HPE Visual Analytics (previously called HP Visual Analytics)	Yes	Class 4

^{*} Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

^{**} Non-production use rights, if any, can be found at www.hpe.com/software/SWlicensing.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

TERM	DEFINITION
<i>Cluster</i>	means a set of Instances created on one or more Servers for the express purpose of improving the capacity, performance or availability characteristics of a single Instance.
<i>Concurrent Media Asset</i>	means simultaneous use of more than one Media Asset at any point in time.
<i>Core</i>	means a part of a CPU that executes a single stream of compiled instruction code.

TERM	DEFINITION
CPU	means a system in a single integrated circuit package with one or more discrete processing Cores.
Document	means a text unit (and its associated metadata) that is independently returnable as a search result.
E-LTU and E-Media	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
GB	means gigabytes which designates the amount of physical capacity that can be managed.
Ingest Channel	means a single input to the analytics server that can handle one external source of Rich Media at a time
Instance	means each implementation of the application installed on a Server.
IDOL Raw Data Size	means the uncompressed size of all documents, including text and meta data, that are stored in a node table excluding any deleted documents that have not been purged.
LTU	means License To Use.
Media Asset	means a single file containing either video, audio or image content.
Rich Media	means video, audio or image content either as a file or continuous stream via IP.
Server or SVR	means any designated computer system in which an Instance or Instances of the software is installed.
TB	means terabytes which designates the amount of physical capacity that can be managed.
Term License to Use or Term LTU	means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M) , One Year (1Y) etc. Term LTUs are not perpetual licenses.
Term Support	means a fixed period support offering that is only valid during the time period of the associated Term LTU.
Unlimited or Unl	means without restrictions in terms of number of systems, devices or media, depending on the context.
User	means a user whose use is restricted to the type of software that is being licensed.

Software specific license terms

Software products with software specific license terms are described below.

HPE Audio Analytics (previously called HP Audio Analytics)

HPE Audio Analytics is a Rich Media Server licensed per Concurrent Ingest Channel and for that Ingest Channel any combination of the analytics can be applied. The features and functionality included in HP Audio Analytics are as follows:

Functions

- Speech to Text
- Phonetic Phrase Search
- Speaker Segmentation and Identification
- Spoken Language Identification
- Transcript Alignment
- Audio Quality and Classification
- Audio Fingerprint Identification
- Audio Security
- Language Customization
- Acoustic Adaptation

When combined with Visual Server licenses, Rich Media Server provides visual and audio analysis in one seamless package.

HPE Broadcast Monitoring (previously called HP Broadcast Monitoring)

HPE Broadcast Monitoring is licensed for 100 Ingest Channels allowing for an Unlimited number of Documents per Ingest Channel on an Unlimited number of CPUs and for an Unlimited number of Users, operating across a single Cluster. Documents remain available for three months. Each HPE IDOL Connector used counts as an Ingest Channel. The features and functionality included in HPE Broadcast Monitoring includes those in HPE IDOL Ultimate listed below as well as those in HP Media Management and Analysis Platform also listed below. HPE Broadcast Monitoring includes all HPE IDOL Standard Connectors and the RSS Connector.

HPE Broadcast Monitoring Social Media Connectors (previously called HP Broadcast Monitoring Social Media Connectors)

HPE Broadcast Monitoring Social Media Connectors are add-on modules that can be applied to HPE Broadcast Monitoring. They are licensed by number of HPE Broadcast Monitoring Social Media Connectors. A license key is for a specified number of HPE Broadcast Monitoring Social

Media Connectors. HPE Broadcast Monitoring Social Media Connectors include the ability to connect to and access data from repositories, on a polling basis. The following Connectors are HPE Broadcast Monitoring Social Media Connectors:

- Facebook
- Amazon
- Twitter
- LinkedIn
- Youtube
- Atom
- Quicrk
- Weibo
- Yahoo

HPE IDOL Connectors

HPE IDOL Standard Connectors

HPE IDOL Standard Connectors are included with HPE IDOL Express Search, HPE IDOL Premium Search and HPE IDOL Ultimate. They are not separately licensable. HPE IDOL Standard Connectors include the ability to connect to and access data from repositories. The following Connectors are HPE IDOL Standard Connectors:

- File System (all platforms)
- ODBC
- Web / HTTP

HPE IDOL Social Media Connectors

HPE IDOL Social Media Connectors are add-on modules that can be applied to HPE IDOL Premium Search and HPE IDOL Ultimate. They are licensed by number of HPE IDOL Social Media Connectors. A license key is for a specified number of HPE IDOL Social Media Connectors. To modify which specific Connectors are licensed, you must obtain a new license key. Modifications to Connector license keys can be done once per month.

HPE IDOL Social Media Connectors include the ability to connect to and access data from repositories, on a polling basis. The following Connectors are HPE IDOL Social Media Connectors:

- Facebook
- Amazon
- Twitter
- LinkedIn
- Youtube
- Atom
- Quicrk
- Web
- Yahoo

HPE IDOL Advanced Connectors

HPE IDOL Advanced Connectors are add-on modules that can be applied to HPE IDOL Premium Search and HPE IDOL Ultimate. They are licensed by number of HPE IDOL Advanced Connectors. A license key is for a specified number of HPE IDOL Advanced Connectors. To modify which specific Connectors are licensed, you must obtain a new license key. Modifications to Connector license keys can be done once per month.

HPE IDOL Advanced Connectors include the ability to connect to and access data from repositories. The following Connectors are HPE IDOL Advanced Connectors:

- Box
- Chatter
- Confluence
- DataSift
- Documentum
- Dropbox
- Evernote
- Exchange
- Exchange WS
- FTP
- Gnip
- Google Drive
- IMAP
- Jive
- Lithium
- Lotus Notes
- OData
- OneDrive
- Oracle
- Oracle UCM
- POP3
- RSS
- Salesforce
- SharePoint
- SharePoint Remote
- Skype for Business (OCS / Lync)
- SourceOne
- Storeall
- Twitter streaming

HPE IDOL Plus Connectors

HPE IDOL Plus Connectors are add-on modules that can be applied to HPE IDOL Premium Search and HPE IDOL Ultimate. They are licensed by number of HPE IDOL Plus Connectors. A license key is for a specified number of HPE IDOL Plus Connectors. To modify which specific Connectors are licensed, you must obtain a new license key. Modifications to Connector license keys can be done no more often than once per month.

HPE IDOL Plus Connectors include the ability to connect to and access data from repositories. The following Connectors are HPE IDOL Plus Connectors:

- Alfresco
- CMIS
- Digital Safe
- Drupal
- Documentum PLUS(+)
- Ektron
- Enovia
- Enterprise Vault
- eRoom
- Exchange PLUS(+)
- FileNet P8 PLUS(+)
- Hadoop
- HP Object Store
- IBM Content Manager
- IBM Seedlist
- JIRA
- LiveLink
- Lotus Notes PLUS(+)
- OpenText / Hummingbird
- SAP NetWeaver
- SharePoint PLUS(+)

HPE IDOL Plus Connectors marked (+) also include one or more advanced features such as:

- View: view a document in native or near native view
- Collect: retrieve documents and send them to a destination, such as a shared folder
- Hold: make a set of documents unchangeable in the source repository
- Release: feature provides the opposite capability of Hold
- Delete: delete, unlink, and remove a set of documents from a repository
- Update: change repository metadata about a set of documents (created time, author, etc.)
- Insert: add a document into a repository

HPE IDOL Express (previously called HP IDOL Express)

HPE IDOL Express is licensed by GB measured in IDOL Raw Data Size on an Unlimited number of central processing units or CPUs and for an Unlimited number of Users. As of March 2016, HPE IDOL Express is only available to customers expanding their existing environment (i.e. extending a single Cluster). The features and functions included in HPE IDOL Express are as follows:

Functions

- Automatic Query Guidance
- Hyperlinking
- Summarization
- Dynamic Thesaurus
- Spelling Correction
- Retrieval-Concept
- Retrieval-Advanced, Retrieval-Lite
- Auto-Language Detection
- Highlighting
- Retrieval-Parametric

Infrastructure Tools

- Distributed Index Handler
- Distributed Action Handler
- DisH
- Generic Mapped Security (IAS)
- Application Builder ACI-API

Administration Tools

- IDOL Admin
- IDOL Site Admin

Business Administration Tools

- IDOL Search Optimizer

Connectors

The **Connect** functionality includes the following list of connectors, and includes the ability to connect to and access data from repositories:

- Alfresco
- Amazon Commerce Web Service
- Box.net
- Confluence
- DataSift
- Documentum
- Exchange WS
- Exchange
- eRoom
- Facebook
- FileNet P8
- Filesystem
- FTP
- Google Drive
- Hadoop
- HTTP
- IBM Seedlist
- IMAP
- Jive
- LinkedIn
- Lotus Notes
- Lync
- ODBC
- OpenText/Hummingbird
- Oracle
- POP3
- RSS
- Salesforce
- SharePoint 2007
- SharePoint 2010

- SharePoint 2013
- SharePoint Remote
- StoreAll
- Twitter
- Vertica
- WC3 Atom
- Weibo
- Yahoo! Search
- YouTube

HPE IDOL Express Search

HPE IDOL Express Search is licensed by number of Documents on an Unlimited number of central processing units or CPUs and for an Unlimited number of Users, operating across a single Cluster. If a Document is stored more than once, each instance is included in the count separately.

The features and functions included in HPE IDOL Express Search are as follows:

Functions

- Retrieval-Lite
- Retrieval-Advanced
- Hyperlinking
- Spelling Correction
- Retrieval-Concept
- Retrieval-Parametric
- Summarization
- Auto-Language Detection
- Dynamic Thesaurus
- Highlighting

Infrastructure Tools

- Distributed Index Handler
- Distributed Action Handler
- Application Builder (ACI API)

System Administration Tools

- IDOL Admin
- IDOL Site Admin

Data Administration Tools

- IDOL Search Optimizer

End User Tools

- HPE Find
- HPE BI for Human Information

Connectors

HPE IDOL Express Search includes all HPE IDOL Standard Connectors.

HPE IDOL Premium (previously called HP IDOL Premium)

HPE IDOL Premium is licensed by GB measured in IDOL Raw Data Size on an Unlimited number of central processing units or CPUs and for an Unlimited number of Users. As of March 2016, HPE IDOL Premium is only available to customers expanding their existing environment (i.e. extending a single Cluster). The features and functionality included in HPE IDOL Premium includes those in HPE IDOL Express listed above and the following:

Functions

- Personalization Package (Alerting, Mailing, Agents)
- Expertise Package (Collaboration, Expertise-All, Profiling)
- Taxonomy Generation
- Categorization and Channels
- Clustering-All
- Education-Basic
- Education-Sentiment Analysis
- Geospatial
- Visualization

Business Administration Tools

- IDOL Collaborative Classifier

Connectors

The **ConnectPlus** functionality includes the following list of additional connectors:

- Confluence
- Documentum
- Exchange WS
- Exchange
- eRoom
- FileNet P8
- Filesystem
- FTP
- Hadoop
- IBM Seedlist
- IMAP
- Lotus Notes
- OpenText/Hummingbird
- Oracle
- POP3

- SharePoint 2007
- SharePoint 2010
- SharePoint Remote
- StoreAll

and includes one or more advanced features such as:

- View: view a document in native or near native view
- Collect: retrieve documents and send them to a destination, such as a shared folder
- Hold: make a set of documents unchangeable in the source repository
- Release: feature provides the opposite capability of Hold
- Delete: delete, unlink, and remove a set of documents from a repository
- Update: change repository metadata about a set of documents (created time, author, etc.)
- Insert: add a document into a repository

HPE IDOL Premium Search and HPE IDOL Premium Search add-ons

HPE IDOL Premium Search is licensed by number of Documents on an Unlimited number of central processing units or CPUs and for an Unlimited number of Users, operating across a single Cluster. If a Document is stored more than once, each instance is included in the count separately. The features and functionality included in HP IDOL Premium Search includes those in HPE IDOL Express Search listed above and the following:

Functions

- Generic Mapped Security (IAS)
- Personalization package (Alerting, Mailing, Agents)
- Expertise Package (Collaboration, Expertise, Profiling)
- Automatic Query Guidance (AQG)
- Agent Boolean

Other functionality can added to HPE IDOL Premium Search; see *HPE IDOL Premium Search Add-on modules* below.

Connectors

HPE IDOL Premium Search includes all HPE IDOL Standard Connectors.

HPE IDOL Premium Search add-on modules provide additional functionality and can be applied to HPE IDOL Premium Search. They are licensed by number of Documents and tie in with a purchase of HPE IDOL Premium Search software. If a Document is stored more than once, each instance is included in the count separately.

Available Add-on modules

- Sentiment Analysis
- Education
- Clustering

HPE IDOL Ultimate

HP IDOL Ultimate is licensed by number of Documents on an Unlimited number of central processing units or CPUs and for an Unlimited number of Users, operating across a single Cluster. If a Document is stored more than once, each instance is included in the count separately. The features and functionality included in HP IDOL Ultimate includes those in HP IDOL Premium Search listed above and the following:

Functions

- Natural language question answering
- Sentiment Analysis
- Education
- Clustering
- Knowledge Graph
- Taxonomy Generation
- Categorization and Channels
- Geospatial

Business Administration Tools

- IDOL Collaborative Classifier

Connectors

HPE IDOL Ultimate includes all HPE IDOL Standard Connectors.

HPE Media Management and Analysis Platform (previously called HP Media Management and Analysis Platform)

HPE Media Management and Analysis Platform includes 100 licenses for Rich Media Server. Rich Media Server is licensed per Concurrent Ingest Channel for basic video management. HPE Surveillance, Video and Audio Analytics are separately licensed products. The features and functionality included in HPE Media Management and Analysis Platform are as follows:

Functions

- Media server
 - Ingest engines
 - Output engines
 - Transformation engines
 - Event stream processing engines
- HTML5 Widgets
 - Media player
 - Timeline
 - Transcript
- RestFUL API's
 - Folder Management
 - Camera Management
 - Channel Management
 - Recorder Management
 - Source Recording
 - Video Streaming
 - Keyframe and metadata
 - Video Clipping
 - Frame Extraction

HPE Surveillance Analytics (previously called HP Surveillance Analytics)

HPE Surveillance Analytics is a Rich Media Server licensed per Concurrent Ingest Channel (such as a camera IP stream) and for that Ingest Channel any combination of the functions below can be applied. The features and functionality included in HPE Surveillance Analytics are as follows:

- Demographics
- FaceDetect
- FaceRecognize
- NumberPlate
- SceneAnalysis
- Vehicle make / model
- Video management

Each HPE Surveillance Analytics license entitles you to 250 individual entries in the FaceRecognize database.

HPE Visual Analytics (previously called HP Visual Analytics)

HPE Visual Analytics is a Rich Media Server licensed per Concurrent Ingest Channel and for that Ingest Channel any combination of the analytics can be applied. The features and functionality included in HPE Visual Analytics are as follows:

Functions

- Barcode
- Demographics
- FaceDetect
- FaceRecognize
- FaceState
- Keyframe
- NumberPlate
- Object
- ObjectClas
- OCR
- SceneAnalysis
- Vehicle make / model
- Video management

When combined with Audio Server licenses, Rich Media Server provides visual and audio analysis in one seamless package. Each HPE Visual Analytics license entitles you to 250,000 individual entries in the FaceRecognize database.

Additional license terms

TERM

- A. Any licensing terms designated as being of Autonomy that may be embedded in the software are inapplicable in their entirety.
