

# HPE Security Product ANNOUNCEMENT

## RepSM EOL & RepSM Plus FAQ

### Version History

Ver. No.	Ver. Date	Revised By	Description	Reviewer	Status
0.1	12/08/16	C. Mesec	Initial Draft		

[Start the document here]

**Q: *When is the last day to purchase RepSM?***

A: *ArcSight Reputation Security Monitor product (RepSM) will no longer be available for sale on the HPE ESP ArcSight price list end of day December 11, 2016.*

**Q: *If I currently have RepSM, do I have to move to RepSM Plus?***

A: We are not forcing customers to change to RepSM Plus, however, there will be no updates or changes to the RepSM MIC or any other software components. If there is a problem, the only avenue for continuation of the threat feed will be to install RepSM Plus.

**Q: *Why will RepSM MICs or software not be supported in the future?***

A: RepSM software cannot be maintained. RepSM Plus is an exact equivalent product which provides the same features and capability.

**Q: *Why is the change being made for an equivalent product?***

A: RepSM, at its core is a Trend/Tipping Point threat feed. Now that Tipping Point is no longer an HPE entity, the goals of that product are different from the goals of ArcSight and HPE. The RepSM Plus product will be updated to fit the needs of ArcSight customers and the future direction of ArcSight.

**Q: *If I have RepSM and want to migrate to RepSM Plus, how much will it cost me?***

A: Existing RepSM customers with a valid subscription may migrate for free and use RepSM Plus until the end of their subscription term.

**Q: *Is RepSM Plus 'exactly' the same as RepSM?***

A: From the use and data content perspective, they are identical. There are differences in the ArcSight product lines that they support. RepSM has been primarily an ESM addition, RepSM Plus is available for the ArcSight ESM, ESM Appliance and Express product lines.

**Q: *I have ArcSight Appliances of the 7400 and 7500 series, can I purchase RepSM Plus?***

A: Yes, but for those 7400 and 7500 series, they must be upgraded in order to purchase RepSM Plus.

**Q: *Who do I contact if I want to migrate to RepSM Plus?***

A: Contact your HPE Security Sales representative or partner, they can assist you with the transition.

The following table provides some answers to common customer questions.

Feature/Item	RepSM	RepSM Plus	Comments
Content of reputation feed	Blacklists with domains, IP addresses, scoring and type of malware found at the site.	Blacklists with domains, IP addresses, scoring and type of malware found at the site	Exactly the same data and data schema. All existing ESM correlation rules will work seamlessly with no changes required.
Reputation Feed	Tipping Point – Trend Micro	HPE Security	
Media Interface Connector version	RepSM v 1.5	RepSM Plus v 1.6	
Upgrade script		Yes	
ESM products supported	ESM	ESM, ESM Appliance, Express	
Versions of ESM Supported		ESM v5.50, v5.60, v6.80, v6.90, v6.91 and above. Older versions of appliances 74xx and 75xx series will need upgrades to use RepSM Plus.
