products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Hewlett Packard Enterprise shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

DCA Virtual appliance requirements

* Virtual appliance deployment is supported through VMware vCenter (otherwise, the OVF parameters dialogue, which provides vital information for deployment, may not be displayed)

* Virtual appliance may be hosted on ESXi 5.1, 5.5, or 6.0

* A default deployed appliance has:

- * 8 CPUs
- * 32 GB RAM (in production environments, recommended memory is 32-48 GB)
- * 256 GB disk (thick/thin provisioning can be selected during deployment)
- * 2 network interfaces (at least one needs to be configured)
- * Other virtual hardware: default recommended options for the OS profile
- * Virtual machine version: 7[#]

* Virtual appliance synchronizes its time with the host it runs on through VMware Tools

[#] Version 7 is used by default for backwards compatibility. It can be upgraded to a newer version supported by the ESXi it runs on. For more details, see Virtual machine hardware versions (http://kb.vmware.com/selfservice/microsites/search.do?language=en_US&cmd=displayKC&externalId=1003746) and Upgrading a virtual machine to the latest hardware version (multiple versions) (http://kb.vmware.com/selfservice/microsites/search.do?language=en_US&cmd=displayKC&externalId=1010675)

VMware	ESXi 5.5	x86_64	GA	N	OSBP	N	N		
Vmware	ESXi 5.1	x86_64	GA	N	OSBP	N	N		"VMware ESXi 5.1, Patch ESXi510-201307401-BG: Updates esx-base and misc-drivers (2052144)" is required for use of ESXi Compliance feature
VMware	ESXi 5.0	x86_64	GA-U1	N	OSBP	N	N		
VMware	ESXi 4.1 Installable	x86_64	GA-U3	N	OSBP	N	N		

OS Vendor	Managed Platform ²	Architecture	Versions Supported	Agent	OS Provisioning ⁹	Patching ^{1,8}	Chef Integration ¹¹	Added in Release (before SA 10.50 if blank)	Notes
¹ Indicates server patching support. Options are: <ul style="list-style-type: none"> . Basic = simple patch remediation, but may not have full metadata (dependencies, supersedence, etc). . Extended = includes metadata support (dependencies, supersedence, etc.). . Full = includes integrated patch import from vendor. "N": no patching support is available 									
² The supported managed server platforms herein, are also supported in virtual machines when the virtual machine vendor also supports that version or release of the managed platform.									
³ Guest-domain Solaris LDOMs are supported for server management, but without virtualization management and OS provisioning. The solution at this point does not have any support for creating, starting or stopping LDOMs.									
⁴ On all marked platforms, SA Patching for Linux supports native YUM 3.0.1 or later.									
⁸ SA does not support Source RPM packages on any platforms that supports RPM									
⁹ Indicates OS Provisioning support. Options are: <ul style="list-style-type: none"> . OSBP = OS Build Plan support . No OS Prov = no OS provisioning support on this platform. 									
¹¹ SA supports the integration with Chef Solo 11.6.2-1 binaries									
¹² Chef integration is supported only starting with SLES 11 SP2									
¹³ On all marked platforms, SA is leveraging Zypper for patching.									
Solaris Note 1: Requires Patches: SUNWadmc, SUNWcsl, SUNWcslr (if available for the version), SUNWcsu, SUNWesu, SUNWlibms, SUNlibmsr (if available for the version), SUNWswmt									
Windows Note 1: Patching requires MSXML 3.0 (or later), IE 6.0 (or later), Windows Installer 3.1, Windows Update/Automatic Update should be set to Never Check for Updates/Turn off Automatic Updates.									
Platform Support on HPLN: Additional platform support may be added between releases and delivered as content via HP Live Network.									
Deprecation Note: For support deprecation and removal announcements, see the DCA 2016.10 Release Notes.									

Server Automation Virtualization Support

DCA Suite 2016.10 - Express

10/27/2016

© Copyright 2016 Hewlett Packard Enterprise Development LP

Last Modified: October 25, 2016

This matrix does not contain all configuration and resource requirements. For more information, download the product Release Notes for this release from Hewlett Packard Enterprise Software Support Online.
 Note: Service releases are implicitly supported by SA releases that support the original OS version. HPE Software support for any OS, listed or not, ends when the OS Vendor ends support for that platform.

Warranty

The only warranties for Hewlett Packard Enterprise products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Hewlett Packard Enterprise shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

OS Vendor	Hypervisor/ Virtualization Service	Architecture	OS Version	Actions Supported on Virtual Servers	Added in Release (before SA 10.50 if blank)	Notes
Microsoft ^{1,2,3,4}	SCVMM Server 2008 R2		See Microsoft documentation for supported OS	Create, Modify, Migrate, Convert to VM Template, Delete, Power On, Power Off, Pause, Suspend, Shut down guest for VMs Deploy VM from VM Template and Delete VM Templates		SCVMM integration only supports Hyper-V hypervisors. Please refer to Microsoft SCVMM documentation for supported Hyper- V versions.
Oracle	Solaris 11 Global Zone	x86_64	Solaris 11	Create, Modify, Start, Stop, Remove		
	Solaris 10 Global Zone	x86_64	Solaris 10	Create, Modify, Start, Stop, Remove		

Virtualization

OS Vendor	Hypervisor/ Virtualization Service	Architecture	OS Version	Actions Supported on Virtual Servers	Added in Release (before SA 10.50 if blank)	Notes
VMware ^{1,2,4}	vCenter 6.0 vCenter 5.5 vCenter 5.1 vCenter 5.0 vCenter 4.1 vCenter 4.0		See VMware documentation for supported OS ⁵ . Only Windows platforms are supported.	Create, Modify, Migrate, Clone, Convert to VM Template, Delete, Power On, Power Off, Suspend, Reset, Shut down guest, Restart guest for VMs Deploy VM from VM Template and Delete VM Templates		Please refer to VMware Vcenter documentation for supported Hypervisors

Please refer to the *Managed Server Platforms* matrix for SA features supported on Hypervisors running as managed servers.

¹ UAPI support for VMware ESX/ESXi and Microsoft HyperV servers are removed. Please refer to the release notes for details.

² New UAPI support for VMware vCenter and Microsoft SCVMM is available. Please refer to API documentation for more details.

³ Support for SCVMM requires use of Powershell 2.0. Other Powershell versions are not supported.

⁴ Support for vCenter and SCVMM is limited to features as documented in the SA User Guide. Please refer to the User Guide for more details.

⁵ vCenter Server Appliance (VCSA) 5.5 is not supported.

Deprecation Note: For support deprecation and removal announcements, see the DCA Release Notes.

Server Automation Satellite Server Support

DCA Suite 2016.10 - Express

10/27/2016

Last Modified: October 25, 2016

This matrix does not contain all configuration and resource requirements. For more information, download the product Release Notes for this release from Hewlett Packard Enterprise Software Support Online.
Note: Service releases are implicitly supported by SA releases that support the original OS version. HPE Software support for any OS, listed or not, ends when the OS Vendor ends support for that platform.

Warranty

The only warranties for Hewlett Packard Enterprise products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Hewlett Packard Enterprise shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

OS Vendor	Core Platform	Architecture	Versions Supported	Local File System	Added in Release (before SA 10.50 if blank)	Notes
CentOS	CentOS 6	x86_64	U5	ext4		
Novell	SuSE Linux Enterprise Server (SLES) 11	x86_64	SP2-SP3	ext4		
Oracle	Oracle Enterprise Linux (OEL) 6 ³	x86_64	U3-U5	ext4		
Red Hat	Red Hat Enterprise Linux (RHEL) 7 Server	x86_64	GA-U2	ext4,vxfs ²		
Red Hat	Red Hat Enterprise Linux (RHEL) 6 Server	x86_64	U3-U5	ext4,vxfs ²		

OS Vendor	Core Platform	Architecture	Versions Supported	Local File System	Added in Release (before SA 10.50 if blank)	Notes
Red Hat	Red Hat Enterprise Linux (RHEL) 5 Server ^{4, 6}	x86_64	U2-U10	ext3, vxfs ¹		
¹ This requires Veritas Storage Foundation Basic 5.0 MP3 RP2 or later.						
² This requires Veritas Storage Foundation Basic 6.01 or later.						
³ Supported with the RHEL compatible kernel only. The unbreakable kernel is not supported.						
⁴ Supported with IPv4 network configuration only. Does not support managing IPv6 servers.						
⁶ IMPORTANT Note about Red Hat 5.9, 6.3 and 6.4: If you are running a default RedHat 5.9, 6.3, 6.4 kernel, you must upgrade the kernel to a version that no longer has an issue with the SO_REUSEADDR socket semantics. This can be accomplished by installing the latest kernel from the RedHat errata advisory, or installing the next release of RedHat Linux, as described below:						
<ul style="list-style-type: none"> For RHEL 5.9, perform one of the following actions: <ul style="list-style-type: none"> use the latest version kernel, 2.6.18-348.16.1 or above. or upgrade to RHEL 5.10 						
				See Red Hat errata: http://rhn.redhat.com/errata/RHSA-2013-1166.html		
<ul style="list-style-type: none"> For RHEL 6.3 or 6.4, perform one of the following actions: <ul style="list-style-type: none"> use the latest version kernel, 2.6.32-358.18.1 or above. or upgrade to RHEL 6.5. 						
				See Red Hat errata: http://rhn.redhat.com/errata/RHSA-2013-1173.html		
⁷ On RHEL 7.2 you must upgrade systemd package to at least version 219-19.el7_2.4, otherwise the core services will not start automatically upon reboot. For more information, see errata https://rhn.redhat.com/errata/RHBA-2016-0199.html .						
General Notes						
Antivirus software is not supported on SA cores.						
IPMP (IP Multi-Pathing) and NIC bonding are supported on core and satellite servers.						
SAN (MPIO) is supported.						
Deprecation Note: For support deprecation and removal announcements, see the DCA Release Notes.						

Server Automation Java Client Support

DCA Suite 2016.10 - Express

10/27/2016

© Copyright 2016 Hewlett Packard Enterprise Development LP

Last Modified: October 25, 2016

This matrix does not contain all configuration and resource requirements. For more information, download the product Release Notes for this release from Hewlett Packard Enterprise Software Support Online.
Note: Service releases are implicitly supported by SA releases that support the original OS version. HPE Software support for any OS, listed or not, ends when the OS Vendor ends support for that platform.

Warranty

The only warranties for Hewlett Packard Enterprise products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Hewlett Packard Enterprise shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

Operating System	Architecture	Version	SA Compatibility	Notes
Windows Server 2010 R2	x86_64	GA	SA 10.1 or later	
Windows Server 2012	x86_64	GA	SA 10.1 or later	
Windows Server 2008 R2	x86_32 and x86_64	GA-SP2	SA 10.0 or later	
Windows 10	x86_32 and x86_64	GA	SA 10.5 or later	
Windows 7	x86_32 and x86_64	SP1	SA 10.0 or later	
Windows 8.x	x86_32 and x86_64	GA	SA 10.0 or later	

The minimum system requirements to run the SA Client are as follows:

- 1 GB of DRAM.
- 0.5 GB of disk space each for the SA Client and the SA Client Launcher.
- If using the SA Client to connect to a core with a residential DSL connection, a minimum 384 Kbps connection is recommended.
- You must be logged in as a user with sufficient permissions to install software on the computer. (You do not need to be an administrator user to install the launcher).
- Ensure that there are no running instances of the Launcher (if necessary, use the Windows Task Manager and kill all instances of javaw.exe).
- If you are upgrading, you must uninstall the previous SA Client Launcher version (using the Windows uninstall utility), and install the latest version.

Deprecation Note: For support deprecation and removal announcements, see the DCA Suite Release Notes.

Server Automation Cross-Product Compatibility
