

Hybrid Cloud Management NG Premium 2017.05

Released on May 26, 2017.

Hybrid Cloud Management (HCM) offers complete lifecycle management for bare-metal, operating systems, virtual machines, and containers. HCM provides a solution that allows you to build your private cloud and then expand into public and managed cloud.

The Next-Generation (NG) Premium edition of the HCM suite offers the following benefits:

- Quick and easy container-based deployment, scaling, and management
- Seamless integration and a unified user experience
- Open and heterogeneous architecture to support any cloud platform
- Design-once-order-anytime-run-anywhere cloud services, with cloud agnostic service design and advanced lifecycle management
- Industry-proven, end-to-end orchestration for cloud and conventional environment and processes
- Integrated Application Release Automation through automated stage gates to power continuous delivery

Documentation

You can see the latest version of the complete documentation on the [HPE Software Documentation Portal](#).

New features and enhancements in this release of HCM are described in the [Release Notes](#).
